## NOTICE OF PACIFIC GAS AND ELECTRIC COMPANY'S RATE DECREASE REQUEST

### Pacific Gas and Electric Company's (PG&E) Income Qualified Programs Application to the California Public Utilities Commission (CPUC) A.26-01-003

#### What is being requested?

PG&E is requesting **\$1,025.2 million** in revenue for program years **2028 through 2033**, which is lower than the revenue authorized for the current income-qualified program cycle. The request covers administrative and program costs for the California Alternate Rates for Energy (CARE), Family Electric Rate Assistance (FERA) and Energy Savings Assistance (ESA) programs, as well as costs for the Concurrent Application System.

#### Estimated decrease in electric rates (2028–2033)

If approved, residential electric rates for income-qualified programs will decrease overall for the 2028–2033 program cycle compared to current rates. The table inside shows the requested decrease in rates for the year with the highest revenues (2032). This decrease will be phased in over the program cycle years. Actual changes in rates may vary by year.

\*Customers who receive electric generation as well as transmission and distribution service from PG&E

\*\*Customers who purchase energy from non PG&E suppliers

\*\*\*Customers who purchase their electricity from a non-utility supplier and receive transmission and distribution service from a publicly-owned utility or municipality. A rate comparison cannot be provided for Departed Load as the applicable rates vary by specific departed load customer categories and any average rate that could be derived would not be representative of any particular departed load category.

## Estimated change in gas rates (2028–2033)

If approved, residential gas rates for income-qualified programs will change overall for the 2028–2033 program cycle compared to current rates. The table below shows the requested change in rates for the year with the highest revenues (2032). This rate change will be phased in over the program cycle years. Actual changes in rates may vary by year, with most years reflecting decreases and one year (2032) showing a very small residential increase of approximately 0.03%.

<sup>1</sup>CARE customers receive a 20% discount on transportation and procurement and are exempt from PG&E's Public Purpose Program Surcharge and California Solar Initiative Solar Water Heater rate components.

<sup>2</sup>Covered entities pay certain allowances directly to the Air Resources Board and will see an exemption credit on their bill.

## How would this impact the typical residential customer?

If the request is approved, a typical residential electric customer using 500 kWh per month would see a bill decrease of approximately \$0.01 per month. A typical residential gas customer using 31 therms would see a bill increase of approximately \$0.03 per month. Actual impacts will vary depending on usage and are subject to CPUC regulatory approval.

## Additional information

An administrative law judge will hold hearings and consider evidence, testimony and public comments before drafting a proposed decision on this application. CPUC Commissioners will then vote on a final decision at a public meeting.
