- Conference call-in number: 1-855-282- 6330
- Participant PASSCODE: 2482 238 5856

Purpose:

The first half of Workshop #6 will primarily address Phase 3 Scoping Memo issue (c)(2), namely: is additional Commission guidance needed regarding modeling of low probability, high risk events more generally in the RDF and in Risk Assessment and Mitigation Phase (RAMP) filings? As such, presentations and discussions in this area will focus primarily on non-wildfire risks, which were not fully discussed during Workshop #2.

The second half of Workshop #6 will discuss the use of tranches within RAMP and GRC filings for both test years and post-test years. The risk reduction from mitigations and the cost-benefit ratio of a mitigation are required to be reported at the tranche level to provide decisionmakers with a granular view of how investments in mitigations will reduce risk. The workshop will focus on the possible need for additional Commission guidance in the RDF regarding the granularity of tranches.

Expected Outcome:

Workshop attendees will provide feedback on the benefits, costs, and any additional revisions related to whether the Commission should provide guidance regarding tail risk for non-wildfire risks and whether the Commission should provide additional guidance with respect to the granularity of tranches.
