

Notice of Golden State Water's Rate Increase Request

Golden State Water Company's (GSWC) 2026 General Rate Case Application to the California Public Utilities Commission (CPUC) A.26-07-001 – San Juan Oaks Service Area

What is Being Requested?

GSWC's San Juan Oaks (SJO) service area is comprised of both a water and wastewater sewer system (SJOWW).

For its SJO drinking water system, GSWC is requesting an increase in revenues of \$153,973 or 27.3% from 2028-2030 to cover its anticipated costs for depreciation expense, pension and benefits, return on rate base, allocated general office expenses and district office expenses (such as customer service, water quality) and purchased power.

Customer Class	\$ Increase	% Increase	Estimated Average Bill Changes (\$)
Residential	\$ 19,346	13.3%	\$6.23
Commercial	\$ 58,056	49.7%	\$79.96
Public Authority	\$ 1,005	83.3%	\$83.75
Irrigation	\$ 75,566	32.3%	\$135.84

Additionally, GSWC is requesting an increase in revenues of \$237,594 or 43.2% for its SJOWW sewer system. This request is for GSWC to cover its anticipated cost from 2028 through 2030 for operations expense, purchased power, allocated General Office expenses and district office expenses (such as customer service, water quality), employee benefits and depreciation expense.

How Would This Impact the Average Residential Customer?

If the request is approved, the average residential customer with a 1 to 3/4" meter using 8 ccf (1 ccf = 748 gallons) per month would see a rate increase of approximately \$6.23 per month. The actual impact will vary based on usage and other factors.

For wastewater a customer with a 1" meter would see an increase of \$47.20 per month.
