*This compares electricity costs for an average residential customer in the SCP/PG&E service area (Sonoma and Mendocino counties) with an average monthly usage of 477 kilowatt-hours (kWh). This is based on a representative 12-month billing history for all customers on E-1 rate schedules. Rates are effective May 1, 2020 for PG&E and July 1, 2020 for SCP.

Generation Rate is the cost of creating electricity to power your home. The generation rate varies based on your energy provider and the resources included in your energy provider's generation supply.

PG&E Delivery Rate is a charge assessed by PG&E to deliver electricity to your home. The PG&E delivery rate depends on your electricity usage, but is charged equally to both SCP and PG&E customers.

PG&E PCIA/FF represents the Power Charge Indifference Adjustment (PCIA) and the Franchise Fee surcharge (FF). The PCIA is a charge to recover PG&E's above-market costs for generation resources acquired prior to a customer's switch to a third-party electric generation provider. The PCIA also applies to PG&E customers that elect to take service under PG&E's optional Solar Choice program. PG&E acts as a collection agent for the Franchise Fee surcharge, which is levied by the California Public Utilities Commission (CPUC) on behalf of cities and counties in PG&E's service territory for all customers. The costs for resources included in the PCIA and FF surcharges are included in the generation rate for PG&E bundled service customers.

If this comparison does not address your specific rate, please visit PG&E online at pge.com/ccs or call 1-866-743-0335. For information on SCP's generation rates, please visit sonomacleanpower.org or call 1-855-202-2139.
