

Agenda: Address questions pertaining to SDG&E's EII Risk and SDG&E's/SoCalGas' Cybersecurity Risk

- Thursday, September 9 (1:00 3:00): SDG&E EII and Joint utilities Cybersecurity.
 - Please note: Discussion on the Cybersecurity risk will be limited to overviewing the nonconfidential data in the supplemental workpapers (provided to parties on July 27) and to answering specific questions submitted at least ten days in advance of this workshop to the extent the answers can be provided using public and non-restricted information and data.

TURN:

- Request a workshop to discuss Electric Infrastructure Integrity and Cybersecurity.
- Overview the workpapers and discuss how the RSE values are calculated, including the data points and data sources.
- Does not object to relatively short presentations by the Sempra Utilities about these risks and their mitigations to provide context for the discussions.
- Requests that most of the workshop time be reserved for SPD and party questions.
