SUBJECT: Electric Distribution Audit of SDG&E Orange County District - No. EA2025-1357

Mr. Daye:

An electric distribution audit/inspection of SDG&E's Orange County Construction and Operation District (conducted by SED Engineer James Miller) was held from July 28, 2025, to August 1, 2025. During the field inspection your staff identified a total of four Communication Infrastructure Providers (CIPs) overhead findings, five SDG&E overhead findings and one SDG&E underground finding.

SDG&E has fully addressed the six SDG&E field findings. The six findings were repaired the same week they were discovered during the audit. SDG&E has sent the appropriate notifications to the third-party responsible for the four Communication Infrastructure Providers (CIPs) overhead findings.

The field inspection findings included one finding that SDG&E had previously identified during SDG&E's latest inspection and had open repair work orders to remediate. D130315 was inspected on 7/11/2025 and repair workorder 'I016 External Corrosion Replace (Severe)' on notification 100027819197 was on file and completed 07/31/2025 during the audit.

SDG&E appreciates the communication and dialogue shared with your engineering team during the audit.

Sincerely,

A handwritten signature in black ink that reads "Stacy Lovell-Garra". The signature is written in a cursive, flowing style.
