

**Settlement Year 4 – Second Quarter
Progress Report to California Public Utilities Commission
Electric Vehicle Charging Station Project**

*For the period March 6, 2016 through June 5, 2016 (the Reporting Period)
Submitted July 5, 2016 by NRG Energy, Inc. on behalf of the Dynegy Parties¹*

EXECUTIVE SUMMARY

On June 17, 2016, NRG Energy, Inc. (NRG) closed the sale of a controlling interest in NRG EV Services LLC (EVgo) to EV Holdings Investment, Inc., an investment vehicle of Vision Ridge Partners, LLC. NRG retains a significant minority investment in EVgo. NRG retains the legal obligation to meet the terms of the CPUC settlement agreement and will continue to execute its obligations under the Agreement through EVgo. In connection with such sale, NRG EV Services LLC changed its legal name to EVgo Services LLC.

As of June 5, 2016 (the Reporting Date), EVgo had a total of 140 Freedom Station sites either constructed or under development. During the Reporting Period, NRG completed construction on 5 additional Freedom Station installations, for a total of 118 completed sites.

27 out of the 118 Freedom Station sites are located in qualified low-income areas (PUMAs), exceeding the 20% commitment, and serving a broad demographic range at places they prefer to shop, meet and play locally, such as grocery stores, shopping centers and malls.

Freedom Stations are open for any electric vehicle and offer multiple forms of payment, including credit card. All stations support both the CHAdEMO and SAE CCS fast charging standards, and credit card swipe readers have been installed at all sites.

Utilization of the public charging infrastructure continues to increase. 103,582 fast charging sessions were reported in the quarter. Together, these sessions consumed 962,042 kWh of electricity.

Overall, EVgo has 341 Make-Readies Sites under contract, representing 2,911 Make-Ready Stubs. Of these, 2,016 Make-Ready Stubs have been installed at 252 sites.

All Technology Demonstration funds have been allocated, and the three projects are underway.

The proposed project for electric school bus demonstration and job training for disadvantaged school districts was denied by the California Air Resources Board. Thus, EV opportunity access programs are still in development. NRG and EVgo have been working with Greenlining Institute, the National Asian American Coalition, the Shared Use Mobility Center, and other stakeholders to develop a next round of projects. These projects are expected to begin in the coming quarters.

¹ Capitalized terms not otherwise defined herein shall have the meaning ascribed to such terms in the Long-Term Contract Settlement Agreement (the “Agreement”).

ORGANIZATIONAL CHANGES

As noted above, on June 17, 2016, NRG Energy, Inc. (NRG) closed the sale of a controlling interest in NRG EV Services LLC (EVgo) to EV Holdings Investment, Inc., an investment vehicle of Vision Ridge Partners, LLC. NRG retains a significant minority investment in EVgo. NRG retains the legal obligation to meet the terms of the CPUC settlement agreement and will continue to execute its obligations under the Agreement through EVgo. In connection with such sale, NRG EV Services LLC changed its legal name to EVgo Services LLC.

INSTALLATION OF PUBLIC EV CHARGING STATIONS (FREEDOM STATIONS)

As of the Reporting Date, a total of 140 Freedom Station sites were either completed, under construction, or in the permitting process.

The table below summarizes Freedom Station progress throughout the term of the Agreement:

<i>DC Fast Charging Station Progress</i>	Year-End 2013	Year-End 2014	Year-End 2015	2016	2016
				Q1	Q2
Sites with Permits Submitted	22	17	3	8	5
Sites with Permits Approved	3	17	7	5	7
Sites under Construction	5	16	11	8	10
Sites Completed	10	56	105	113	118
Completed Sites w/ SAE Combo		23	105	113	118
Completed Sites w/ working credit card readers		3	105	113	118
Completed sites with credit card readers and SAE combo		2	105	113	118
Cumulative Settlement Target	40	100	160		

Installations

During the Reporting Period, NRG completed construction on 5 additional Freedom Stations, for a total of 118 Freedom Stations. Completed Freedom Stations are listed in Appendix A, with new stations **in bold**.

Site Development

As of the Reporting Date, 10 additional Freedom Station sites were under construction, 7 more were fully permitted and another 5 sites had been submitted for permitting.

Low-Income PUMA Distribution

Twenty-seven of the 118 Freedom Stations are located in low-income PUMAs: 11 in the San Francisco Bay Area, 10 in the Los Angeles Basin, 3 in San Diego County, and 3 in the San Joaquin Valley. They represent 23% of all operational sites, exceeding the goal of 20% in this category.

Assessing Freedom Station distribution by income classification of PUMAs is a device that CPUC and NRG developed for the settlement agreement because no other standards existed at the time. Since then, the Office of Environmental Health Hazard Assessment (OEHHA), on behalf of the California Environmental Protection Agency (CalEPA), developed the California Communities Environmental Health Screening Tool. CalEnviroScreen is a screening methodology that can be used to help identify California communities that are disproportionately burdened by multiple sources of pollution. CalEPA has used the tool to designate California communities as disadvantaged pursuant to Senate Bill 535.

Applying CalEnviroScreen to the Freedom Station distribution for information purposes, as requested by CPUC, shows a slightly lower distribution into these communities than the PUMA communities, but still near the twenty percent requirement, at 18% overall. The results are presented in the table below. NRG and EVgo will continue to assess the distribution by this standard in coming reports to align the state’s environmental justice standards with the settlement infrastructure.

	Operational Sites*	PUMA	CalEnviro Screen
LA	55	10	9
SF	42	11	9
SD	12	3	2
SJV	10	3	2
CA- all	119	23%	18%

**Operational sites are as of the report date. One additional station has been activated since June 5, 2016.*

SAE Combo Rollout Complete

All Freedom Stations support both the SAE combo (CCS) and the CHAdeMo connector standards. This fleet of CCS chargers represents the largest known deployment in the world.

Credit Card Payment Upgrades Complete

All Freedom Stations and all chargers at Freedom Stations are able to accept credit cards via a swipe-card reader. Additional payment mechanisms include RFID cards for EVgo, EZ Charge, BMW ChargeNow, Kia Charge Up. EZ Charge and Kia Charge Up cards are compatible with chargers networked by EVgo, Greenlots, Blink and AeroVironment. BMW ChargeNow cards also access chargers networked by Chargepoint. During the quarter, EVgo also developed the technical capability for chargers to use Pay with Plugshare.

INSTALLATION OF MAKE READY STUBS AND MAKE READY ARRAYS

Status of Make-Readies Sites

Overall, EVgo has 341 Make-Readies Sites under contract, representing 2,911 Make-Ready Stubs. Of these, 2,016 Make-Ready Stubs have been installed at 252 sites, as set forth in Appendix B.

Progress continues to be made in Make-Readies distribution, and the pace of deployment has increased each year since inception. However, given the slow start and current state of the market, it will not be possible to achieve the commitment for 10,000 stubs by 2016, as previously reported. More time and/or additional amendments to the offering will be required.

NRG and EVgo have had success reaching disadvantaged communities with this program. For information purposes, CPUC staff requested an analysis of distribution based on the Cal Enviro Screen (CES) standard, which was not developed at the time the settlement was reached. The distribution is reported in the chart below, and shows that workplace charging has been highly successful with over 26 percent of all sites falling into the CES areas, but multifamily has reached less than 9 percent, suggesting more attention to reaching these communities is justified.

Distribution of Make-Readies by California Enviro-Screen Criteria

	CES Qualified Sites			Percent of total sites			CES Qualified Stubs			Percent of total stubs		
	MDU	WP	All	MDU	WP	All	MDU	WP	All	MDU	WP	All
LA	3	13	16	7.9%	29.6%	19.5%	23	68	91	10.5%	20.4%	16.5%
SF	4	15	19	7.1%	14.6%	17.1%	44	114	158	8.0%	28.9%	16.8%
SD	5	2	7	12.2%	27.8%	11.9%	50	18	68	12.6%	11.3%	12.2%
SJV	0	1	1	0.0%	100.0%	33.3%	0	8	8	0.0%	100.0%	26.7%
Total	12	31	43	8.8%	26.3%	16.9%	117	208	325	9.9%	23.2%	15.6%

Another way to consider distribution to disadvantaged communities for multifamily make-readies is to consider the percentage of properties (and stubs) that have deed-restricted housing units. By this standard, the results look more beneficial. This is due in part to inclusionary housing requirements in many California communities, where mixed-income housing in single properties is a norm. Thus, residents of low-income housing units as measured by the median income in the region have reasonable access to the stubs built in this program.

	Deed Restricted Sites	Percent of total operational MDU sites	Deed Restricted Stubs	Percent of total operational MDU stubs
LA	4	13.33%	38	20.43%
SF	9	23.08%	102	33.44%
SD	9	29.03%	56	18.73%
SJV	0	0.00%	0	0.00%
CA- All	22	22.00%	196	24.81%

Although the February amendment to the settlement facilitated faster deployment of make-readies, the bulk of the increases went to workplaces. Multifamily make-readies have slowed to a trickle. Two factors help explain this. First, last year's outreach campaign brought many new entrants, but was not a sustainable annual expenditure for the program. Second, the new utility programs from SCE and SDG&E and the pending PG&E program have likely had some impact since those programs are better funded and include the EVSE, whereas this program is only for the make-ready installation.

NRG and EVgo have begun to work more closely with industry partners to increase distribution of make-readies. The most significant results to date have been obtained through outreach with SemaConnect, which now has over 456 chargers deployed at EVgo make-ready sites in California, with 78 more on order. In addition, EVgo is providing partners with a referral to ClipperCreek for chargers. EVSE manufacturers are not the only partners in this effort. EV Service Providers (EVSPs) are also partnering. EVgo now has a weekly meeting with EV Connect, has developed solutions with Greenlots, is in discussions with Powertree and Evercharge, and has provided leads to Chargepoint as part of a comprehensive effort to promote multifamily charging across the state.

Nevertheless, multifamily installations were the strongly favored priority for the settlement distribution of make-readies, and new solutions for multifamily are required to achieve its promise.

Pursuant to Section 4(b)(vi)(B) of the Agreement, NRG has established a website which identifies each installed Make-Ready Array's location and Start-Up Period expiration date. See <http://www.nrgvgo.com/california-rev-progress/>.

USAGE DATA

NRG completed 103,582 fast-charging sessions in the first quarter at Freedom Station sites and dispensed over 962,042 kilowatt-hours of electricity.

This translates to over 2.8 million miles driven on electricity in this quarter alone, displacing over 96,000 gallons of gasoline (assuming 30 mpg).

Confidential Appendix C, the original raw usage data for the Reporting Period, will be submitted to the CPUC separately in electronic format.

TECHNOLOGY DEMONSTRATION PROGRAMS

Stationary Storage Plus Electric Charging (SSPEC)

Project Summary

The Stationary Storage Plus Electric Charging (or SSPEC) project will investigate how incorporating stationary batteries with DC Level 3 electric vehicle (EV) charging infrastructure can reduce the cost of developing, constructing, and operating public Fast Chargers without the use of incentives. The project will do this by:

1. Deploying a test site with microgrid components, including battery storage, solar generation, EV charging infrastructure, and control technology.
2. Running a number of tests with various configurations of devices at the SSPEC site.
3. Analyzing results from the SSPEC site and historical data from EVgo's charging station network to identify load profiles, deployment sites, and utility territories which can benefit most from backup batteries and/or generation on site.

Upon successful economic and operational demonstration, NRG intends to commercialize these

technologies and integrate them into its broader Freedom Station rollout. Ultimately, NRG believes that SSPEC will enable faster deployment of DC Fast Chargers by both EVgo and third parties at a wider variety of locations, and for a lower total cost of ownership to property owners and electric vehicle service providers alike.

Previous Quarter Activities

The second quarter of 2016 was focused on integrating all devices of the SSPEC system; these included the battery energy storage system (BESS), automatic load management system (ALMS), solar inverter, site ION meter, and BTC charging stations. All systems have successfully been integrated and are actively communicating through the Kisensum site controller. Currently at the site, the Kisensum controller is dispatching a signal to manage load based on the ION meter reading, leveraging the BESS for demand charge mitigation.

Further development was made in the investigation of alternative BESS, both second life and factory new batteries. Contracts are in the process of negotiation to deploy additional BESS both on campus and within the greater EVgo network. Multiple off-campus sites have been identified for the deployment of these forthcoming systems.

Phase Two of the SSPEC project will be completed in the next quarter, and the full project is expected to conclude a year later, in summer 2017.

Subsequent Quarter Activities

In the next quarter, Q3 of 2016, EVgo will finalize the installation of equipment at the SSPEC site with the BTC split-unit charging station. Data will be evaluated to compare site management with meter-only input, versus active communication with the charging station. EVgo will continue to develop the next generation of BESS integrated with electric vehicle charging infrastructure.

EV Storage Accelerator (EVSA)

Project Summary

The EV Storage Accelerator (EVSA) aims to demonstrate vehicle-to-grid (V2G) technology as a low cost energy storage resource. The project will use nine vehicles for the demonstration, three Honda Accord Plug-in Hybrid electric vehicles (PHEV) and six Nissan LEAF Plug-in electric vehicles (PEV). The four primary goals of EVSA are:

- Create a test environment for two major automakers, Nissan and Honda, to gain experience with V2G technologies and prepare them for a further commitment to the technology,
- Advance product readiness for bidirectional inverters, including listing standards and product certification
- Identify use cases for V2G and test vehicles against those use cases.
- Inform public policy around the system, ratepayer and customer benefits of V2G.

Previous Quarter Activities

Significant progress was made in Q2 of 2016 on the EVSA project. Two use cases were decided upon (Task 2), a) Rule 21 Interconnection of an AC-charge on-board inverter vehicle, and b) collaborating with EPRI on CEC PON 14-310 to demonstrate J3072 and IEEE2030.5 controls on an AC-charge on-board inverter vehicle in order to mitigate the effects of the duck curve. The project also received shipment of all DC CHAdeMO V2G charging stations from Princeton Power System. Three of those have since been permitted and installed on campus.

EVgo continues to facilitate the Vehicle-Grid Integration Network Stakeholders Call. A LinkedIn group has been created to share information amongst participants:
<https://www.linkedin.com/groups/7045248>

The EVSA project is expected to be completed during summer 2018.

Subsequent Quarter Activities

Building off of the progress made in Q1 2016, EVgo will permit and install the remaining three DC CHAdeMO V2G Princeton Power charging stations on the UCSD campus. All sites will be commissioned and vehicle procured for the demonstration. UCSD will facilitate driver selection for the program participants.

Extreme High Power DC Charging Station

Project Summary

Automakers are increasing range of EVs by increasing battery capacity in the near future. To maintain a consistent customer/EV driver experience regarding charge duration and SOC (State of Charge) completion percentage, DC EVSE infrastructure must increase the power dispensing. This project is intended to bring auto OEMs, EVSE, and cable manufacturers together to demonstrate and facilitate testing and development of standards and equipment. The project will do the following:

- Deploy first of its kind EVSE infrastructure capable of high power (300 + amps) of VDC power to EVSEs on site
- Test with auto OEMs and EVSE providers to allow for test bed and development of standards

Previous Quarter Activities

In Q2 2016, EVgo - in coordination with auto manufacturers - continues to make progress on developing the high power EVSE infrastructure needed over the next four years (through 2020) and beyond. EVgo has executed services agreements with architecture and engineering firms to create station and infrastructure design elements and layouts for these high power stations. These firms have experience with alternative fueling technologies, station design, and execution of infrastructure nationwide to encourage alternative fueling adoption. EVgo is working closely with the auto manufacturers, EVSE manufacturers, and standard bodies to finalize an EVSE specification that will be utilized to charge the EVs of the future. These standards challenges are being addressed head on through committee involvement in organizations such as NEMA. Technical meetings continue to occur and parties such as California's independently owned

utilities have joined the conversation regarding the connected services and power requirement needs for the future stations.

EV OPPORTUNITY PROJECTS

The proposed project for electric school bus demonstration and job training for disadvantaged school districts was denied by the California Air Resources Board. Thus, EV opportunity access programs are still in development. NRG and EVgo have been working with Greenlining Institute, the National Asian American Coalition, the Shared Use Mobility Center, and other stakeholders to develop a next round of projects. Those projects are expected to begin in the coming quarters.

Appendix A

Freedom Station Table

See attached.

APPENDIX A - Freedom Station Detail**Dated as of: June 5, 2016**

<u>Name</u>	<u>Street Address</u>	<u>City</u>	<u>Completion Date</u>	<u>PUMA</u>
SF Bay Area				
1 Westlake Shopping Center	75 Southgate Ave.	Daly City	6/24/2013	
2 Whole Foods Fremont	3111 Mowry Ave.	Fremont	9/25/2013
