

Agenda For R.24-10-005 Workshop 4

Tuesday 8/26/2025 (9am-3pm)

1. Discuss Rule Changes proposed to Rule 12, Rule 44.1 and Rule 44.3 from [General Order \(GO\) 95](#).
2. Discuss Appendix F proposed updates pending completion by GO 95 Rules Committee to incorporate Load and Resistance Factor Design (LRFD).
3. Discussion on Appendix F and how to edit the proposed Table F-1 (Table 4) to accommodate GO 176.
4. Discussion on examples of the proposed versions of Rules 12, 44.3 and 48 that were presented in Workshop 3 as well as if/how the example should be referenced.
5. Explicit discussion on if the workshops have addressed each of the three [scoping questions](#) which include:
 1. Whether the Commission should revise GO 95 to replace the Working Stress Design methodology with the LRFD methodology.
 2. If the LRFD methodology is adopted, what related revisions in GO 95 should be made to incorporate LRFD methodology for seamless use? This may include defining load factors and strength factors to replace the existing safety factors associated with the Working Stress Design methodology.
 3. Should the Commission create a process, including a framework, testing, or other means, to assess the safety impacts of the LRFD Load and Strength Factors? This may include a statistical framework to compare in-field performance against theoretical, statistically targeted, safety performance of the Load and Strength Factors.
6. Discussion on clean draft of rules pending completion by GO-95 Rules Committee. This could include non-substantive updates such as incorporation of the new tables into the list of tables, or adjustment of the naming of proposed Associated Rule Changes previously submitted to avoid two proposed Associated Rule Changes which are both named "ARC 1."

Wednesday 8/27/2025 (9am-3pm)

1. Continued discussion on Rule 12, Rule 44.1 and Rule 44.3
2. Continued discussion on Appendix F, including relation to GO 176
3. Continued discussion on examples of the proposed versions of Rule 12, 44.3 and 48
4. Continued discussion on scoping questions.
5. Continued discussion on clean draft of rules.

Lunch will be from 12-1pm.

Thursday 8/28/2025 (9am-3pm)

1. Discussion on next workshop steps, including if future workshops are required.
2. Review rule changes discussed on Tuesday and Wednesday, and re-open discussion on the other topics discussed. Goal is to take a second look at the proposed changes after Parties have had a chance to do an internal review after Tuesday and Wednesday workshops.
2. Non-binding party straw poll on each rule change discussed on Tuesday and Wednesday. If it's determined that this is the final workshop, discussion will be focused on how final votes will be tallied. If this is a final vote, voting will occur on each of the three scoping questions.

Lunch will be from 12-1pm.

For Reference: Original Proposed and Associated Rule Changes

These two documents are the proposed and associated rule changes originally submitted by SCE and developed by the GO 95 Rules Committee which have been the starting point for workshop discussion:

[Petition \(see Appendix A\)](#)

[Rules proposed in SCE's Reply Comments \(see Attachment A\)](#)
