RE: PacifiCorp's (U-901-E) Revised Annual Report on Physical Security of Pacific Power Electric Facilities (R.15-06-009/D. 19-01-018)

PacifiCorp, d/b/a Pacific Power hereby submits a revised Annual Physical Security report covering the reporting period of April 1, 2019 to March 31, 2020. This revised version corrects Attachment A filed on March 31, 2020, which inadvertently referenced an incident as having an impact on California assets; this incident did not impact any California assets and should not have been included in the physical security report. The report includes any reported physical incidents that resulted in a utility infrastructure claim in California, the methodology used to identify these incidents, and a summary of any OE-417 reports impacting California assets submitted to the United States Department of Energy (U.S. DOE) in Attachment A.

This initial report meets the reporting requirements identified in Ordering Paragraph 31 of D. 19-01-018. Future reports will meet the reporting requirement introduced in SB 699 in Pub. Util. Code § 364 (b) now located in § 590, covering any significant changes to the Security Plan Reports.

It is respectfully requested that all formal correspondence and Staff requests regarding this report be addressed to the following:

By E-mail (preferred): datarequest@pacificcorp.com

By regular mail: Data Request Response Center

Physical Security of Electric Facilities Annual Physical Security Report

D. 19-01-018 under R. 15-06-009

PacifiCorp Physical Security Incident Insurance Claims
 April 1, 2019 - March 31, 2020

Company	Location Name	Location address	Incident Date	Incident Type	Impact	Property Damage Amount
No Physical Security Incidents Reported to Insurance Carriers for the Period April 1, 2019 through March 31, 2020						

METHODOLOGY:

Claim notifications to insurers are made in compliance with internal policy notification obligations. Insurers are notified of claims when property damage at insured sites is likely to exceed half of the retention. PacifiCorp reviewed records and determined that no physical security incidents were reported regarding physical substation locations to insurance carriers for the Period April 1, 2019 through March 31, 2020. This would indicate that no physical security incidents occurred specifically at PacifiCorp owned substations between April 1, 2019 and March 31, 2020 where the property damage was likely to exceed half of the company's insurance retention value.

Physical Security of Electric Facilities Annual Physical Security Report

D. 19-01-018 under R. 15-06-009

PacifiCorp's CA OE-417 Summary - *Revised 4/15/2020*

4/1/2019 - 3/30/2020

PacifiCorp did not experience any electric disturbance events affecting assets in the state of California between April 1, 2019 and March 30, 2020 that required submission of an OE-417 to the United States Department of Energy (U.S. DOE). Should PacifiCorp experience any electric disturbance events affecting assets in the state of California that require submission of an OE-417 to the United States Department of Energy (U.S. DOE) in the future, the following table will be used to summarize these events in this annual filing.

#	Submitted to DOE		Geographic Area Affected	Asset(s) Impacted	Description of Disturbance	Disturbance Begin		Disturbance End		Estimated Amount of Demand Involved (Peak MW)	Estimated Number of Customers Affected
	Date	Time (PST)				Date	Time (PST)	Date	Time (PST)
