Fadi Daye, P.E.
Program and Project Supervisor
Electric Safety and Reliability Branch
Safety and Enforcement Division
California Public Utilities Commission

SUBJECT: Electric Distribution Audit of Glendale Water & Power

Dear Mr. Daye:

Per your request, GWP staff took corrective measures to remedy the violations addressed by the California Public Utilities Commission (CPUC) auditor. Below are GWP comments and attached are the as-builts for the work orders released to the construction to resolve the violations.

GO 95, Rule 18-A1, Maintenance Programs and Resolution of Potential Violations of General Order 95 and Safety Hazards, states in part:

Each company (including electric utilities and communications companies) is responsible for taking appropriate corrective action to remedy potential violations of GO 95 and Safety Hazards posed by its facilities. Upon completion of the corrective action, the company's records shall show, with sufficient detail, the nature of the work, the date, and the identity of persons performing the work. These records shall be preserved by the company for at least ten (10) years.

- GWP did not provide CPUC staff with any records demonstrating that appropriate action was taken upon discovering potential violations or safety hazards.
GWP has a database to keep track of the facility inspection records. In the past four years, GWP had a contractor on board to inspect all the power poles, vaults, pull boxes, streetlights and customer pad within the city, and the records are documented. The inspection report for each facility can be made available to CPUC upon request.

GO 95, Rule 18-B, Maintenance Programs, states in part:

Each company (including electric utilities and communications companies) shall establish and implement an auditable maintenance program for its facilities and lines for the purpose of ensuring that they are in good condition so as to conform to these rules. Each company must describe in its auditable maintenance program the required qualifications for the company representatives who perform inspections and/or who schedule corrective actions. Companies that are subject to GO 165 may maintain procedures for conducting inspections and maintenance activities in compliance with this rule and with GO 165.

The auditable maintenance program must include, at a minimum, records that show the date of the inspection, type of equipment/facility inspected, findings, and a timeline for corrective actions to be taken following the identification of a potential violation of GO 95 or a Safety Hazard on the company's facilities.

- GWP does not have a maintenance program or procedure for its facilities.
GWP has a 3-year contract to inspect the facilities. Currently, all the electrical distribution facilities, including Power poles, pull boxes, vaults, streetlights and customer facilities either are inspected or are scheduled for inspection. The inspection records are available in the database.
In addition, GWP's linemen do visual inspection of the electrical facilities when they are working in an area.

GO 165, Section III-B, Distribution Facilities, Standards for Inspection, states:

Each utility subject to this General Order shall conduct inspections of its distribution facilities, as necessary, to ensure reliable, high-quality, and safe operation, but in no case may the period between inspections (measured in years) exceed the time specified in Table 1.

- GWP did not provide CPUC staff with any records to indicate that GWP performs detailed inspections or patrol inspections for its overhead and underground facilities, as required by the rule. Please see the attached customer pads and distribution facilities inspection report. All the customer facilities have been inspected within the past 3 years.

•

GO 95, Rule 31.2, Inspection of Lines, states in part:

Lines shall be inspected frequently and thoroughly for the purpose of ensuring that they are in good condition so as to conform with these rules. Lines temporarily out of service shall be inspected and maintained in such condition as not to create a hazard.

- GWP did not provide CPUC staff with any records showing that GWP inspects its overhead facilities frequently and thoroughly, as required by the rule.
Please see the attached Pole inspection/Fumigation Report, indicating the poles have been inspected within the past 10 years.

GO 128, Rule 17.2, Inspection, states:

Underground supply Systems shall be inspected by the operator frequently and thoroughly for the purpose of insuring that they are in good condition and in conformance with all applicable requirements these rules.

- GWP did not provide CPUC staff with any records showing that GWP inspects its underground facilities frequently and thoroughly, as required by the rule.
Please see the attached Vault /Pull box inspection report, indicating all the underground facilities have been inspected in the past 3 years.

GO 165, Rule III (C), Record Keeping, states in part:

The utility shall maintain records for (1) at least ten (10) years of patrol and detailed inspection activities, and (2) the life of the pole for intrusive inspection activities. Such records shall be made available to parties or pursuant to Commission rules upon 30 days notice. Commission staff shall be permitted to inspect such records consistent with Public Utilities Code Section 314 (a).

- ESRB staff requested to review records of patrols and detailed inspection activities of overhead and underground facilities for the past 10 years, however, GWP failed to provide such records.

GWP has a database to keep track of the facility inspection records. In the last four years, GWP has had a contractor on board to inspect all the power poles, vaults, pull boxes, streetlights and customer pad within the city, and the records are documented.

In addition, GWP linemen do a drive by patrol from the power poles. GWP is currently working on developing a database to track the records from the drive by patrol.

GO 95, Rule 31.1, Design Construction and Maintenance

Electrical supply and communication systems shall be designed, constructed, and maintained for their intended use, regard being given to the conditions under which they are to be operated, to enable the furnishing of safe, proper, and adequate service.

Facilities on the following poles required maintenance:

- Pole 29135A: the pole tag was damaged.
- Pole 34101A: the "eye" of the GWP down guy anchor was buried.
- Pole 7726A: the "eye" of the GWP down guy anchor was buried.

Project #11877-573 was released on 07/21/25 to address the issues mentioned above, and it was completed on 07/29/25.

The ground molding attached to each of the following poles was damaged:

-6181A -21574A - 30028A -29135A - 30030A

Project #11877-576 to address the issues above, was released on 07/21/25, and it was completed on 07/30/25.

The climbing steps on each of the following poles were damaged:

- 30899A -14499A

Project #11877-579 to address the issues above, was released on 07/24/25, and it was completed on 07/30/25.

The riser cover attached to each of the following poles was abandoned and not removed:

-35189A -30275A

Project #11877-580 to address the issues above, was released on 07/24/25, and it was completed on 08/05/25.

GO 95, Rule 38 – Minimum Clearances of Wires

Table 2, Column C, Case 19 requires a minimum radial clearance of 3 inches between guys and span wires.

Facilities on the following pole did not meet the 3-inch clearance:

Pole 34111A: a GWP down guy wire was touching a third-party communications conductor.

Project #11877-O-574 to address the issues above, was released on 07/24/25, and it was completed on 07/29/25.

GO 95, Rule 51.6 – High Voltage Marking of Poles

Poles which support line conductors of more than 750 volts shall be marked with high voltage signs. This marking shall consist of a single sign showing the words "HIGH VOLTAGE", or pair of signs "HIGH" and "VOLTAGE", not more than six (6) inches in height with letters not less than 3 inches in height. A pair may be stacked to 12 inches. Signs shall be weather- and corrosion-resisting material, with letters cut out and clearly legible.

Glendale, CA 91206-4975
Tel: (818) 548-3924 Fax: (818) 240-4754
www.glendaleca.gov

High voltage signs on the following poles were missing or damaged:

- 33615A	- 14511A	- 30638A
- 35985A	- 14514A	- 30274A
- 33267A	- 14513A	- 30271A
- 16181A	- 30030A	- 32926A
- 16180A	- 33107A	- 32450A
- 16174A	- 22890A	- 29135A
- 33298A	- 22727A	- 18120A
- 16176A	- 29611A	- 17716A
- 30899A	- 23309A	- 17715A
- 33266A	- 21606A	- 17714A
- 30028A	- 22891A	- 17713A
- 14499A	- 29610A	- 17712A
- 14500A	- 30639A	

Project #11877-O-571, #11877-O-575, and #11877-O-578 to address the issues above, were released on 07/24/25, and they were completed on 07/29/25.

GO 95, Rule 54.7-A – Climbing Space

Climbing space shall be maintained from the ground level. Climbing space, measured from center line of pole, shall be provided on one side or in one quadrant of all poles or structures....

Climbing space on the following poles was obstructed by vegetation:

- 30638A	- 17714A	- 34299A
- 18120A	- 32138A	

Project #11877-O-572 to address the issues above, was released on 07/21/25, and it was completed on 08/06/25.

GO 95, Rule 56.9 – Guy Marker (Guy Guard)

A substantial marker of suitable material, including but not limited to metal or plastic, not less than 8 feet in length, shall be securely attached to all anchor guys. Where more than one guy is attached to an anchor rod, only the outermost guy is required to have a marker.

Guy guards for anchor guys on the following poles were missing:

-32926A -7726A

Project #11877-O-577 to address the issues above, was released on 07/24/25, and it was completed on 07/30/25.

www.glendaleca.gov

GO 128, Rule 32.7 – Covers

Manholes, handholes, and subsurface equipment enclosures while not being worked in, shall be securely closed by covers of sufficient strength to sustain such loads as may reasonably be imposed upon them and arrangements shall be such that a tool or appliance shall be required for their opening and cover removal.

The cover for underground vault pullbox 1540 has missing bolts and was not properly secured. Project #11877-O-590 to address the issue above, was released on 08/06/25, and it was completed on 08/07/25.

If you need further information on this report, please contact Catherine Babakhanlou, Senior Electrical Engineer, at (818) 550-4583.

LIGHT ☒

DATE: 8/6/25
PROJECT NO. 11877-U-590

LOCATION Pullbox #1540 (Dana St. N/S 1st PB E/O Allen Ave.)

ORDER ISSUED TO Christopher Duncan

WORK TO BE DONE Per CPUC, the cover for Pullbox#1540 has missing bolts. Please make proper repair
and secure the box Per GO 128 Rule 32.7

GO 128, Rule 32.7, Covers, states in part:

Manholes, handholes, and subsurface equipment enclosures while not being worked in, shall be securely closed by covers of sufficient strength to sustain such loads as may reasonably be imposed upon them and arrangements shall be such that a tool or appliance shall be required for their opening and cover removal.

The cover for underground vault PB1540 has missing bolts and was not properly secured.
