- Conference call-in number: 1-855-282- 6330
- Participant PASSCODE: 2490 795 2456

### Purpose:

The purpose of Workshop #3 is to review the proposed structure of the Risk Mitigation Accountability Report (RMAR) process. The RMAR process should enable regulators, intervenors, and other parties to determine how effectively the utilities are executing their mitigation plans. The RMAR process provides a structured way to hold utilities accountable for the forecasted risk reduction benefits and costs they present to the Commission in Risk Assessment Mitigation Phase and General Rate Case applications to justify investments in mitigations. Discussion in Workshop #3 will include how in the context of RMAR the utilities would address changes to risk models, methodologies for attributing actual risk reduction as well as a proposed enforcement framework for holding the utilities accountable for infractions.

### Expected Outcome:

Workshop attendees will provide feedback on the benefits, costs, and any additional revisions related to the RMAR process.
