Oakland, CA 94612

Dear Mr. Kushner:

The Safety and Enforcement Division (SED) of the California Public Utilities Commission (CPUC) submits the following **Notice of Violation (NOV)** as part of its investigation of an incident occurring on May 20, 2022, at the intersection of Bill Owens Road and Highway 1 in Point Arena, CA. This incident resulted in the Owens Fire, which burned approximately 36 acres, deenergized 40 customers on the Point Arena 1101 Distribution Circuit, and caused over $50,000 in property damage.

SED's investigation of the Owens Fire identified one (1) violation of General Order 95 Rule 18. Attached is a summary of the relevant code section and SED's findings.

Please provide a response to the violation within 30 calendar days. Include PG&E's corrective action plan and all preventative measures taken by PG&E to remedy and prevent the recurrence of such violation. If you have any questions concerning this NOV, please contact Jasdeep Lally at 279-220-6332 or by email at jasdeep.lally@cpuc.ca.gov.

Sincerely,

Nathan Sarina
Program and Project Supervisor

Owens Fire Summary of Violations

General Order 95, Rule 18.B.(1) Maintenance Programs and Resolution of Potential Violations of General Order 95 and Safety Hazards states in part:

> *"Companies shall undertake corrective actions within the time periods stated for each of the priority levels set forth below.*
>
> *Level 1 – An immediate risk of high potential impact to safety or reliability: Take corrective action immediately, either by fully repairing or by temporarily repairing and reclassifying to a lower priority.*
>
> *Level 2 – Any other risk of at least moderate potential impact to safety or reliability: Take corrective action within specified time period (either by fully repair [sic] or by temporarily repairing and reclassifying to Level 3 priority). Time period for corrective action to be determined at the time of identification by a qualified company representative, but not to exceed: (1) six months for potential violations that create a fire risk located in Tier 3 of the High Fire Threat District; (2) 12 months for potential violations that create fire risk located in Tier 2 of the High Fire Threat District; (3) 12 months for potential violations that compromise worker safety; and (4) 36 months for all other Level 2 potential violations.*
>
> *Level 3 – Any risk of low potential impact to safety or reliability: Take corrective action within 60 months subject to the exception specified below.*[1]*"*

Violation 1

WSEB's investigation determined that under PG&E's EC #121690597 a pole was replaced past its due deadline in a Tier 2 High Fire Threat District (HFTD). PG&E first identified the pole as rotten and decayed on July 9, 2021, and the repair was assigned priority E with a required completion date of July 9 2022. GO 95 Rule 18.B.1.a.ii requires that PG&E correct Level 2 safety issues located in a Tier 2 HFTD within 12 months from the time of identification. PG&E provided documentation showing the pole was replaced on June 4, 2025, past its due date of July 9, 2022.

Dear Mr. Sarina:

This letter responds to the July 20, 2026 Notice of Violation (NOV) regarding the CPUC Safety and Enforcement Division's (SED) Wildfire Safety and Enforcement Branch's (WSEB) investigation of the Owens Fire, which occurred on May 20, 2022, near the intersection of Bill Owens Road and Highway 1 in Point Arena.

The NOV alleges one violation of General Order (GO) 95, Rule 18.B.(1):

> **GO 95, Rule 18.B.(1), Maintenance Programs and Resolution of Potential Violations of GO 95 and Safety Hazards,** states in part:
>
> *"Companies shall undertake corrective actions within the time periods stated for each of the priority levels set forth below.*
>
> *Level 1 – An immediate risk of high potential impact to safety or reliability: Take corrective action immediately, either by fully repairing or by temporarily repairing and reclassifying to a lower priority.*
>
> *Level 2 – Any other risk of at least moderate potential impact to safety or reliability: Take corrective action within specified time period (either by fully repair [sic] or by temporarily repairing and reclassifying to Level 3 priority). Time period for corrective action to be determined at the time of identification by a qualified company representative, but not to exceed: (1) six months for potential violations that create a fire risk located in Tier 3 of the High Fire Threat District; (2) 12 months for potential violations that create fire risk located in Tier 2 of the High Fire Threat District; (3) 12 months for potential violations that compromise worker safety; and (4) 36 months for all other Level 2 potential violations.*
>
> *Level 3 – Any risk of low potential impact to safety or reliability: Take corrective action within 60 months subject to the exception specified below."*

WSEB alleges that we violated GO 95, Rule 18.B.(1) because we did not replace the pole identified in Electric Corrective (EC) Notification 121690597 by its required completion date. We identified the pole for replacement on July 9, 2021, assigned it Priority E with a required completion date of July 9, 2022, and replaced the pole on June 4, 2025.

Background

On May 20, 2022, we received alarms indicating an outage on the Point Arena 1101 12 kV overhead distribution circuit. The first troubleshooter to arrive near the intersection of Highway 1 and Bill Owens Road observed downed conductors, fallen trees, and an active vegetation fire that CAL FIRE was suppressing. Our investigation found that a cluster of three live Bishop Pine trees uprooted at their bases due to wind and struck the primary conductors.

The pole associated with EC Notification 121690597 was not located on the span involved in the Owens Fire, and the condition documented in the EC was unrelated to the cause of the fire.

Our Response

We acknowledge that we did not complete EC Notification 121690597 by its required end date of July 9, 2022.

We note that SED's Electric Safety and Reliability Branch (ESRB) previously included EC Notification 121690597 in Appendix B of a separate NOV issued on January 17, 2025, concerning EC notifications created, pending, or canceled between January 1, 2020, and December 31, 2022. Appendix B to that NOV listed EC notifications that ESRB identified as "Late – Open," reflecting their status as of April 5, 2023. In that separate NOV, ESRB prescribed four corrective actions related to the EC notifications identified in Appendix B and our electric asset maintenance program. Among those corrective actions, ESRB directed us to update Appendix B with the current status, completion date, cancel date, and cancel reason, as applicable, for each listed EC notification and to provide updated Appendix B spreadsheets quarterly until every listed EC notification was completed or canceled.

We submitted an updated Appendix B with our March 11, 2025 response to that separate ESRB NOV and subsequently provided quarterly updates as directed by ESRB. In that response, we acknowledged that most of the EC notifications identified in Appendix B were not completed by the required due dates set forth in GO 95, Rule 18 and addressed each of the corrective actions prescribed by ESRB. We also described actions we are taking to improve our electric asset maintenance program. We incorporate the relevant portions of that response by reference and include it as *"DRU17933_Atch01_PGE Response to TAGs NOV 3-11-25.pdf."*

We created Priority X EC Notification 131309293 on June 3, 2025, to prioritize the pole replacement and completed the replacement under that EC Notification on June 4, 2025. The following day, we canceled EC Notification 121690597 because the work had been completed under the Priority X EC Notification. We first reported the cancellation in our third-quarter 2025 Appendix B update, which reflected EC status as of September 30, 2025. We include the third-quarter 2025 update and the associated Appendix B as Attachments *"DRU17933_Atch02_2025Q3_PGE Compliance Plan Quarterly Update.pdf"* and *"DRU17933_Atch03_NOV Appendix B 2025 Q3.xlsx."*

Please contact the undersigned at [redacted] with any questions regarding this response.

Sincerely,

Daniel Kushner, PhD

March 11, 2025

Mr. Rickey Tse
Program & Project Supervisor
Electric Safety and Reliability Branch
Safety and Enforcement Division
California Public Utilities Commission

CPUC Reference: NOV dated January 17, 2025

Dear Mr. Tse:

This letter is in response to the above referenced Notice of Violation (NOV) dated January 17, 2025 (NOV Letter), regarding the Electric Safety and Reliability Branch (ESRB) review of PG&E's Electric Corrective (EC) Notifications that were created, pending, or canceled between January 1, 2020 to December 31, 2022.

The NOV cites violations of General Order (GO) 95, Rule 18.B, and GO 95, Rule 31.1. The ESRB investigation identified the following violations and directed PG&E to take four corrective actions to address them, as set forth below.

General Order (GO) 95, Rule 18.B, Maintenance Programs states in part:

> *"Companies shall undertake corrective actions within the time periods stated for each of the priority levels set forth below.*
>
> *Scheduling of corrective actions within the time periods below may be based on additional factors, including the following factors, as appropriate:*
> - *Type of facility or equipment;*
> - *Location, including whether the Safety Hazard or potential violation is located in the High Fire-Threat District;*
> - *Accessibility;*
> - *Climate;*
> - *Direct or potential impact on operations, customers, electrical company workers, communications workers, and the general public.*
>
> *(a) The maximum time periods for corrective actions associated with potential violation of GO 95 or a Safety Hazard are based on the following priority levels:*

(i) Level 1 -- An immediate risk of high potential impact to safety or reliability:

- *Take corrective action immediately, either by fully repairing or by temporarily repairing and reclassifying to a lower priority.*

(ii) Level 2 -- Any other risk of at least moderate potential impact to safety or reliability:

- *Take corrective action within specified time period (either by fully repair or by temporarily repairing and reclassifying to Level 3 priority). Time period for corrective action to be determined at the time of identification by a qualified company representative, but not to exceed: (1) six months for potential violations that create a fire risk located in Tier 3 of the High Fire Threat District; (2) 12 months for potential violations that create a fire risk located in Tier 2 of the High Fire Threat District; (3) 12 months for potential violations that compromise worker safety; and (4) 36 months for all other Level 2 potential violations.*

(iii) Level 3 -- Any risk of low potential impact to safety or Reliability:

- *Take corrective action within 60 months subject to the exception specified below. EXCEPTION – Potential violations specified in Appendix J or subsequently approved through Commission processes, including, but not limited to, a Tier 2 Advice Letter under GO 96B, that can be completed at a future time as opportunity-based maintenance. Where an exception has been granted, repair of a potential violation must be completed the next time the company's crew is at the structure to perform tasks at the same or higher work level, i.e., the public, communications, or electric level. The condition's record in the auditable maintenance program must indicate the relevant exception and the date of the corrective action."*

GO 95, Rule 31.1, Design, Construction and Maintenance states in part:

"Electrical supply and communication systems shall be designed, constructed, and maintained for their intended use, regard being given to the conditions under which they are to be operated, to enable the furnishing of safe, proper, and adequate service.

For all particulars not specified in these rules, design, construction, and maintenance should be done in accordance with accepted good practice for the given local conditions known at the time by those responsible for the design, construction, or maintenance of communication or supply lines and equipment.

A supply or communications company is in compliance with this rule if it designs, constructs, and maintains a facility in accordance with the particulars specified in General Order 95,

except that if an intended use or known local conditions require a higher standard than the particulars specified in General Order 95 to enable the furnishing of safe, proper, and adequate service, the company shall follow the higher standard."

Safety and Enforcement Division (SED) reviewed PG&E's EC Notifications (Notifications or Tags) that were created, pending, or canceled between January 1, 2020 to December 31, 2022, and identified 346,084 Notifications that PG&E failed to complete by the required due dates as set forth in GO 95, Rule 18. Of these 346,084 late Notifications, 275,241 were still open. These Late – Open Notifications are included as a spreadsheet in Appendix B. SED further finds PG&E in violation of GO 95, Rule 31.1 for failing to complete its Priority A EC Notifications in accordance with its own defined timeframes set forth in PG&E's Electric Distribution Preventative Maintenance (EDPM) Manual, published on April 1, 2016. SED determined these violations based on the criteria in Appendix A, attached to this Notice of Violation. Appendix B, Open EC Notifications, lists all Notifications identified as "Open" as of April 5, 2023.

SED directs PG&E to take the following corrective actions to address the violations identified in Appendix A:

1. Enter into the spreadsheet (Appendix B) the most recent information for each of the open EC Notifications – the Current Status (open, canceled, or closed), Completion Date, Cancel Date (if applicable), and Cancel Reason (if applicable). The completed spreadsheet shall be provided to SED by February 18, 2025.[1]

2. On a quarterly basis, provide an updated spreadsheet (Appendix B) on each Notification's status. This updated spreadsheet shall be submitted in tandem with PG&E's quarterly Wildfire Safety Inspection Program status updates until every Notification is completed or canceled. In these updates, provide a summary showing the number of completed Notifications since the last update, the number of canceled Notifications since the last update, and the current number of remaining open Notifications.

3. PG&E asserted that work for Priority A Notifications are completed immediately in accordance with GO 95, Rule 18 Level 1 severity timeframes. However, SED identified 511 Late - Open Priority A Notifications and 3,630 Late - Complete Priority A Notifications. PG&E explained that although the actual emergency work may be complete or temporarily repaired, several limitations within its work

[1] SED granted an extension until March 11, 2025, to respond to the entire NOV.

management system prevented the reclassification of the Notifications to a lower priority and caused the appearance that the Priority A Notifications were past due. PG&E stated these limitations also affect Fire Rebuild Notifications. PG&E shall ensure Priority A Notifications in its work management system are either closed once the work is fully repaired or reclassified to a lower priority *by the required due date* if the work is temporarily repaired to avoid confusion. PG&E shall submit by February 18, 2025,[1] the actions it has taken to ensure these limitations with its ability to comply with GO 95, Rule 18 timeframes will not occur going forward.

4. To mitigate risks, PG&E uses a combination of Field Safety Reassessment and its "pending EC review" process to manage and prioritize its backlog of Notifications. However, these processes do not comply with GO 95, Rule 18 because they allow Notifications to exceed their required due dates. Further, SED found nonconformances with these processes that have resulted in Notifications not being reassessed timely and led to equipment failure. SED identified 43,274 Notifications that PG&E failed to reassess timely per its processes. PG&E shall identify actions it has taken to improve its maintenance program to ensure compliance with GO 95, Rule 18.

PG&E's Response to the General Order 95 Violations and Corrective Actions

Introduction

Pacific Gas and Electric Company (PG&E) appreciates the SED's engagement and careful review of our maintenance program activities, including our adherence to GO 95. At the outset, PG&E acknowledges that we have a large distribution maintenance log of lower-risk,[2] Electric Corrective (EC) notifications stemming from our effort to accelerate and expand our inspections of poles and associated distribution equipment in the High Fire Threat District (HFTD) in 2019. We applied the new inspection criteria to the non-HFTD portions of our service area the next year. Since that time, we have been transparent with SED and other regulators regarding the volume of outstanding EC notifications across our system and our work to safely and affordably address them.

Our current efforts to address the outstanding distribution EC notifications in the HFTD are working, but we still have more work to do across the system. Accordingly, in response to this Notice of Violation (NOV), we address the two violations raised by SED. We then provide a brief history of

[2] Lower risk in this context refers to PG&E Priority B, E, F, and H EC notifications.

PG&E's distribution EC notification maintenance log, and our efforts to address it, to provide context regarding this issue. Following the brief history, we address each of the corrective actions prescribed by SED as follows:

- We provide specific details regarding the EC notifications identified by SED in Appendix B that were created, pending, or canceled between January 1, 2020 and December 31, 2022;
- We agree to update SED regarding the status of the 2020-2022 EC notifications identified in Appendix B every quarter;
- We describe the process changes we are implementing to clarify how and when we complete Priority A (Level 1) notifications in compliance with General Order (GO) 95, Rule 18 timelines; and
- We describe in detail the actions we are taking to improve our electric asset maintenance program to ensure future compliance with GO 95, Rule 18.[3]

Response to the Two Alleged Violations of General Order 95

We agree that most of the EC notifications identified in Appendix B of the NOV were not completed by the required due dates set forth in GO 95, Rule 18. In the History section of this NOV response, we describe how/why our distribution EC notification maintenance log began to expand in approximately 2019, and how we have monitored the risk associated with open EC notifications since that time. We then describe the actions we are taking to improve our electric asset maintenance program to ensure future compliance with GO 95, Rule 18 in response to Corrective Action #4.

We respectfully disagree that the NOV establishes that a failure to complete some Priority A EC notifications according to the timeframes in PG&E's Electric Distribution Preventative Maintenance (EDPM) constitutes a violation of GO 95, Rule 31.1. Rule 31.1 states that "[f]or all particulars not specified in these rules, design, construction, and maintenance should be done in accordance with accepted good practice for the given local conditions . . . ." However, the NOV presents no discussion or evidence demonstrating what constitutes "accepted good practice" to support the alleged violation. Moreover, if the alleged violation of GO 95, Rule 31.1 is based on PG&E's failure to meet GO 95, Rule 18 timelines, SED has already separately accounted for that violation, and PG&E should not be

[3] In Corrective Action #4, SED states that nonconformances with PG&E's Field Safety Reassessment (FSR) process "led to equipment failure" without additional details. Based on the limited EC notification information provided, PG&E has not been able to confirm whether the alleged missed FSRs, or overdue EC notifications, are causally linked to specific equipment failures. PG&E welcomes additional information from SED on this concern.

SED also identifies 43,274 EC Notifications that "PG&E failed to reassess timely per its processes." Based on our review of the NOV and Appendix B, we believe many of these EC notifications received timely FSRs under PG&E's policies and procedures. Thus, we interpret this allegation as referring to EC notifications not timely closed pursuant to GO 95, Rule 18 timelines. We also welcome additional information from SED to address this concern.

penalized twice for the same conduct.

While we disagree with the GO 95, Rule 31.1 violation, we agree that we did not always meet the Priority A EC notification deadlines in our procedures. Thus, in response to Corrective Action #3, we describe how we are improving our processes to (1) speed up the documentation of completed Priority A EC notifications, (2) better record application of reasonable circumstances extensions, and (3) close out A Priority and issue lower priority EC notifications once temporary repairs have been made.

History of the Distribution EC Notification Maintenance Log

After a series of catastrophic fires in PG&E's service area in 2017 and 2018, PG&E began the Wildfire Safety Inspection Program (WSIP) in 2019 to expand inspections of poles and associated equipment in the HFTD on an accelerated and enhanced basis to mitigate ignition risk. Enhanced inspections were extended to the non-HFTD starting in 2020. The cadence and details of the inspections exceeded GO 165 requirements and included digitizing photographs and checklists from ground inspections that aligned to failure modes and effects analysis for each structure, associated equipment, and components. By 2021, the checklist for distribution inspections expanded to include 14 unique components across 55 questions/246 possible answers. Through the WSIP, we performed enhanced inspections on approximately 695,000 distribution structures, 50,000 transmission structures, and 200 substations in the HFTD alone.

Our expanded inspections helped us better understand the health of our assets beyond any regulatory requirements, but they also led to a significant increase in the number of EC notifications requiring correction under GO 95, Rule 18 in our maintenance plan. In 2019, we created more than 280,000 non-emergency, EC notifications. This sudden increase in the volume of EC notifications created a large log of repair and replacement maintenance. And while the number of non-emergency EC notifications created each year from 2020-present has not reached 2019 levels, PG&E has generally identified more non-conformances than we have been able to timely close, while also ensuring other critical utility work is performed. Accordingly, we have taken various measures to monitor and address outstanding EC notifications on our distribution system, as described in the Risk Prioritization and Field Safety Reassessment portions of this response, as well as in response to Corrective Action No. 4, below.

To address the growing maintenance log, we have applied a risk-based approach where the likelihood of failure is prioritized. This means that we typically execute Priority A, X & B EC notifications regardless of consequence, followed by Priority E & F EC notifications based on risk or risk spend efficiency. We describe our prioritization methodology in more detail below. For outstanding distribution EC notifications not in our current workplan based on risk prioritization, we monitor potential risk through routine asset patrols designed to identify emergency conditions and detailed asset inspections. During our detailed inspections, we review and validate the conditions recorded in prior EC notifications on those assets as part of our process.

Regulatory Reporting

In August 2019, PG&E began regularly reporting information about our growing EC notification numbers to SED. These WSIP Compliance Plans and Interim Control reports originally identified the number of EC notifications created under WSIP for our Distribution, Transmission, and Substation facilities in HFTD/High Fire Risk Areas (HFRA) locations. Subsequently, however, the reports were updated to include all non-WSIP and non-HFTD EC notifications created beginning in 2019. Starting in Q1 of 2021, we expanded the report to include all open inspection-driven electric equipment repair notifications.

In 2021, PG&E began reporting information relating to EC notifications to the Office of Energy Infrastructure Safety (Energy Safety) in connection with our annual Wildfire Mitigation Plan (WMP). The 2021 WMP Quarterly Data Report tables included requests for the number of distribution and transmission inspection findings every quarter. Starting in 2022, we began including annual WMP targets for EC notifications closures per year in the HFTD/HFRA. These reports, as well as our annual WMPs, are available on PG&E's external website.[4]

In September 2023, we wrote to Executive Director Peterson of the CPUC to request a stay of application of the corrective action timelines in GO 95, Rule 18 for Level 2 and 3 notifications while SED, PG&E, and others discussed adopting a more risk-based approach for remedying corrective actions. In February of 2024, we submitted the stay request to the Safety Policy Division (SPD) of the CPUC via Advice Letter 7167-E. On July 5, 2024, SPD denied the request on procedural grounds, finding that the requested relief was too broad to be considered via an Advice Letter.[5]

Risk Prioritization to Address Outstanding EC Notifications

As indicated above, we manage our distribution EC notification maintenance log by prioritizing the completion of EC notifications that have the highest likelihood of failure and have the highest consequences of failure. Our Priority A, X, and B notifications, which align with GO 95, Rule 18 Level 1 and Level 2 non-conformances regardless of location on our system (HFTD or non-HFTD), must be completed immediately (or temporarily repaired), within seven days, or within six months because they present high or moderate potential impacts to reliability or safety. Thus, Priority A, X, and B EC notifications are not the primary source of the distribution maintenance log. Instead, the maintenance log primarily consists of Priority E and F notifications representing moderate to low potential impacts to safety and reliability that should be addressed between six months and 5 years per GO 95, Rule 18.

In late 2021, we analyzed our outstanding EC notifications across our system and separated them into

[4] See https://www.pge.com/en/outages-and-safety/safety/community-wildfire-safety-program.html#accordion-99016a73ab-item-a5a28b4055.

[5] On July 18, 2024, SPD denied Southern California Edison's similar Advice Letter request (AL-5171-E-A) to be relieved of certain deadlines made in GO 95, Rule 18 on the same procedural grounds.

Ignition Risk and Non-Ignition Risk notifications so that we could focus on work that would produce the greatest ignition risk reduction. In 2022, we developed a Distribution EC notification resource plan for our system using a risk-informed prioritization, which resulted in targeting higher risk, non-pole EC notifications in the HFTD/HFRA.[6]

As described in the 2023-2025 WMP, we are continuing to work down our distribution EC notification maintenance log based on risk prioritization, and we have accelerated the work in the HFTD by bundling and working notifications by isolation zone. Bundling by isolation zone provides us the flexibility to address the most risk first through a risk spend efficiency (RSE) approach and is providing significant savings in execution efficiency. Bundling also reduces the number of customer outages required and improves customer satisfaction. Through bundling and other improvements, our plan is to be in compliance, with no overdue distribution EC notifications in the HFTD, by the end of 2029.

Field Safety Reassessment Process

To monitor risk from outstanding EC notifications, PG&E implemented a process in 2020 to identify changing conditions for open Priority E and F EC notifications by performing Field Safety Reassessments (FSRs) in the HFTD/HFRA. FSRs required an inspector to reassess field conditions of open, time-dependent Priority E and F EC notifications in the HFTD/HFRA to confirm if they required escalation. If an EC notification condition had worsened, it was re-prioritized and scheduled for completion.

While the FSR program helped us to keep eyes on risk, performing an FSR was not intended to extend a Priority E or F notification's required completion date beyond GO 95 Rule 18 timelines. Instead, FSRs were an internal containment activity that we performed to mitigate potential safety impacts. In addition to FSRs, all open EC notifications are reassessed whenever a structure is inspected as part of PG&E's ongoing inspection programs.

As discussed in response to Correction Action #4 below, PG&E transitioned away from FSR to a new open tag validation program called the Comprehensive Pole Inspection (CPI) program in 2024. Like FSR, CPI is an internal containment activity designed to validate levels of risks; it does not change GO 95 Rule 18 timelines. The program includes an aerial inspection on select open EC notifications to identify new GO 95, Rule 18 Level 1 and 2 conditions and validate already identified issues. It also may include intrusive pole testing, when appropriate. Based on our 2023 pilot, we believe the CPI program will better identify assets that are likely to fail where the precursor is a visually-detectable condition.

[6] Our data indicate that pole replacements are less likely to result in an ignition and require a much longer timeline when compared to non-pole replacements and repairs.

PG&E's Response to Corrective Action #1

Attached is an updated Appendix B with the requested EC notification information. Columns J through M of the updated Appendix B reflect the data in our system of record (SAP) as of February 26, 2025. SAP will be updated as developments occur, including as additional tag work and validation is performed and recorded. We have not validated the data pre-populated by SED in columns A-I.[7]

PG&E provides the following clarifications regarding the columns identified below:

- Col. F - PG&E Required End Date: The required end date in SAP reflects the initial tag deadline assigned when the EC Notification was created, calculated based upon the then-assigned tag priority. This date does not reflect subsequent updates to the deadline due to GO 95, Rule 18.B.1(b) extensions or other factors.
- Col. J - Current Status: We are providing data from SAP as of February 26, 2025. Completed notifications may have a status of completed or canceled (e.g., CNCL).
- Col. K - Completion Date: We are providing data identified in SAP as "Notification Reference Date", which reflects the date the work was executed and completed in the field. In SAP, "Completion Date" reflects the date the clerk enters the tag completion data into the system and closes the notification.
- Col. L- Cancel Date (If applicable): We are providing the date the EC notification, as a whole, was canceled.
- Col. M - Cancel Reason (if applicable): When canceling the tag, the clerk selects a single reason code from a drop-down menu; other reasons may be applicable.

In addition, PG&E added the following column:

- Col. N - Duplicate: We identify where a row contains the same EC Corrective Notification that is also contained in a prior row in the list provided by the CPUC.

PG&E's Response to Corrective Action #2

We will provide quarterly updates to the updated Appendix B. Our first update will be provided in mid-May 2025.

PG&E's Response to Corrective Action #3

In our updated Attachment B, provided in response to Corrective Action #1, we have updated the status of the 511 open Priority A notifications, indicating when the work was completed in the field. All 511 Priority A notifications have been closed.

[7] We have identified 66 Priority H Notifications that were inadvertently omitted from the data responses relied upon by SED in developing this NOV. We will separately provide information on these tags to SED.

We agree that SAP does not accurately and timely reflect the status of all overhead distribution emergency work (Priority "A" Notifications), and we are implementing corrective actions to address this issue, as set forth below.

First, there is a lag between the time the overhead distribution emergency work is completed in the field and when that "completed date" is entered in SAP. This occurs because the frontline worker performing the work submits the EC notification completion paperwork to a clerical worker in an office, who then enters the information into SAP. We are developing and implementing measures to reduce that lag, including training and enabling frontline workers to promptly submit the tag completion paperwork and assessing clerical staffing needs. We are assessing the potential to enhance mobile technology as a longer-term solution that could further reduce the lag.

Second, where we have made safe an overhead distribution Priority A notification condition, and have extended the deadline to fully repair due to Rule 18.B.1(b) "reasonable circumstances", we have been inconsistent in documenting the basis for the extension within SAP. Also, we have not consistently explained the application of the extension and provided the updated deadline when responding to regulator inquiries regarding notification closure status. We are developing and implementing new measures to ensure SAP documents the application of the extension and updated deadlines and to provide clear and consistent communications in responses to inquiries.

Third, when we are unable to make full repairs of overhead distribution Priority A Notifications within the timelines set forth in PG&E's standards and procedures, we make the situation safe and perform temporary repairs. To maintain the integrity of our records, and due to technological limitations, we are currently unable to reclassify A notifications to a lower priority. This has caused the appearance that some Priority A Notifications were past due, when in fact temporary repairs had been completed on time. We are developing new measures to close out the A tag and issue a new lower priority EC notification to complete the full repair.

PG&E's Response to Corrective Action #4

As stated above, PG&E's current plans to address the distribution EC notification maintenance log in the HFTD are working. In 2024, we closed over 133,000 distribution HFTD and non-HFTD EC notifications. More than 53,000 of the closed EC notifications were backlog ignition risk notifications in the HFTD/HFRA.[8] In 2023, we also closed over 44,000 backlog HFTD notifications. From 2023-2024, we eliminated over 73% of ignition risk from PG&E's maintenance notification HFTD backlog. We expect to remove more than 77% of the risk from the HFTD backlog by the end of 2025 as stated in our 2023-2025 WMP. Our 2026-2028 WMP will include annual targets to reduce the number of distribution

[8] For purposes of this NOV response, "backlog" refers to EC Notifications identified before January 1st, 2023, and known about prior to January 5th, 2023.

EC notifications in the HFTD/HFRA.[9] Ultimately, our plan is to be in compliance, with no overdue distribution EC notifications in the HFTD, by the end 2029. This plan balances affordability and crew availability with risk reduction. At the same time, we recognize that this plan does not yet address the lower risk distribution EC maintenance log in non-HFTD areas.

Below, we describe the various measures we have taken, or will take, to improve our distribution maintenance program to ensure compliance with GO 95, Rule 18 in the future. We describe our isolation zone bundling and mega-bundling programs. We address the updates we have made to our distribution asset inspection checklists and the establishment of our CPI program. Finally, we discuss our effort to verify/update the information contained in our existing EC notifications to ensure we are efficiently addressing the maintenance log. These programs will help us close the distribution EC notification maintenance log safely and affordably in future years.

Isolation Zone Bundling and Mega-Bundling

In 2024, we used isolation zone bundling in the HFTD to close more distribution EC notifications than we created, including over 50,000 backlog ignition-risk notifications. As discussed in our 2023-2025 WMP, we are bundling EC notifications in the HFTD by isolation zone to maximize the number of notifications completed within a single outage and/or planned day of work.[10] A bundle consists of multiple open notifications within a given isolation zone between two sectionalizing devices. We develop bundles during our annual planning process, and we prioritize bundles based on risk reduction and executability. All notifications within a bundle are planned to be completed together by placing: (1) notifications together in the same time-period for execution; and (2) adding a unique identifier to the notifications displaying the bundle to which they are assigned. The sequencing of the notifications together provides visibility to work support groups to clear dependencies for all notifications in a bundle by the identified plan dates. Additionally, the bundle identifier helps planning and scheduling groups to create more granular construction plans and schedules for the bundles to keep all notifications together.

Our bundled work plans are designed to improve reliability and lower costs. Through notification bundling, we can close more notifications per visit to each work location, which increases efficiency while reducing the impact to customers. Bundling also creates opportunities for financial savings as we close more notifications with fewer crew hours and resources. This can also lead to lower unit costs to complete the planned work.

Given our recent success with isolation zone bundling, we piloted a new mega-bundling circuit project strategy in 2024 to unlock additional maintenance efficiencies. Mega bundling consists of working multiple isolation zones, and the majority of open EC notifications, on a circuit as one project with a

[9] PG&E's final 2026-2028 WMP will be submitted to the Office of Energy Infrastructure Safety on April 4, 2025.

[10] PG&E is also striving for efficiency by working outstanding Priority "E" notifications during system hardening projects rather than as individual projects. These notifications are reclassified as Priority H notifications.

single scope of work. Concentration of work on a circuit allows us to take a "one touch" approach to maintenance work on a circuit for the benefit and safety of our customers and crews. Mega-bundling is designed to: make field inspections and quality control more efficient, simplify invoice processes, and reduce outages, while streamlining field execution and lowering costs.

In our 2024 mega-bundling pilot, we efficiently closed over 8,000 EC notifications in the HFTD/HFRA. We focused our mega-bundling efforts in three divisions: Sierra, Stockton and Yosemite. In this way, we tested the new process in three distinct areas, with support from internal construction and contract partners. By working with system inspections, we removed and reduced scope changes to existing projects. We completed more EC notifications per outage and reduced the number of customer planned outages. Finally, we reduced the unit cost per EC notification closed.

Given the success of our 2024 mega-bundling pilot, we are expanding the program in 2025. Our goal is to address over 16,000 EC notifications in the HFTD/HFRA through the program. This work will supplement the other isolation zone bundling work already included in our 2025 workplan. We will also continue evaluating whether to include our isolation-zone and mega-bundling work into our longer-term, enterprise Integrated Grid Planning initiatives that will holistically look at our electric system needs (including in the non-HFTD) and build a portfolio of solutions to address multiple needs at once.

Distribution Inspection Criteria Updates and Comprehensive Pole Inspections

PG&E's strategy for managing the risk associated with outstanding EC notifications also includes ensuring that the issues being identified and prioritized for maintenance work correspond to conditions that lead to asset failure. In 2024, we simplified our distribution inspection criteria to help our inspectors better identify conditions that lead to failure and/or present safety or reliability concerns. Based on engineering studies and a reassessment of failure modes, we developed more objective criteria tied to failure for use during inspections and tag creation. Our data show that the prior inspection criteria we developed in connection with WSIP identified many conditions that do not routinely lead to equipment failures. Ninety-seven percent of equipment failures come from only eight equipment types: transformers, conductors, crossarms, poles, cutouts, jumpers, insulators, and connectors. Accordingly, we streamlined our inspection checklists to five questions to increase focus on identifying asset conditions that are the most likely to lead to failures. We also significantly increased the number of visual examples for potential asset failures in our job aids to assist inspectors.

In addition to updating inspection criteria to be better aligned with conditions that are indicative of failure, PG&E also transitioned to using primarily aerial inspections in the HFTD in 2024, after several years of pilots. Aerial inspections allow PG&E to identify conditions that are challenging to see from the ground vantage point, such as pole top issues. The aerial program enables PG&E to identify with more certainty the conditions that are correlated to asset failure.

In 2024, PG&E also launched the CPI program to identify escalations on open tags and asset conditions for which maintenance may not be required. We believe that the CPI program is more effective than the

prior FSR program at identifying changes in asset conditions because it includes using a drone to perform an aerial inspection of the asset with an outstanding tag, with a broader objective of identifying all new Level 1 or Level 2 conditions as well as validating previously identified conditions. CPI leverages additional information about the asset that is not available to a ground inspector (or an inspector performing a ground-based FSR). CPI may also involve an intrusive inspection for wood poles with EC notifications, when necessary.

The CPI program is specifically focused on evaluating open EC notifications with conditions most linked to asset failure in the HFTD/HFRA, rather than a wholesale review of every open EC notification in the highest risk areas. With this new program, we have seen higher escalation and cancellation rates for open EC notifications because CPI provides more information on our assets and helps us make more accurate maintenance decisions. At the same time, the transition to reliance on aerial inspection and tag validation methods as well as the improved tag creation criteria gives us greater confidence that the EC notifications already created, as well as those being newly created, will correspond to conditions more directly tied to potential asset failure.

In addition to improving our inspection process and methods, we created a new seven-day, Priority X EC notification and modified the deadlines for our Priority B notifications to better align with GO 95, Rule 18 Level 2 prioritization. These changes have helped us focus on addressing conditions that are more likely to fail soon and/or have high consequences of failure. Priority X notifications identify conditions with high potential impacts to safety or reliability (Level 2) but do not pose an immediate risk. Per PG&E's procedures, Priority X notifications must be addressed within seven days, but they do not require immediate de-energization, employee or contractor standby, or detailed design or dependency reviews. This allows for better coordination for the required work. In addition, we have updated our guidance to require correction of Priority B notifications within six months, rather than three, to better align with Level 2 conditions under GO 95, Rule 18. We began tracking Priority B notifications across the system in greater detail to ensure that these EC notifications are included in our work plans and addressed in compliance with GO 95, Rule 18.

Open EC Notification Review

In 2025, we are continuing to review the status of EC notifications scheduled for work. For HFTD EC notifications in our 2025 workplan, the goal is to perform a desktop review of the notifications to determine if the Facility Damage Actions (FDAs) are still accurate or need to be adjusted (i.e. escalated) in light of subsequent inspections or prior FSRs. We also review whether EC notifications may be closed or cancelled because they have been completed by another program, are duplicative of other existing notifications, or if the identified condition is no longer considered a non-conformance due to updates to our distribution inspection criteria. We expect this initiative will help streamline future EC notification work for our isolation zone and mega-bundling projects.

In addition to this review, we are working to improve our review of completed, emergency EC notifications. Performing a thorough review of completed, emergency EC notifications allows us to

cancel outstanding notifications that may have been addressed as part of the emergency response. For example, a low-priority F EC notification may have been created to replace a high voltage sign on a pole within five years. If the pole is later hit by a vehicle and replaced pursuant to an emergency EC notification, the prior notification to address the high voltage sign may be cancelled as the new pole would be installed with a new high voltage sign. By eliminating these types of EC notifications, we can reduce duplication of efforts and reduce the distribution EC maintenance log.

***

PG&E is committed to closing our distribution EC notification maintenance log. We believe that our current plans focused on reducing the most risk on our system are working, but we continue to look for opportunities to accelerate our progress across the system. We look forward to working with SED to address this issue for the benefit of the customers and communities that we serve. Please do not hesitate to contact me at [redacted] should you have any questions or concerns regarding this response.

Sincerely,

Barry J Bentley

Mr. Rickey Tse
Program and Project Supervisor, SED
California Public Utilities Commission
505 Van Ness Avenue | San Francisco, CA 94102

Mr. Tse:

Attached are PG&E's Compliance Plan Quarterly Update for the third quarter of 2025, "*2025Q3_WSIP PGE Compliance Plan Quarterly Update.pdf*" and our update to Appendix B from the January 17, 2025 Notice of Violation (NOV), "*NOV Appendix B 2025 Q3.xlsx."*

These Quarterly Updates were initially intended to provide the CPUC with our progress on addressing electric equipment maintenance conditions found during PG&E's Wildfire Safety Inspection Program (WSIP), which included accelerated and enhanced inspections conducted in high fire threat areas between December 2018 and October 2019. The scope of these reports was then expanded to include non-WSIP and non-High Fire Threat District (HFTD) electric equipment maintenance conditions, starting January 1, 2019. Non-WSIP/non-HFTD work includes PG&E maintenance activities that were identified through PG&E's original GO 165 and GO 174 inspection programs beginning January 1, 2019. Non-HFTD areas are locations within PG&E's service territory that are not included in the CPUC High Fire-Threat District map. Starting with the 2021 Q1 update, we further expanded reporting to include all open inspection-driven electric equipment repair tags that were created before 2019.

This Quarterly Update includes all open WSIP and inspection driven non-WSIP and non-HFTD repair tags as of September 30, 2025, as well as new tags identified and closed since January 1, 2019.

- As of September 30, 2025, the report shows that:
  - For the electric distribution system, there are a total of 857,258 open tags, of which 803,266 tags were created since January 1, 2019, and 53,992 tags were created pre-January 1, 2019. Since January 1, 2019, PG&E has closed (i.e., repairs have been completed) 819,642 distribution maintenance tags.
  - For the electric transmission system, there are a total of 77,648 open tags, of which 77,642 tags were created since January 1, 2019, and 6 tags were created pre-January 1, 2019. Since January 1, 2019, PG&E has closed (i.e., repairs have been completed) 256,184 transmission maintenance tags.

- For PG&E's substations, there are a total of 10,700 open tags, of which 10,696 tags were created since January 1, 2019, and 4 tags were created pre-January 1, 2019. Since January 1, 2019, PG&E has closed (i.e., repairs have been completed) 96,605 substation maintenance tags.
- In total, there are 945,606 open tags, of which 54,002 were created prior to January 1, 2019. Since January 1, 2019, 1,172,431 tags have been closed.

On January 17, 2025, the Safety and Enforcement Division (SED) of the CPUC issued a Notice of Violation (NOV) to PG&E that alleged violations of GO 95, Rule 18.B, for overdue Electric Corrective (EC) tags created, pending, or cancelled between January 1, 2020 to December 31, 2022. Appendix B attached to the NOV contained a list of 275,241 tags the CPUC identified as late and still open, as of April 5, 2023. In Corrective Action 2, SED directed PG&E to "On a quarterly basis, provide an updated spreadsheet (Appendix B) on each Notification's status. This updated spreadsheet shall be submitted in tandem with PG&E's quarterly Wildfire Safety Inspection Program status updates until every Notification is completed or canceled. In these updates, provide a summary showing the number of completed Notifications since the last update, the number of canceled Notifications since the last update, and the current number of remaining open Notifications."

Our update to Appendix B in compliance with Corrective Action 2 is attached hereto and reflects EC tag status as of September 30, 2025, updated in Column J. Please note that we have added 61 H-tags to the original Appendix B to account for the tags that we inadvertently omitted from our February 28, 2023 Diablo Division Pre-Audit Data Request provided to SED.[1]

We continue to validate our tag reporting methodologies, which could result in changes to the reported data.

Thank you,

Daniel Kushner, PhD

Daniel Kushner, PhD
Senior Director, Electric Risk and Compliance

[1] We originally made SED aware of this fact on April 11, 2025, as a follow-up to the CPUC's March 27, 2025 data request into the Late Tags Investigation NOV (see *DRU15431_Late Tags Investigation_DR_CPUC_D001.pdf)*. Please also note that we have not validated the data pre-populated by SED in Columns A-I, with the exception of the 61 H tags previously mentioned.
