

Agenda For R.24-10-005 Workshop 5

Wednesday 10/1/2025 (9am-3pm)

1. Discuss clean versions of proposed Rule Changes and workshop examples to be attached to workshop report
2. Briefing from Workshop Report Writing Committee on the workshop report writing process
3. Straw Poll on proposed Rule Changes, workshop examples to be attached to workshop report and scoping questions from the scoping memo:
 1. Whether the Commission should revise GO 95 to replace the Working Stress Design methodology with the LRFD methodology.
 2. If the LRFD methodology is adopted, what related revisions in GO 95 should be made to incorporate LRFD methodology for seamless use? This may include defining load factors and strength factors to replace the existing safety factors associated with the Working Stress Design methodology.
 3. Should the Commission create a process, including a framework, testing, or other means, to assess the safety impacts of the LRFD Load and Strength Factors? This may include a statistical framework to compare in-field performance against theoretical, statistically targeted, safety performance of the Load and Strength Factors.

Note: Scoping questions may be re-framed to so they can be answered via the Straw Poll polling format.

Lunch will be from 12-1pm.

For Reference: Original Proposed and Associated Rule Changes

These two documents are the proposed and associated rule changes originally submitted by SCE and developed by the GO 95 Rules Committee which have been the starting point for workshop discussion:

[Petition \(see Appendix A\)](#)

[Rules proposed in SCE's Reply Comments \(see Attachment A\)](#)
