AM = Above Ground Non-Hazardous Minor (akin to grade 3 below ground leak	
N = non-graded or ungraded	).
Above Ground or Below A = above ground	
Ground B = below ground	
Discovery Date	
(MM/DD/YY)	
<b>Repair Date</b> Date that the pipeline repair stopped the leak. Any associated blowdowns res	ulting
(MM/DD/YY) from the repair should be included in the blowdowns tab.	
Scheduled If leak is open, specify the scheduled date of repair, or type "M," signifying that	t the leak
<b>Repair Date</b> is being monitored with no scheduled date of repair.	
(MM/DD/YY) Then, provide the reason for not scheduling a repair in Column for that purpos	e.
Reason for Not Scheduling If not scheduled for repair (e.g. with a "M" for monitoring the leak in Scheduled	d Repair
a Repair Date), then provide the reason for not scheduling a repair.	, nopun
If the leak was discovered by survey in the year of interest, then assume leaking	-
January 1st of subject year thru repair date or December 31st of subject year, w	NNICN
ever is earlier. (E.G. Days Leaking = Repair - Jan 1st + 1 day.)	
Number      of    (For days leaking for leaks carried over use January 1st as start date for emission)	anc.
of (For days leaking for leaks carried over use January 1st as start date for emission Days Leaking calculations.)	/15
For O&M discovered leaks, assume that the leak begins with the discovery dat	e thru
repair date or December 31st of subject year, whichever is earlier.	
Emission Factor	
(Mscf/Day)	
Annual Emissions	
(Mscf)	
Explanatory Notes / Comments	
Tab: All Damages	
Geographic	
Location GIS, zip code, or equivalent	
E = excavation damage	
Type N = natural force damage	
O = other outside force damage	

## DRAFT

Appendix 1	- Rev.	03/30/21
------------	--------	----------

Header column "Comment" boxes displayed below for reference.		
Column Heading	Description and Definition of Required Contents (IF not self-explanatory)	
	PB = cathodically protected steel, bare	
Pipe	PC = cathodically protected steel, coated	
Material	UB = unprotected steel, bare	
	UC = unptotected steel, coated	
Pipe Size		
(nominal)		
Pipe Age		
(months) Pressure		
(psi)	MOP = maximum operating pressure over the past year	
	1 = grade 1	
Leak	2 = grade 2	
Grade	2+ = grade 2+	
	3 = grade 3	
	N = non-graded or ungraded	
	AH = above ground, hazardous	
Above Ground or Below	AN = above ground, non-hazardous	
Ground	B = below ground	
Discovery Date		
(MM/DD/YY)		
Repair Date		
(MM/DD/YY)		
	If date and time stamp are reliable and used consistently by respondent, then	
	emissions may be calculated based on actual time leaking. E.G. Repair time - damage	
	event time = duration of event.	
	If respondent has average or historical leak duration based on the nature and	
Number	circumstances of damages, then these may be applied to like damage events. The	
of	emissions factors should be adequately supported and explained in the filing.	
Days Leaking		
	If actual time stamps and historical averages are not available, then whole days should	
	be used in the engineering calculation. The leak begins with the damage event date	
	thru repair date or December 31st of subject year, whichever is later. E.G. Days Leaking	
	= Repair date - date of damage + 1 day.	
Emission Factor		
(Mscf/Day)		
Annual Emissions		
(Mscf)		
Explanatory Notes /	Provide method of calculation and example of formula.	
Comments	Explain how any EF's used were derived.	
Tab. Diaudauna		
Tab: Blowdowns		
Geographic Location	GIS, zip code, or equivalent	
Number of Blowdown		
Events		
Annual Emissions (Mscf)		
Explanatory Notes /	Provide method of colculation and example of formula	
Comments	Provide method of calculation and example of formula.	
Tab: Component Ven		
Geographic Location	GIS, zip code, or equivalent	
	C = connector	
	O = open-ended line	
Device Type	M = meter	
Device Type	P = pneumatic device	
	PR = pressure relief valve	
	V = valve

Header column "Comment" boxes displayed below for reference.		
Column Heading	Description and Definition of Required Contents (IF not self-explanatory)	
	L = low bleed	
Right Data	I = intermittent bleed	
Bleed Rate	H = high bleed	
	NA = not applicable	
Manufacturer		
	Because the emissions are a factor of design or function, these emissions counted for	
	the entire year.	
	E.G. 365 days times the actual volume emitting if known, or the approved Emissions	
Annual Emissions (Mscf)	Factor.	
Explanatory Notes /		
Comments	Note whether the emissions are based on actual volumetric measures.	
Tab: Component Leal	IS	
ID		
Geographic Location	GIS, zip code, or equivalent	
	C = connector	
	O = open-ended line	
Device Type	M = meter	
Device Type	P = pneumatic device	
	PR = pressure relief valve	
	V = valve	
	L = low bleed	
Blood Bate	I = intermittent bleed	
Bleed Rate	H = high bleed	
	NA = not applicable	
Manufacturer		
	List the actual discovery date	
	List the actual discovery date.	
Discovery Date	If the look was discovered in the year of interest then we will seems the second set	
(MM/DD/YY)	If the leak was discovered in the year of interest, then we will assume the component	
	was leaking from the beginning of the year for emissions reporting purposes, or prior	
	survey date if surveyed previously within the year of interest.	
	Date that the component repair stopped the look. Any associated blowdowns as a	
Repair Date (MM/DD/YY)	Date that the component repair stopped the leak. Any associated blowdowns as a	
	result of the repair should be included in the blowdowns tab.	
Number of Days Leaking	Assume Leaking from January 1 of subject year or prior survey date, whichever is later,	
	thru the repair date (if repaired in year of interest) or December 31 of subject year,	
	whichever is earlier.	
Number of Days Leaking		
	For O&M discovered leaks, assume that the leak begins with the discovery date thru	
	repair date or December 31st of subject year, whichever is earlier.	
Annual Emissions (Mscf)		
Explanatory Notes /		
Comments		
Tab: Odorizers		
ID Coographic		
Geographic Location	GIS, zip code, or equivalent	
Number of Units		
Emission Factor		
(Mscf/yr)		
Annual Emission	All of the emissions from the odorizing process and equipment.	
(Mscf)
