Subject: Audit of Verizon Communications' (Verizon) San Diego County Area

Ms. Murillo:

On behalf of the Electric Safety and Reliability Branch (ESRB) of the California Public Utilities Commission (CPUC), Kyle King of my staff conducted a Communication Infrastructure Provider (CIP) audit of Verizon's San Diego County Area from May 15, 2023 to May 19, 2023. The audit included a review of Verizon's inspection and maintenance records and a field inspection of Verizon's facilities.

During the audit, my staff identified violations of one or more General Orders (GOs). A copy of the audit findings itemizing the violations is enclosed. Please advise me no later than August 28, 2023, by electronic or hard copy, of all corrective measures taken by Verizon to remedy and prevent such violations.

If you have any questions concerning this audit, you can contact Kyle King at (213) 222 – 3260 or Kyle.King@cpuc.ca.gov

### IV. Field Inspection – Violations List

My staff observed the following violations during the field inspection portion of the audit:

### GO 95, Rule 31.1, Design Construction and Maintenance, states in part:

Electrical supply and communication systems shall be designed, constructed, and maintained for their intended use, regard being given to the conditions under which they are to be operated, to enable the furnishing of safe, proper, and adequate service.

Verizon facilities attached to the pole located at 5430 Clairemont Mesa Blvd., San Diego, are still attached to the "old pole" and have not been transferred to the newly installed pole yet.

Risers attached to each of the following poles were damaged:

- Z90074
- P322438
- P127002

### GO 95, Rule 94.4, Clearances, Case B, states:

Antennas and supporting elements below communication lines shall maintain a 2 ft. vertical separation from communication conductors and equipment. (See Figure 94-1)

Antenna signage (which is considered supporting elements) attached on each of the following poles had less than 2 feet vertical separation from communication conductors and equipment.

- P80420-
- P282742

GO 95, Rule 38, Table 2, Case 19, Column D requires the minimum radial separation between secondary conductors of 0-750 Volts (including service drops) and guy wires attached to the same pole to be 3 inches.

An SDG&E secondary conductor attached to pole number P80420 was touching a Verizon down guy wire attached to the same pole.
