

**R.15-01-008 Natural Gas Leak Abatement  
Technical Working Group Meeting Agenda**

**Purpose:**

As required in [Resolution G-3595](#), this working group meeting will address concerns about rising rate pressure and how to best achieve the dual priorities of achieving maximum methane reductions and cost-effectiveness.

**Workshop Questions for Discussion:**

1. What are the challenges of determining the cost effectiveness of measures? Including:
  - a. Quantification of the social cost of methane
  - b. Quantification of other benefits, such as safety
2. What are the challenges of improving the cost effectiveness of measures?
3. What are appropriate cost effectiveness goals for the measures? Is a breakeven cost effectiveness a reasonable expectation?
4. Are the current compliance plan format and emissions reporting templates achieving the right level of reporting on cost effectiveness and reduction measures? Are there any suggested improvements?

**Agenda:**

PARTICIPANTS	TOPIC	TIME
CPUC	Agenda Review and Introductions	10:00-10:10am
CPUC	Overview of Workshop Questions	10:10-10:20am
All Participants	Question #1	10:20-10:40am
All Participants	Question #2	10:40-11:00am
All Participants	Question #3	11:00-11:20am
All Participants	Question #4	11:20-11:40am
All Participants	General Discussion	11:40am-12:00pm
-	Lunch	12:00-1:00pm
Sempra	Safety Component to Cost Effectiveness	1:00-1:20pm
All Participants	Discussion of Sempra Presentation	1:20-1:40pm
All Participants	General Discussion	1:40-2:00pm
CPUC	Closing Thoughts and Next Steps	2:00-2:15pm
