## We support your power to choose

As part of our mutual commitment to support your energy choice, Peninsula Clean Energy and Pacific Gas and Electric Company (PG&E) have partnered to provide you with a comparison of typical commercial electric rates, average monthly charges and generation portfolio contents.

If this comparison does not address your specific rate, please visit PG&E online at [pge.com/cca](https://pge.com/cca) or call 866-743-0335. For information on Peninsula Clean Energy's generation rates, please visit [PenCleanEnergy.com](https://PenCleanEnergy.com) or call 866-966-0110.

# Understanding your energy choice

## 2021 Commercial Rate Comparison, B-10S TOU\*

|                                 | Peninsula Clean Energy |           |           |
|---------------------------------|------------------------|-----------|-----------|
|                                 | PG&E                   | ECOplus   | ECO100    |
| Generation Rate (\$/kWh)        | \$0.11592              | \$0.06532 | \$0.06648 |
| PG&E Delivery Rate (\$/kWh)     | \$0.11999              | \$0.11999 | \$0.11999 |
| PG&E PCIA/FF (\$/kWh)           | N/A                    | \$0.04945 | \$0.04945 |
| Total Electricity Cost (\$/kWh) | \$0.23591              | \$0.23476 | \$0.23592 |
| AVERAGE MONTHLY BILL (\$)       | \$3987.12              | \$3967.68 | \$3987.29 |

\*This compares electricity costs for an average commercial customer in the Peninsula Clean Energy/PG&E service area (San Mateo County) with an average monthly demand of 114 kW and an average monthly usage of 33,245 kilowatt-hours (kWh). This is based on a representative 12-month billing history for all customers on B-10S TOU rate schedules for PG&E's and Peninsula Clean Energy's published rates as of March 2021.

**Generation Rate** is the cost of creating electricity to power your business. The generation rate varies based on your energy provider and the resources included in your energy provider's generation supply.

**PG&E Delivery Rate** is a charge assessed by PG&E to deliver electricity to your business. The PG&E delivery rate depends on your electricity usage, but is charged equally to both PCE and PG&E customers.

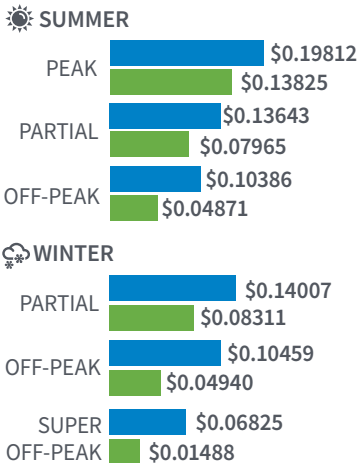

**PG&E PCIA/FF** represents the Power Charge Indifference Adjustment (PCIA) and the Franchise Fee Surcharge (FF). The PCIA is a charge to ensure that both PG&E customers and those who have left PG&E service to purchase electricity from other providers pay the above market costs for generation resources that were procured by PG&E on their behalf. "Above market" refers to expenditures for electric generation resources that cannot be fully recovered through sales of these resources at current market prices. PG&E acts as a collection agent for the FF surcharge, which is levied by the California Public Utilities Commission on behalf of cities and counties in PG&E's service territory for all customers. The costs for resources included in the PCIA and FF surcharges are included in the generation rate for PG&E bundled service customers.

### Electric Generation Rates

Price (\$) per kWh

■ PG&E ■ Peninsula Clean Energy

PCIA fees are included in PG&E's base generation rates, but are charged separately for Peninsula Clean Energy customers. *Chart is not to scale.*

## 2020 Electric Power Generation Mix\*

| Specific Purchases             | Percent of Total Retail Sales |         |        |
|--------------------------------|-------------------------------|---------|--------|
|                                | Peninsula Clean Energy        |         |        |
|                                | PG&E                          | ECOplus | ECO100 |
| Renewable                      | 31%                           | 52%     | 100%   |
| • Biomass & Biowaste           | 3%                            | 12%     | 0%     |
| • Geothermal                   | 3%                            | 3%      | 0%     |
| • Eligible Hydroelectric       | 1%                            | 1%      | 0%     |
| • Solar                        | 16%                           | 30%     | 50%    |
| • Wind                         | 8%                            | 7%      | 50%    |
| Coal                           | 0%                            | 0%      | 0%     |
| Large Hydroelectric            | 10%                           | 47%     | 0%     |
| Natural Gas                    | 16%                           | 0%      | 0%     |
| Nuclear                        | 43%                           | 1%      | 0%     |
| Other                          | 0%                            | 0%      | 0%     |
| Unspecified Sources of Power** | 0%                            | 0%      | 0%     |
| TOTAL                          | 100%                          | 100%    | 100%   |

\*As reported to the California Energy Commission's Power Source Disclosure Program. PCE and PG&E data is subject to an independent audit and verification that will not be completed until later in 2021. The figures above may not sum up to 100 percent due to rounding.

\*\*Unspecified sources of power refers to electricity that is not traceable to a specific generating facility, such as electricity traded through open market transactions.
