We support your power to choose

As part of our mutual commitment to support your energy choice, Monterey Bay Community Power (MBCP) &Pacific Gas and Electric Company (PG&E) have partnered to provide you with a comparison of typical commercial electric rates, average monthly charges and sources of energy generated.

If this comparison does not address your specific rates, please visit PG&E online at **pge.com/cca** or call **866-743-0335**. For information about MBCP's generation rates, please visit **mbcp.org/billing** or call **888-909-6227**.

Understanding your energy choice

2020 Commercial Rate Comparison, A10S TOU*

	PG&E	MBCP MBchoice
Generation Rate ($/kWh)	$0.11932	$0.08145
PG&E Delivery Rate ($/kWh)	$0.11719	$0.11719
PG&E PCIA/FF ($/kWh)	N/A	$0.03508
Total Electricity Cost* ($/kWh)	$0.23651	$0.23372
Average Monthly Bill ($)	$3,132.71	$3,095.76

*This compares electricity costs for an average commercial customer in the MBCP/PG&E service area (Monterey, San Benito and Santa Cruz Counties as well as the cities of Morro Bay and San Luis Obispo) with an average monthly demand of 45 kilowatts (kW) and an average monthly usage of 13,246 kilowatt-hours (kWh). This is based on a representative 12-month billing history for all customers on A10S TOU rate schedules for PG&E's published rates as of May 1, 2020 and for MBCP's published rates as of March 1, 2020.

GENERATION RATE is the cost of creating electricity to power your business. The generation rate varies based on your energy provider and the resources included in your energy provider's generation supply.
PG&E DELIVERY RATE is a charge assessed by PG&E to deliver electricity to your business. The PG&E delivery rate depends on your electricity usage, but is charged equally to both MBCP and PG&E customers.

PG&E PCIA/FF represents the Power Charge Indifference Adjustment (PCIA) and the Franchise Fee surcharge (FF). The PCIA is a charge to recover PG&E's above-market costs for generation resources acquired prior to a customer's switch to a third-party electric generation provider, such as MBCP. PG&E acts as a collection agent for the Franchise Fee surcharge, which is levied by the California Public Utilities Commission (CPUC) on behalf of cities and counties in PG&E's service territory for all customers. The costs for resources included in the PCIA and FF surcharges are included in the generation rate for PG&E bundled service customers.

If this comparison does not address your specific rates, please visit PG&E online at **pge.com/cca** or call **866-743-0335**. For information about MBCP's generation rates, please visit **mbcp.org/billing** or call **888-909-6227**.

Electric Generation Rates
Price ($) per kWh

Legend: PG&E, MBCP

Summer
- Peak: PG&E $0.17720 / MBCP $0.13534
- Partial: PG&E $0.12207 / MBCP $0.08407
- Off-Peak: PG&E $0.09400 / MBCP $0.05797

Winter
- Partial: PG&E $0.10613 / MBCP $0.06925
- Off-Peak: PG&E $0.08907 / MBCP $0.05338

Demand Charges (Summer Only)
Price ($) per kW
- Summer: PG&E $5.78 / MBCP $5.34

PCIA/FF fees are included in PG&E's base generation rates, but are charged separately for MBCP customers.

Chart is for illustrative purposes only and is not to scale.

Electric Power Generation Mix

Specific Purchases	PG&E	MBCP MBchoice
	% of Total Retail Sales (MWh)	
Renewable	29%	31%
• Biomass & Biowaste	3%	2%
• Geothermal	2%	10%
• Eligible Hydroelectric	2%	3%
• Solar Electric	12%	8%
• Wind	9%	8%
Coal	0%	0%
Large Hydroelectric	27%	69%
Natural Gas	0%	0%
Nuclear	44%	0%
Other	0%	0%
Unspecified Sources of Power†	0%	0%
TOTAL	100%	100%

As reported to the CA Energy Commission's Power Source Disclosure Program excluding voluntary unbundled renewable energy credits. PG&E data is subject to an independent audit and verification that will not be completed until later in 2020. The figures above may not sum up to 100% due to rounding.

†Unspecified sources of power refers to electricity that is not traceable to a specific generating facility, such as electricity traded through open market transactions. Unspecified sources of power are typically a mix of all resource types, and may include renewables.
