

## **Tickengo Plan on Avoiding Divide between Able and Disabled Communities**

Tickengo will soon allows riders to choose between several class of vehicles:

- Regular (4 doors sedans)
- Large (SUVs, Vans)

In order to improve accessibility for disabled communities, Tickengo plans to create a special class of vehicles adapted to the special needs of people who have disabilities.

People who need this kind of vehicle will be able to simply book it exactly like others do with "Regular-Sized" or "Large" cars. The technology will be the same.

To support this technology, we will start a campaign to find drivers who can offer these types of vehicles.
