

PACIFIC GAS AND ELECTRIC COMPANY (PG&E) LAKEVILLE HQ
ELECTRIC TRANSMISSION AUDIT FINDINGS
DECEMBER 2-6, 2024

I. Records Review

During the audit, ESRB staff reviewed the following records:

- PG&E's Electric Transmission Preventive Maintenance (ETPM) Manual, TD-1001M, Revisions 4-5.
- PG&E's utility procedures, standards, guidelines, and job aids for electric transmission facility inspections.
- Overhead transmission facilities statistics.
- PG&E Lakeville HQ Service Territory Map and list of all transmission facilities owned or jointly owned by PG&E.
- Patrol, detailed, aerial, climbing, infrared, drone, and helicopter inspection records from December 2019 to December 2024.
- Third Party Safety Hazard notifications sent and received from November 2019 to June 2024.
- PG&E's utility procedures, standards, guidelines, and job aids for electric transmission vegetation management.
- A list of vegetation management inspection records and tree work orders for transmission circuits from November 2019 to November 2024.
- PG&E's policies and procedures related to transmission right-of-way maintenance, and associated performance records from January 2020 to October 2024.
- PG&E's policies and procedures for insulator washing, and associated performance records from March 2021 to July 2024.
- PG&E's policies and procedures for pole intrusive tests, foundation tests, and all other tests related to transmissions structure safety, and associated performance records from March 2021 to August 2024.
- A list of non-routine patrols for electric transmission facilities from October 2019 to March 2024.
- PG&E's policies and procedures for assigning priority levels to transmission deficiencies from January 2020 to October 2024.
- A list of all open, closed, and canceled notifications from April 2017 to October 2024.
- Pole loading and safety factor calculations completed from October 2023 to October 2024.
- New construction projects completed from September 2023 to October 2024.
- PG&E's utility standard and procedures for transmission work verification and vegetation management quality control (QC) and quality assurance (QA).
- The results of all internal quality management audits from July 2021 to October 2024.
- A list of PG&E inspector training courses from March 2019 to March 2024.

II. Records Violations

ESRB staff found the following violations during the records review portion of the audit: PG&E's ETPM establishes when corrective actions for problems must be completed. For the time period reviewed in this audit two versions of the ETPM are relevant. PG&E's last two versions of its ETPM, Revision 4, effective November 20, 2018, and Revision 5, effective August 31, 2020, define the priority codes and associated due dates for the corrective actions shown in **Table 1** and **Table 2** below. Additionally, PG&E Utility Procedure TD-8123P-103 provides guidance for setting priority codes on and after January 3, 2023.

Table 1. PG&E ETPM Rev 4, Published on 11/20/2018, Priority Codes ^{1,2}

Priority Code	Priority Code Priority Description
A	The condition is urgent and requires immediate response and continued action until the condition is repaired or no longer presents a potential hazard. SAP due date will be 30 days to allow time for post-construction processes and notification close-out.
B	Corrective action is required within 3 months from the date the condition is identified. The condition must be reported to the transmission line supervisor as soon as practical.
E	Corrective action is required within 12 months from the date the condition is identified.
F	Corrective action is recommended within 24 months from the date the condition is identified, (due beyond 12 months, not to exceed 24 months). Requires Director approval.

¹ QCRs must report immediately any "Priority Code A" abnormal condition to the transmission line supervisor and GCC.

² In addition, QCRs must report any "Priority Code B" condition to the transmission line supervisor as soon as practical, to ensure that correction occurs within the appropriate time.

³ Refer to 2.3.5.2, "Priority Code Due Dates for High Fire Risk Conditions within HFTDs" and 2.3.5.3, "Priority Code Due Dates for Non-Fire Risk Conditions within HFTDs."

⁴ QCRs must report immediately any "Priority Code A" abnormal condition to the transmission line supervisor, and the transmission supervisor or QCR contacts GCC.

Table 2. PG&E ETPM Rev 5, Published on 8/31/2020, Priority Codes

Priority Code ³	Priority Description
A⁴	The condition is urgent and requires immediate response and continued action until the condition is repaired or no longer presents a potential hazard. SAP due date will be 30 days to allow time for post-construction processes and notification close-out.
B⁵	Corrective action is required within 3 months from the date the condition is identified. The condition must be reported to the transmission line supervisor as soon as practical.
E	Corrective action is required within 12 months from the date the condition is identified. <i>EXCEPT FOR ITEMS WITHIN HFTD TIER 3 ARE REQUIRED WITHIN 6 MONTHS.</i>⁶
F	Corrective action is recommended within 24 months from the date the condition is identified, (due beyond 12 months, not to exceed 24 months). <i>EXCEPT FOR ITEMS WITHIN HFTD TIER 3 ARE REQUIRED WITHIN 6 MONTHS AND WITHIN HFTD TIER 2 ARE REQUIRED WITHIN 12 MONTHS.</i>⁷

Table 3. PG&E TD-8123P-103, Rev 1, Published on 1/1/2024, Electric Transmission Line Guidance for Setting Priority Codes

Priority Code	G.O. 95, Rule 18 Level	Priority Description – Time Frame ⁸
A	1	The condition is urgent and requires immediate response and continued action until the condition is repaired or no longer presents a potential hazard. SAP due date is 30 days – to allow time for post-construction processes and notification close-out.
B	-	Not used for maintenance corrective action priority.
E	2	Corrective action is required, as follows: • Within 6 months for HFTD Tier 3⁹ • Within 12 months for HFTD Tier 2/HFRA/Zone 1¹⁰ • Within 12 months for potential violations that compromise worker safety Within 36 months for all other potential violations.
F	3	Corrective action is required within 60 months.

- a. ESRB’s review of PG&E’s Line Corrective (LC) notifications from “DRU14516_Q16_Atch01_Lakeville Master List of Notifications” found a total of 2,111 late LC notifications. **Table 4** below breaks down the late notifications by priority and type (late-closed, late-open, and late-canceled). Late-closed notifications are notifications that were completed past their assigned due date based on their priority code. Late-open notifications are incomplete notifications that were not completed by their assigned due date based on their priority code. Late-canceled notifications are notifications that were canceled after their assigned due date based on their priority code.

Table 4. Number of Late Notifications by Priority and Type¹¹

Priority Code	Late Closed Notifications	Late Open Notifications	Late Canceled Notifications	Total Late Notifications
A	1	0	6	7
B	29	0	10	39
E	1854	419	341	2614
F	113	21	28	162
Total	1997	440	385	2822

PG&E Response:

We were unable to replicate the numbers listed above in Table 4 “Number of Late Notifications by Priority and Type” and therefore completed an analysis based on the dataset from the pre-audit data request (PADR). Please see the breakdown of our findings below:

We find that 2,733 of 13,569 notifications provided in the “Open-Closed Notifications” tab in the PADR, were completed past their established due dates or are currently considered past-due. Please see “*DRU15192_Atch01_Open-Closed Notifications.xlsx*” and the individual category responses below:

- 1,824 notifications were completed past their established due dates.
- 909 open notifications are considered late based on their established due dates.
- We do not agree with any of the 385 “Late Canceled Notifications.”

Late Closed Notifications

We acknowledge that 1,824 notifications have been completed past their established due dates.

⁵ In addition, QCRs must report any “Priority Code B” condition to the transmission line supervisor as soon as practical, to ensure that correction occurs within the appropriate time.

⁶ If the condition in the HFTD Tier 3 does NOT create a fire risk (non-threatening) the corrective action is required within 12 months.

⁷ If the condition in the HFTD Tier 3 OR Tier 2 does NOT create a fire risk (non-threatening) the corrective action is required within 24 months.

⁸ Time frames listed are “Not to Exceed” and QCR/CIRT may define time frames according to site-specific conditions.

⁹ IF the condition in the HFTD Tier 3 OR Tier 2/HFRA/Zone 1 does **not** create a fire risk (non-threatening), THEN the corrective action is required **within 36 months**.

¹⁰ IF the condition in the HFTD Tier 3 OR Tier 2/HFRA/Zone 1 does **not** create a fire risk (non-threatening), THEN the corrective action is required **within 36 months**.

Late Open Notifications

We agree that 909 of the 6,080 “Open Notifications” provided in the PADR are considered past-due.

- 160 have been completed since the PADR, surpassing their required end date.
- 749 are currently open and past the required end date.

Late Canceled Notifications

We disagree with the above 385 records violations for “Late Canceled Notifications” as we do not have a timeline requirement in our guidance documents for canceling notifications that are deemed unnecessary, duplicative, or created in error, after review by the CIRT. These notifications are not late as no corrective actions were performed.

b. **Table 5** below shows the most overdue notifications for each Priority Code.

Table 5. Most Overdue Notifications

Priority Code ¹²	Notification Number	Status	Completion Date	Due Date	Days Late ¹³
A	127550610	Closed	2/3/2024	12/04/2023	61
B	123207482	Closed	11/3/2022	6/24/2022	132
E	115586529	Closed	4/11/2023	12/21/2019	1207
F	117506064	Closed	2/21/2024	6/29/2021	967

PG&E Response:

We have reviewed each of the notifications in Table 5 “Most Overdue Notifications” and provide a response in descending order below:

- Notification 127550610 was created on November 4, 2023, as an E priority as a pole replacement. On February 1, 2024, CIRT performed a review and upgraded this notification to an A priority. The pole was replaced on February 3, 2024.
- Notification 123207482 was created on March 24, 2022, as a “Can’t Get In” (CGI) to clear vegetation around a pole so a ground inspection could be performed. The CGI was resolved, and the inspection was completed on November 3, 2022.
- Notification 115586529 was created on December 21, 2018, as an E priority, to install a missing high-voltage sign on a non-HFTD poles. The marker was installed on April 11, 2023.
- Notification 117506064 was created on June 29, 2019, as an F priority notification, to install markers on a steel pole in non-HFTD, inside of substation fence. Markers were installed on February 21, 2024.

¹¹ Due dates are assumed to be the Required End Date unless a Funded Repair Date is available. Additionally, Priority F and Priority E work orders that were created before January 1, 2023 are considered late if they are not completed by the date per the timeframes established in PG&E’s ETPM Rev 4 or Rev 5.

¹² Current Priority Code provided by PG&E.

¹³ Days late are determined to be the difference between the Completion Date (or March 1, 2024 if the notification was open) and the Required End Date (or Funded Repair Date if one was provided).

- c. ESRB found in its review of “DRU14516_Q12_Atch06_Insulator Wash” that the following seventeen notifications for washing insulators were performed late per PG&E’s assigned required end date.

Table 6. Late Insulator Wash Notifications

Notification Number	Priority Code	Notification Date	Due Date	Completion Date
122242290	E	10/21/2021	4/21/2022	
122265873	E	10/27/2021	10/27/2022	
123797213	E	6/9/2022	12/9/2022	10/18/2023
121609160	E	6/18/2021	12/18/2021	9/24/2022
121593234	E	6/23/2021	12/23/2021	9/24/2022
120700600	E	3/27/2021	3/27/2024	
126018715	E	4/21/2023	4/21/2024	
120914522	E	5/1/2021	5/1/2024	
121527561	E	6/12/2021	6/12/2024	
121541779	E	6/15/2021	6/15/2024	
121541854	E	6/15/2021	6/15/2024	
121526846	E	6/10/2021	6/10/2022	8/23/2022
122079072	E	9/21/2021	9/21/2024	
122079141	E	9/21/2021	9/21/2024	
120951461	E	5/7/2021	5/7/2022	6/22/2022
120951472	E	5/7/2021	5/7/2022	6/22/2022
121629018	E	6/29/2021	12/29/2021	1/24/2022

PG&E Response:

We agree that sixteen of the cited seventeen notifications above in Table 6 “Late Insulator Wash Notifications” were performed past their required end dates or, if previously reassessed, funded repair dates (FRD).

However, we disagree that notification 121593234 was completed past-due as this was completed before the funded repair date (FRD).

While we are executing priority E and F notifications as efficiently as possible, due to a backlog of work, we prioritize work based on risks. The remaining will be completed as soon as operationally feasible.

- d. ESRB found 73 work orders that had no Reassessment Dates despite having different initial and current priority codes. Examples are shown below in **Table 7**.

Table 7. Notifications Reassessed With No Reassessment Date

Notification Number	Original Priority Code	Current Priority Code	Notification Date
117226742	E	B	2019-04-24
117122173	F	E	2019-04-27
117160133	F	E	2019-05-02
117191788	B	E	2019-05-06
117191321	B	E	2019-05-07
117227351	B	E	2019-05-10
117323710	E	F	2019-05-14
117339631	E	F	2019-05-29
117429634	F	E	2019-05-30
117436686	F	E	2019-06-04

PG&E Response:

We acknowledge that the 73 notifications cited above did not have a reassessment date listed in the PADR Q16, but we disagree that this is a violation of G.O. 95, Rule 18. Of the 73 cited notifications above:

- 29 notifications received priority changes during the initial gatekeeping stage (S5) by CIRT and did not need a reassessment.
- 2 notifications received priority changes during L123 conversion by CIRT and did not need a reassessment.
- 42 notifications cited above did have Field Safety Reassessment (FSR) performed and Funded repair dates added. These 42 were inadvertently not included in PADR Q16, due to early year technology gaps with our mobile inspection software. Please see “*DRU15192_Atch02_Reassessments.xlsx*” for the Reassessment date information.

III. Field Inspection

During the field inspection, ESRB staff inspected the following facilities:

Table 8. Audit Locations

Location Number	Structure Type	ID	Circuit	Approximate Longitude, Latitude
1	Wood pole	000/015	Monte Rio - Fulton	-122.77350482, 38.49671609
2	Wood pole	000/015	Fulton - Windsor	-122.77298463, 38.49677641

IV. Field Inspection Violations

PG&E Response:

We appreciate the insight and feedback from the ESRB, as well as the support in helping us achieve our stand that everyone and everything is always safe. We agree with 7 of the ESRB's findings of violation and are committed to remedying these issues and striving to reduce and eliminate such findings in the future.

We disagree with 32 of 39 cited field inspection violations listed below. These locations either had a pre-existing non-conformance, that was identified by our Qualified Company Representative (QCR), documented within our system of record (SAP), and established in our work management annual work plan, prior to the CPUC field audit or was deemed unnecessary by CIRT.

The remaining 15 observations were third party safety concerns. PG&E has acted on these concerns, working with the corresponding team to create any notifications required and alerting the third party(s) responsible for the work.

ESRB staff observed the following violations during the field inspection:

1. GO 95, Rule 31.1, Design, Construction and Maintenance states in part:

“Electrical supply and communication systems shall be designed, constructed, and maintained for their intended use, regard being given to the conditions under which they are to be operated, to enable the furnishing of safe, proper, and adequate service.

For all particulars not specified in these rules, design, construction, and maintenance should be done in accordance with accepted good practice for the given local conditions known at the time by those responsible for the design, construction, or maintenance of communication or supply lines and equipment.”

Table 9. GO 95, Rule 31.1 Violations

Location	Violation Description
1	Distribution crossarm bracket looks loose.
1	This pole is missing one visibility strip. Repaired on site.
2	Pole has woodpecker hole.
3	Visibility strips missing one strip. Repaired on site.
8	There is significant rust at the top of the tower. There is an existing tag to repaint the tower from March 15, 2019.
9	Rust on the tower bolts. There is an existing tag #116744882 for paint that was created on March 15, 2019.
11	One of the tower's foundation columns is beginning to erode.

15	Dirty insulators at transmission level and distribution level. PG&E had already noted the issue in an existing work order that was later updated for a full pole replacement.
17	Pole cracking at distribution hardware. There is an existing tag to replace pole.
18	Woodpecker holes that are out of compliance with PG&E's standards. There is an existing repair tag.
22	Pole in poor condition. Covered by existing tag.
23	Wood pole needs fiberglass rods. There is an existing tag.
25	Pole needs fiberglass rods. There is an existing tag.
26	Pole needs fiberglass rods. There is an existing tag.
28	Pole needs fiberglass rods. There is an existing tag.
36	There is a non-compliant woodpecker hole a few feet above primary crossarm.
42	Pole has a tilting crossarm. There is an existing tag to reframe.
53	Box on pole is too low.

PG&E Response:

We acknowledge the observation at Location 1 that the crossarm bracket appears loose; however, we do not agree that this constitutes a violation of GO 95, Rule 31.1. Our Qualified Electrical Worker (QEW) identified and documented this issue prior to the CPUC field audit under notification 123903755. The work will be completed based on current prioritization.

We acknowledge the observation at Location 1 that the visibility strip was missing; however, our QEW identified and documented this issue prior to the CPUC field audit under notification 123903755. The issue was promptly addressed onsite by the PG&E QEW during the field audit by installing a new vis-strip to the structure.

We acknowledge the observation of a woodpecker hole at Location 2; however, we do not agree that this constitutes a violation of GO 95, Rule 31.1. Per TD-1001M-JA06 "Identifying Levels of Damage and Condition of Wood Poles and Non-Steel Framing on Transmission Line Structures and Supports," this hole is less than 1" in diameter and therefore does not warrant an LC Notification. This will continue to be monitored during inspections.

We agree with the finding of the missing visibility strip at Location 3. The issue was promptly addressed onsite by the PG&E QEW during the field audit by installing a new strip to the structure.

We acknowledge the observation of rust at the top of the structure at Location 8; however, we do not agree that this constitutes a violation of GO 95, Rule 31.1. Our QEW identified and documented this issue prior to the CPUC field audit under notification 116745016. The work will be completed based on current prioritization.

We acknowledge the observation of rust on the tower bolts at Location 9; however, we do not agree that this constitutes a violation of GO 95, Rule 31.1. Our QEW identified and documented this issue prior to the CPUC field audit under notification 116744882. The work will be completed based on current prioritization and material availability.

We acknowledge the observation of some erosion at the base of the foundation at Location 11; however, we do not agree that this constitutes a violation of GO 95, Rule 31.1. Our QEW identified and documented this issue prior to the CPUC field audit under notification 128489404. The work will be completed based on current prioritization and material availability.

We acknowledge the observation of dirty insulators at the transmission and distribution levels at Location 15; however, we do not agree that this constitutes a violation of GO 95, Rule 31.1. Our QEW identified and documented this issue prior to the CPUC field audit under notification 125772987. The work will be completed based on current prioritization and material availability.

We acknowledge the observation of the pole cracking at the distribution hardware at Location 17; however, we do not agree that this constitutes a violation of GO 95, Rule 31.1. Our QEW identified and documented this issue prior to the CPUC field audit under notification 126692881. The work will be completed based on current prioritization and material availability.

We acknowledge the observation of woodpecker holes at Location 18; however, we do not agree that this constitutes a violation of GO 95, Rule 31.1. Our QEW identified and documented this issue prior to the CPUC field audit under notification 126006098. The work will be completed based on current prioritization and material availability.

We acknowledge the observation of the imperfect condition of the pole at Location 22; however, we do not agree that this constitutes a violation of GO 95, Rule 31.1. Our QEW identified and documented this issue prior to the CPUC field audit under notification 125882460. The work will be completed based on current prioritization and material availability.

We acknowledge the observation of the pole requiring fiberglass rods at Location 23; however, we do not agree that this constitutes a violation of GO 95, Rule 31.1. Our QEW identified and documented this issue prior to the CPUC field audit under notification 124244085. The work will be completed based on current prioritization and material availability.

We acknowledge the observation of the pole requiring fiberglass rods at Location 25; however, we do not agree that this constitutes a violation of GO 95, Rule 31.1. Our QEW identified and documented this issue prior to the CPUC field audit under notification 124009826. The work will be completed based on current prioritization and material availability.

We acknowledge the observation of the pole requiring fiberglass rods at Location 26; however, we do not agree that this constitutes a violation of GO 95, Rule 31.1. Our QEW identified and documented this issue prior to the CPUC field audit under notification 123957619. The work will be completed based on current prioritization and material availability.

We acknowledge the observation of the pole requiring fiberglass rods at Location 28; however, we do not agree that this constitutes a violation of GO 95, Rule 31.1. Our QEW identified and documented this issue prior to the CPUC field audit under notification 124121921. The work will be completed based on current prioritization and material availability.

We acknowledge the woodpecker damage at Location 36. Notification 129893457 has been created and will be addressed based on current work prioritization.

We acknowledge the observation of the tilting crossarm at Location 42; however, we do not agree that this constitutes a violation of GO 95, Rule 31.1. Our QEW identified and documented this issue prior to the CPUC field audit under notification 129636625. The work will be completed based on current prioritization and material availability.

We acknowledge the observation of the height of the box at Location 53; however, we do not agree that this constitutes a violation of GO 95, Rule 31.1. Our QEW identified and documented this issue prior to the CPUC field audit under notification 129777658. The work will be completed based on current prioritization.

2. GO 95, Rule 44.3, Replacement states in part:

“Lines or parts thereof shall be replaced or reinforced before safety factors have been reduced (due to factors such as deterioration and/or installation of additional facilities) in Grades “A” and “B” construction to less than two-thirds of the safety factors specified in Rule 44.1 and in Grade “C” construction to less than one-half of the safety factors specified in Rule 44.1. Poles in Grade “C” construction that only support communication lines shall also conform to the requirements of Rule 81.3–A.. In no case shall the application of this rule be held to permit the use of structures or any member of any structure with a safety factor less than one.”

Table 10. GO 95, Rule 44.3 Violations

Location	Violation Description
27	Pole splitting at top bolt. There is an existing tag to replace the pole.
27	Pole has two long and wide diagonal cracks. There is an existing tag to replace the pole.
44	Top of pole starting to split.
45	Lowest crossarm on pole is deteriorating and touching distribution down guy.
45	Hole in middle primary crossarm. There is an existing tag #121943719.
53	There is a long split through distribution crossarm.

PG&E Response:

We acknowledge the observations of the conditions on the pole at Location 27; however, we do not agree that this constitutes a violation of GO 95, Rule 44.3. Our QEW identified and documented this issue prior to the CPUC field audit under notification 124210748. The work will be completed based on current prioritization and material availability.

We acknowledge the observation of a split at the top of the pole at Location 44; however, we do not agree that this constitutes a violation of GO 95, Rule 44.3. Our QEW confirmed that the dead-end bolt and split bolt are maintaining the pole’s integrity.

We acknowledge the observation of both deteriorating crossarms at Location 45; however, we do not agree that this constitutes a violation of GO 95, Rule 44.3. Our QEW identified and documented this issue prior to the CPUC field audit under notification 121943719. The work will be completed based on current prioritization and material availability.

We acknowledge the observation of a split through the distribution crossarm at Location 53; however, we do not agree that this constitutes a violation of GO 95, Rule 44.3. Our QEW identified and documented this issue prior to the CPUC field audit under notification 129777658. The work will be completed based on current prioritization and material availability.

3. GO 95, Rule 56.2, Overhead Guys, Anchor Guys and Span Wires, Use states in part:

“Guys shall be attached to structures, as nearly as practicable, at the center of load. They shall be maintained taut and of such strength as to meet the safety factors of Rule 44.”

Table 11.GO 95, Rule 56.2 Violations

Location	Violation Description
18	There is a slack down guy at the distribution level.
28	Slack span guy.

PG&E Response:

We acknowledge the observation of a slack down guy at the distribution level at Location 18; however, we do not agree that this constitutes a violation of GO 95, Rule 44.3. The issue was identified and documented prior to the CPUC field audit under notification 114285807. The work will be completed based on current prioritization and material availability.

We acknowledge the observation of a slack span guy at Location 28; however, we do not agree that this constitutes a violation of GO 95, Rule 44.3. The issue was identified and documented prior to the CPUC field audit under notification 124121921. The work will be completed based on current prioritization and material availability.

4. GO 95, Rule 51.6-A, Marking and Guarding states in part:

“Poles which support line conductors of more than 750 volts shall be marked with high voltage signs. This marking shall consist of a single sign showing the words “HIGH VOLTAGE”, or pair of signs showing the words “HIGH” and “VOLTAGE”, not more than six (6) inches in height with letters not less than 3 inches in height. Such signs shall be of weather and corrosion-resisting material, solid or with letters cut out therefrom and clearly legible.”

Table 12. GO 95, Rule 51.6-A Violations

Location	Violation Description
5	High voltage sign has deteriorated. There is already existing tag.

23	High voltage sign is deteriorated.
32	Faded high voltage signs on both sides of the pole. There is an existing tag.
43	High voltage sign extremely faded and illegible.
53	High voltage signs faded and illegible on both distribution crossarms.

PG&E Response:

We acknowledge the imperfect condition of the high voltage sign at Location 5; however, we do not agree that this constitutes a violation of GO 95, Rule 51.6-A. Our QEW identified and documented this issue prior to the CPUC field audit under notification 123210163. The work will be completed based on current prioritization and material availability.

We acknowledge the imperfect condition of the high voltage sign at Location 23; however, we do not agree that this constitutes a violation of GO 95, Rule 51.6-A. Our QEW identified and documented this issue prior to the CPUC field audit under notification 124244085. The work will be completed based on current prioritization and material availability.

We acknowledge the imperfect condition of the high voltage sign at Location 32; however, we do not agree that this constitutes a violation of GO 95, Rule 51.6-A. Our QEW identified and documented this issue prior to the CPUC field audit under notification 124084601. The work will be completed based on current prioritization and material availability.

We acknowledge the imperfect condition of the high voltage sign at Location 43; however, we do not agree that this constitutes a violation of GO 95, Rule 51.6-A. Our QEW identified and documented this issue prior to the CPUC field audit under notification 129628586. The work will be completed based on current prioritization and material availability.

We acknowledge the imperfect condition of the high voltage sign at Location 53; however, we do not agree that this constitutes a violation of GO 95, Rule 51.6-A. Our QEW identified and documented this issue prior to the CPUC field audit under notification 125776738. The work will be completed based on current prioritization and material availability.

5. GO 95, Rule 51.6-B, Guarding states in part:

“Where the pole or structure is of latticed metal or of similar construction and supports supply conductors in excess of 750 volts and is located in urban districts, or in rural areas adjacent to schools, dwellings, permanent or seasonal camps, or in orchards, or near roads, or trails which are frequently traveled, a barrier shall be so located on the pole or structure as to prevent easy climbing. If the bottom of the barrier is within 12 feet of the ground line, the top shall not be less than 15 feet above the ground line, but in no event shall the barrier be less than 8 feet in length. If the bottom of the barrier is more than 12 feet above the ground line, it shall not be less than 6 feet in length.”

Table 13. GO 95, Rule 51.6-B Violations

Location	Violation Description
11	Anticlimb guards are too short. PG&E has revised its standard to bring towers up to the required standards during maintenance activities.

37	No antilimb guard present. There is an existing tag.
50	Antilimb guards are too short. PG&E has revised its standard to bring towers up to the required standards during maintenance activities.
51	No climb guards on the tower. The tower is in an area where pedestrians can access the tower.
56	Antilimb guards are too short. PG&E has revised its standard to bring towers up to the required standards during maintenance activities.
57	Antilimb guards are too short. PG&E has revised its standard to bring towers up to the required standards during maintenance activities.

PG&E Response:

We acknowledge the height of the anti-climb guards at Locations 11, 50, 56, and 57. CAP 126418275 was created to update the standard to reflect GO 95, Rule 51.6-B by our Transmission Line Engineering Standards and Work Methods Department. We published the revised standard for new construction on November 2, 2023, and all existing non-compliant towers will be brought up to the required standard during opportunity maintenance work.

We acknowledge the lack of anti-climb guard Location 37; however, we do not agree that this constitutes a violation of GO 95, Rule 51.6-B. Our QEW identified and documented this issue prior to the CPUC field audit under notification 121498362. The work will be completed based on current prioritization and material availability.

We acknowledge the lack of anti-climb guards at Location 51. Notification 130997708 has been created and will be addressed based on current work prioritization and material availability.

6. GO 95, Rule 61.6-A, states in part:

“All towers shall be equipped with signs designed to warn the public of the danger of climbing same. Additionally, such signs shall include a graphic depiction of the dangers of falling or electrocution associated with climbing the towers. Such signs shall be placed and arranged so that they may be read from the four corners of the tower. Such signs shall be neither less than 8 feet nor more than 20 feet above the ground except where the lowest horizontal member of the tower is more than 20 feet above the ground in which case the sign shall be not more than 30 feet above the ground.”

When a fence or wall is used as a barrier around a tower (Rule 61.6-B), it shall be equipped with signs designed to warn the public of the danger of unauthorized entry. Warning signs shall be installed at every gate and at intervals of not more than 100 feet along each fence or wall that is used as a barrier. When warning signs are installed on barrier fencing or walls, no signs are required to be installed on the tower or structure.”

Table 14. GO 95, Rule 61.6-A Violations

Location	Violation Description

11	There is no warning sign on the tower.
55	No warning signs on the tower. PG&E stated that the work will be bundled with the existing foundation tag.

PG&E Response:

We acknowledge the missing warning sign at Location 11; however, we do not agree that this constitutes a violation of GO 95, Rule 61.6-A. Our QEW identified and documented this issue prior to the CPUC field audit under notification 126236688. The work will be completed based on current prioritization and material availability.

We acknowledge the missing warning sign at Location 55; however, we do not agree that this constitutes a violation of GO 95, Rule 61.6-A. Our QEW identified and documented this issue prior to the CPUC field audit under notification 121611138. The work will be completed based on current prioritization and material availability.

V. Observations

GO 95, Rule 18, Reporting and Resolution of Safety Hazards Discovered by Utilities states in part:

“For purposes of this rule, “Safety Hazard” means a condition that poses a significant threat to human life or property...”

GO 95, Rule 18-A, Resolution of Potential Violations of General Order 95 and Safety Hazards states in part:

“(3) If a company, while performing inspections of its facilities, discovers a Safety Hazard(s) on or near a communications facility or electric facility involving another company, the inspecting company shall notify the other entity of such Safety Hazard(s) no later than ten (10) business days after the discovery.

(4) To the extent a company that has a notification requirement under (2) or (3) above cannot determine the facility owner/operator, it shall contact the pole owner(s) within ten (10) business days if the subject of the notification is a Safety Hazard, or otherwise within a reasonable amount of time not to exceed 180 days after discovery. The notified pole owner(s) shall be responsible for promptly (normally not to exceed five business days) notifying the company owning/operating the facility if the subject of the notification is a Safety Hazard, or otherwise within a reasonable amount of time not to exceed 180 days, after being notified of the potential violation of GO 95.”

During the field inspection, ESRB observed the following third-party safety concerns.

Table 15. Third-party safety concerns

Location	Violation Description

1	Uncovered riser below 8 feet above the ground.
15	Exposed communication risers at base of pole.
16	Buddy pole at the communication level.
16	Exposed communication riser at base of pole.
16	Abandoned guy wire.
17	Exposed communication ground wire.
17	Slack down guy.
19	Exposed ground.
21	Loose riser cover at ground.
27	Pole splitting at connection to a down guy wire. There is an existing tag to replace the pole.
31	Exposed riser at pole base.
35	Exposed riser.
52	Exposed riser.
52	Buried down guy anchor.
52	Anchor guy missing a guy marker.

PG&E Response:

We acknowledge the height of the riser at Location 1. We have created third party notification 130962840 to mitigate this issue.

We acknowledge the exposed communication risers at the base of the pole at Location 15. We have created third party notification 125772987 to mitigate this issue.

We acknowledge with the buddy pole at communication level and exposed communication riser at Location 16. We have created third-party notification 130987184 to mitigate this issue.

We acknowledge with the exposed communication ground wire and slack down guy at Location 17. This structure is scheduled to be replaced on LC 126692881, which will mitigate this issue.

We acknowledge the exposed ground at Location 19. This structure is scheduled to have hardware replaced on LC 125766253, at which time, this issue will be mitigated.

We acknowledge the loose riser cover at Location 21. We have created third-party notification 1309663023, which will mitigate this issue.

We acknowledge pole splitting at connection to a down guy wire at Location 27. This structure is scheduled to be replaced on LC 124210748, which will mitigate this issue.

We acknowledge the exposed riser at the pole base at Location 31. This structure is scheduled to be replaced on LC 124210748, which will mitigate this issue.

We acknowledge the exposed riser at Location 35. We have created third-party notification 130964442, which will mitigate this issue.

We acknowledge the exposed riser, buried down guy anchor, and missing guy marker at Location 52. We have created third-party notification 130964147 which will mitigate these issues.
