SUBJECT: SCE PSPS Post Event Report – November 29 to December 4, 2020

Dear Director Palmer:

Southern California Edison (SCE) respectfully submits the attached report in compliance with the Public Safety Power Shutoff (PSPS) Post Event Reporting requirements regarding its PSPS event that began November 29 and ended December 4, 2020.

This report has been verified by an Officer of SCE in accordance with Rule 1.11 of the Commission's Rules of Practice and Procedure.

Sincerely,

DocuSigned by:

29E9CB7BDB43475...

**Southern California Edison
Public Safety Power Shutoff Protocol (PSPS)
Post-Event Reporting in Compliance with Resolution ESRB-8
and PSPS OIR Phase 1 & 2 Requirements
November 29 to December 4, 2020**

**Submitted to:
California Public Utilities Commission
Director of the Safety and Enforcement Division
December 21, 2020**

Executive Summary

This report provides information related to the Public Safety Power Shutoff (PSPS) event that occurred in SCE's service territory from November 29, 2020, through December 4, 2020. On November 29, 2020, Southern California Edison (SCE) remotely activated¹ an Incident Management Team (IMT) to manage a weather event where a forecasted Santa Ana event with high winds and low relative humidity levels was anticipated to potentially require the use of SCE's Public Safety Power Shutoff (PSPS) protocol, which could impact as many as 272,955 customers during the duration of the event. Customers within Kern, Los Angeles, Ventura, Tulare, Orange, San Bernardino, Riverside, and San Diego counties were originally in scope with a period of concern initially identified from November 29 at 6:00 am to December 5 at 12:00 am. During this event, SCE also de-energized one circuit not originally in scope for this event when unexpected high wind conditions were observed by meteorologists and weather stations in Riverside County. Ultimately, SCE pro-actively de-energized 51,407 customers in areas of Kern, Los Angeles, Orange, San Bernardino, and Ventura counties. Power was restored to all customers impacted by use of PSPS by December 4 at 6:30 pm.

SCE submits this report to demonstrate its compliance with the directives of Resolution ESRB-8 and the California Public Utilities Commission (CPUC or Commission) PSPS Order to Institute Rulemaking (OIR) Phase 1 (D. 19-05-042) and Phase 2 (D.20-05-051) requirements associated with PSPS events. This report explains SCE's decision to call, sustain, and conclude a de-energization event and provides both a summary of the event and the responses to the post-event questions as required by the Commission.

SCE appreciates that PSPS de-energizations pose significant challenges and hardships for its customers and the Public Safety Partners that provide vital services to our communities. SCE recognizes that this is particularly true when the unexpected onset of dangerous weather and fuel conditions requires that SCE take actions quickly and without all of the advance notifications contemplated by the CPUC. SCE's decision to activate its PSPS protocol is based on careful consideration of multiple factors, including forecasted weather, fuel conditions, and impacts to Public Safety Partners and the communities we serve. Because SCE takes seriously its responsibilities and understands the impacts of de-energization events, SCE only uses PSPS de-energization when it believes that there are no other reasonable alternatives to mitigate identified risks to public safety that would result from catastrophic wildfire.

SCE remains committed to continuously improving its processes and welcomes input from its customers, public safety partners, community representatives, and local governments on ways we can work together to enhance the existing processes, improve communication and coordination amongst impacted entities, and minimize the impact of PSPS events on all stakeholders.

¹SCE utilized remote IMT activation due to the impacts of COVID-19.

SCE took the following actions to manage its response during this PSPS event:

1. Activated a Dedicated PSPS IMT to coordinate response operations associated with the potential use of PSPS to maintain public safety. The IMT was activated and operated remotely due to the COVID-19 pandemic.
2. Reached out to the Geographical Coordination Center (GACC)² to coordinate regarding its expectation for fire potential over the course of the potential PSPS event.
3. Provided notifications to Public Safety Partners, critical infrastructure providers, the CPUC, the California Department of Forestry and Fire Protection (CAL FIRE), the California Governor's Office of Emergency Services (Cal OES), and affected SCE customers. Additionally, SCE provided notices to Community-Based Organizations (CBOs), such as Independent Living Centers (ILCs), the American Red Cross, 2-1-1, and Fire Safety Councils.
4. Initiated operating restrictions on impacted circuits, as applicable.
5. Performed field patrols of impacted circuits where possible in preparation for the potential use of the PSPS protocol for de-energization.
6. Activated Community Resource Centers (CRC) and deployed Community Crew Vehicles (CCVs) to impacted communities.
7. Performed live field observations of monitored circuits as required during the period of concern to validate actual weather conditions and the need for the use of PSPS for de-energization.
8. Utilized the Public Safety Power Shutoff protocol to de-energize circuits within High Fire Risk Areas (HFRA) as determined necessary by the Incident Commander based on observed conditions utilizing weather stations and/or live field observations
9. Performed post patrols to verify no damage to de-energized circuits in support of restoration activities.

Event Summary November 29³

November 29th - SCE meteorologists notified SCE's Business Resiliency Duty Manager (BRDM) of a Santa Ana weather system that was forecast to bring elevated fire weather for portions of the SCE territory initially beginning December 2 at 12:00 pm and continuing through December 4 at 6:00 pm. On November 29, SCE contacted the Southern California GACC and sent the CPUC an email at 7:44 pm to communicate the activation of the dedicated Public Safety Power Shutoff Incident Management Team (PSPS IMT). SCE notified public safety partners and critical infrastructure providers at 6:31 pm of the PSPS event forecasted to begin on December 2.

November 30th - SCE held a State Executive call at 3:00 pm, and an OEM County Coordination call at 3:30 pm to communicate the weather forecast, potential customers in scope and answer any questions regarding the event. SCE emailed participants after the daily calls to provide the briefing materials shared. SCE sent notifications to public safety partners at 1:56 pm and 10:50 pm and critical infrastructure providers and customers at 3:15 pm and 9:09 pm with respect to circuits projected to be in scope for the event. SCE also dispatched pre-patrol resources to

² The GACC is the physical location of an interagency, regional operation center for the effective coordination, mobilization, and demobilization of emergency management resources. A coordination center serves federal, state and local wildland fire agencies through logistical coordination of resources throughout the geographic area, and with other geographic areas, as well.

³ The following event summary serves to provide an overview of the event. Additional details regarding specific PSPS requirements are addressed in further detail after this narrative.

begin inspecting circuits in scope for the PSPS event. At that point, updated weather forecasts indicated portions of Kern, Los Angeles, Ventura, Tulare, Orange, San Bernardino, Riverside, and San Diego counties and approximately 206,527 customers in scope for potential de-energization during the period of concern now from December 3rd at 6:00 am through December 5th at 12:00 am.

December 1st - SCE held its daily State Executive call at 3:00 pm, an OEM County Coordination call at 3:30 pm and a Critical Infrastructure call at 4:00 pm to communicate the weather forecast, customers in scope for potential de-energization and to answer any questions regarding the PSPS event. SCE emailed participants after the daily calls to provide the briefing materials shared. SCE sent notifications to public safety partners at 1:28 pm and 9:21 pm and critical infrastructure providers and customers at 2:12 pm and 9:02 pm with respect to circuits projected to be in scope for the event. At that point, updated weather forecasts indicated portions of Kern, Los Angeles, Ventura, Orange, San Bernardino, Riverside, and San Diego counties and approximately 238,143 customers still in scope for potential de-energization during the period of concern now from December 2 at 9:00 pm through December 4th at 3:00 pm.

December 2nd - SCE sent notifications to public safety partners at 5:36 pm and 11:56 pm and critical infrastructure providers and customers at 3:35 pm and 9:27 pm with respect to circuits still projected to be in scope for the potential de-energization event. SCE held its daily State Executive call at 3:00 pm, an OEM County Coordination call at 3:30 pm and a Critical Infrastructure call at 4:00 pm to communicate the weather forecast, customers in scope for potential de-energization, actual customers de-energized and to answer any questions. SCE emailed participants after the daily calls to provide the briefing materials shared. At that point, updated weather forecasts indicated portions of Kern, Los Angeles, Orange, San Bernardino, Riverside, Tulare, San Diego, and Ventura counties and approximately 272,955 customers still in scope for potential de-energization during the period of concern now through December 4th at 12:00 pm.

Additionally, on December 2 at approximately 8:00 am, the PSPS IMT began observing dangerous fire weather conditions on circuits in Los Angeles, Riverside, and Ventura counties and at approximately 8:08 am began de-energizing customers circuits as detailed in the table on the following page. Customers on these impacted circuits had received advance notification of potential de-energization according to the PSPS Guidelines; however, they did not receive imminent notification of de-energization. SCE attempted to provide imminent notification of de-energization to all the impacted circuits; however, due to a communication error between grid operations and customer service, some notifications did not begin until 8:36 am, which was after the de-energization occurred.⁴ SCE also de-energized one circuit not originally forecast to be in scope for this event in Riverside county at 11:06 pm on December 2 due to rapidly escalating wind speeds as detected on SCE's weather station in the area. Customers on this circuit did not receive any prior notification of potential de-energization.

December 3rd - SCE sent notifications to public safety partners at 1:18 am and 6:34 pm. SCE held its daily State Executive call at 3:00 pm, an OEM County Coordination call at 3:30 pm and a

⁴Notification details for all de-energized circuits can be found in Attachment B-Critical Infrastructure and Customer Notifications.

Critical Infrastructure call at 4:00 pm to communicate the weather forecast, customers in scope for de-energization, and to answer any questions. SCE emailed participants after the daily calls to provide the briefing materials shared. At that point, updated weather forecasts indicated portions of Kern, Los Angeles, Orange, San Bernardino, Riverside, Tulare, San Diego, and Ventura counties and approximately 242,971 customers still in scope for potential de-energization during the period of concern through December 4th at 12:00 pm.

Additionally, at approximately 11:00 pm on December 2, the PSPS IMT again began observing dangerous fire weather conditions on circuits in Kern, Los Angeles, Orange, Riverside, San Bernardino, Tulare, and Ventura counties. At approximately 12:01 am on December 3, SCE began de-energizing customers in those areas as detailed in the table below. Customers on these impacted circuits had received advance notification of potential de-energization according to the PSPS Guidelines. SCE attempted to provide imminent notification of de-energization to all impacted circuits; however, due to a communication error between grid operations and customer service, some notifications did not begin until 12:41 am, which was after the de-energization occurred.⁵ The IMT continued to actively monitor weather developments, patrol de-energized circuits for restoration where possible based on subsiding weather conditions, send imminent notice of re-energization and restore circuits as conditions in the field improved.

December 4th – As hazardous weather conditions subsided, SCE continued to send imminent re-energization notifications to public safety partners, critical infrastructure, and customers. SCE performed patrols for circuit restoration on de-energized circuits, ultimately restoring power to all circuits by 6:30 pm.

The following responses address how SCE complied with all applicable PSPS regulatory requirements, including ESRB-8 and the Phase 1 (D. 19-05-042) and Phase 2 (D. 20-05-051) decisions, during this event.

1. The time, place, and duration of the power shutoff event

During this event, de-energization started at 8:08 am on Wednesday, 12/2/20, and continued through Friday, 12/4/20 ending at 6:30 pm. The event impacted portions of Kern, Los Angeles, Orange, Riverside, San Bernardino, and Ventura counties. The table below provides the timeline for de-energization and restoration for all impacted circuits.

Circuit Name	Isolation Device ⁶	De-Energized Date/Military Time	Customers Affected	Re-Energized (1st load) ⁷ Date/Military Time	Re-energized (All Load) Date/Military Time
ENERGY	RAR0490	12/02/20 08:08	46	12/4/2020 13:45	12/4/2020 16:16
SAND CANYON	RAR0191	12/2/2020 12:53	9		12/4/2020 13:55

⁵ Notification details for all de-energized circuits can be found in Attachment B-Critical Infrastructure and Customer Notifications.

⁶ Remote Automatic Redoser (RAR) and Circuit Breaker (CB) denote different types of sectionalizing devices used by SCE

⁷ 1st load identifies if the circuit was re-energized in sections based on pre-patrols and weather conditions impacting the ability to re-energize the entire line simultaneously. All Load identifies when the entire circuit was re-energized.

Additional De-Energizations Not on the Original Period of Concern					
FLAKE	RCS1197-3	12/2/20 23:06	253		12/4/20 12:23 AM

2. The local communities' representatives contacted prior to de-energization, the date on which they were contacted, and whether the areas affected by the de-energization are classified as Zone 1, Tier 2, or Tier 3 as per the definition in General Order 95, Rule 21.2⁹

County	Representatives	Date Contacted	Tier
Kern	County and State public safety and first responder agencies and local governments	11/29	Tier 2/3
Los Angeles	County and State public safety and first responder agencies and local governments	11/29	Tier 2/3
Ventura	County and State public safety and first responder agencies and local governments	11/29	Tier 2/3
Tulare	County and State public safety and first responder agencies and local governments	11/29	Tier 2/3

⁹ See Attachment A Public Safety Partner Notifications for specifics of notifications.

County	Representatives	Date Contacted	Tier
Orange	County and State public safety and first responder agencies and local governments	11/29	Tier 2/3
Riverside	County and State public safety and first responder agencies and local governments	11/29	Tier 2/3
San Bernardino	County and State public safety and first responder agencies and local governments	11/29	Tier 2/3
San Diego	County and State public safety and first responder agencies and local governments	11/29	Tier 2/3

3. If unable to provide customers with notice at least 2 hours prior to the de-energization event, provide an explanation in its report.

On December 2, SCE de-energized one circuit not originally forecast to be in scope for this event in Riverside county at 11:06 pm due to rapidly escalating wind speeds and high Fire Potential Index ratings. This circuit did not receive any prior notification of potential de-energization.

4. Summarize the number and nature of complaints received as the result of the de-energization event and include claims that are filed due to de-energization.

As of the submission of this report, SCE is not aware of any formal complaints that were submitted to the Commission. SCE Consumer Affairs did receive 9 complaints from representatives of affected cities through the CPUC's Consumer Affairs Branch related to this PSPS event as detailed in the following table.

As of the filing of this report, SCE was aware of 168 claims related to this PSPS event: 156 claimed food loss, 4 claimed food loss and property damage, 7 claimed property damage only and 1 claimed voltage damage.

PSPS Event Date	Number of Complaints	Nature of Complaints
11/24	9	<ul style="list-style-type: none"> • Customer upset about PSPS on Thanksgiving • General complaint about PSPS • Upset about multiple PSPS events

Several local jurisdictions expressed concern or sent inquiries related to the use of PSPS during this event and SCE is including the following examples of those interactions here for context. The following is not an exhaustive list of all SCE's interactions with local agencies during this PSPS event.

- Addressed concerns from LA County Supervisor Kathryn Barger, State Senator Shannon Grove (Kern), and Riverside County Supervisor Chuck Washington regarding vulnerable customers within their communities unable to tolerate outages due to medical

conditions.

- Addressed concern raised by Bear Valley Community Service District in Tehachapi regarding potential outage at three of its water wells. The District claimed its system capacity would be depleted after 48 hours, and residents would be without water. SCE had provided back-up generation previously and the District requested SCE to consider this again. SCE ultimately re-energized the circuit the customer was on before back-up generation would be needed.
- Worked with City of Beaumont Assistant City Manager Kristine Day to address concern related to prioritizing re-energization of the Morello circuit, which runs the wastewater treatment plan for the city.
- Worked with CalOES to address concerns from Kern County Office of Emergency Services Director Georgianna Armstrong related to potential impacts to the California Correctional Facility in Tehachapi. After discussions, CalOES agreed to work with the prison to supply backup power as part of a longer-term solution.
- Addressed concern from Tom Miller, Director of the City of Banning's electric utility, by clarifying continued notifications from SCE that were creating confusion with media and city utility staff.
- Worked with AT&T to understand its process for sending PSPS notifications to customers outside of circuits being monitored. SCE will work with AT&T to help it better understand PSPS and provide GIS support to further limit communications to only potentially impacted customers as opposed to all customers.
- Worked with Customer Service to investigate concerns about frequency and content of text notifications in response to customer inquiry. SCE will work with customer on updating preference from zip code to locational notifications to limit amount of notices received.

5. The timeline for power restoration (re-energization), in addition to the steps taken to restore power as required in Resolution ESRB-8.

A PSPS event will continue while dangerous fire weather conditions exist, and the threat of a catastrophic wildfire event remains due to these conditions. When dangerous conditions subside, circuits that are de-energized will be patrolled and inspected to ensure there is no damage before power can be safely restored. Any visual inspection of the power lines typically take place during daylight hours for safety and accuracy. Therefore, patrol and restoration operations may be limited or prolonged during overnight hours. SCE strives to restore all power within 24 hours of de-energization when possible. The timeline for power restoration is detailed in the table below.

Circuit	Isolation Device ¹⁰	Imminent Notification Sent	Circuit Fully Re-Energized

6. For any circuits that require more than 24 hours to restore, the utility shall explain why it was unable to restore each circuit within this timeframe in its post event report.

The Atento, Taiwan, Acosta, and Rustic circuits could not be re-energized within 24 hours because of restricted access due to the Bond fire impact area. Restoration of these circuits was transferred to the SCE Saddleback District for resolution. The Atento circuit was re-energized on December 10 at 5:30 pm, and the Taiwan circuit was re-energized on December 11 at 3:09 pm after clearance was given to the district to patrol the circuits by air and/or ground and complete restoration. The Acosta circuit had a damaged pole and crossarm that burned at the center phase and needed to be replaced. The Acosta circuit was restored on December 4 at 6:30 pm after clearance was given to the district to air patrol the circuit and complete restoration. The Rustic circuit had restricted access due to the Bond Fire and was re-energized on December 6 at 6:56 am after clearance was given to the district to air patrol and complete restoration.

7. Identify the address of each community assistance location during the de-energization and describe the assistance available at each location and give the days and hours that it was open.

The CRC/CCV outreach team provided customer resiliency kits, water, and snacks, signed up customers for alerts and directed customers to programs and services available.

Type	County	City/Community	Day and Time	Address
CRC	Kern	Tehachapi	12/3/20 8 AM – 10 PM 12/4/20 8 AM – 10 PM	Stallion Springs Community Center

Type	County	City/Community	Day and Time	Address

8. Any wind-related damage(s) to SCE's overhead equipment in the areas where power is shutoff.

Crews performed post-patrols on de-energized circuits to ensure they can be safely re-energized, completing repairs before safely restoring power. A summary of all wind-related damage from this PSPS event found during the post-patrol process is below:

Circuit	County	Structure	Damage
TAIWAN	Orange	4319112E, 1810547E	Wind damaged circuit hardware
ANTON	Ventura	1383568E, 4436954E	Wind damaged crossarm and circuit hardware
BALCOM	Ventura	901395E	Wind damaged conductor
DYSART	Riverside	2092722E	Wind damaged crossarm

Circuit	County	Structure	Damage
ENERGY	Ventura	1186927E	Wind damaged transformer lead
ESTEBAN	Ventura	1803859E, 4157938E	Wind damaged conductor
LOCKNER	Riverside	1570494E	Wind damaged conductor
NORTHPARK	San Bernardino	2121599E	Wind damaged pole
TWIN LAKES	Ventura	1365090E, 1662572E	Wind damaged transformer lead and conductor

9. All factors considered by SCE in its decision to shut off power, including wind speed, temperature, humidity, and vegetation moisture in the vicinity of the de-energized circuits

SCE's decision to shut off power is dynamic and was made by considering the following factors during this event:

- National Weather Service-issued watches and warnings for high fire risk areas in our territory.
- Ongoing assessments from our in-house meteorologists using high-resolution weather models, data from SCE weather stations and publicly available weather stations.
- The SCE Fire Potential Index (FPI), a tool that utilizes weather data, fuel conditions, and vegetation moisture content to rate the daily fire potential across our region. SCE uses the following metrics to rate ignition potential -- Low - 11.99, Elevated - 12-14.99 and Extreme - 15 and above
- Wind speeds and trends¹¹, particularly when considered in combination with other local conditions, such as dry vegetation. Wind speed thresholds may also be adjusted based on other factors or circuit condition and design. Wind trends refer to escalating wind speeds that are projected to meet or exceed established wind thresholds, including National Weather Service Wind Advisory levels (defined as 31 mph sustained wind speed and 46 mph gust wind speed) or exceed the top 1% of historical wind speeds in the area.

SCE considered the following factors listed in the table below to inform de-energization decisions:

Circuit Name	Isolation Device ¹²	Weather Station	Wind Sustained	Gust Sustained	Threshold Sustained	FPI Value	Reasons for De-Energization
ENERGY	RAR0490	SCE Santa Susana Pass Rd	16.9	43.8	31/46	13.04	<ul style="list-style-type: none"> • High Wind Trend • Exceeded FPI
SAND CANYON	RAR0191	SCE Magic Mtn Truck Trail	30.6	40.3	31/46	12.11	<ul style="list-style-type: none"> • High Wind Trend • Exceeded FPI
DUKE	RAR0534	SCE Mount Davis	26.9	40.6	30/46	13.04	<ul style="list-style-type: none"> • High Wind Trend • Exceeded FPI

¹¹ SCE defines wind trends as increasing wind speeds that are projected to exceed threshold

¹² Remote Automatic Recloser (RAR) and Circuit Breaker (CB) denote different types of sectionalizing devices used by SCE

10. Evaluation of alternatives to de-energization that were considered, and mitigation measures used to decrease the risk of utility-caused wildfire in the de-energized area and an explanation of how the utility determined that the benefit of de-energization outweighed the potential public safety risks:

SCE sets thresholds based on SCE's risk-informed assessment of the potential for a large or catastrophic wildfire should an ignition occur under the conditions presented. Under such conditions, the harm to life and property resulting from a catastrophic wildfire vastly outweighs the impacts of the de-energization necessary to eliminate the potential of

ignition. Additionally, SCE only uses de-energization when no other alternatives will mitigate this fire risk and to the extent possible, minimizes the impact by limiting the de-energization to the smallest number of customers possible through segmentation of impacted circuits, where possible.

In all PSPS events, SCE uses sectionalizing through remote automatic reclosures (RARs) or remote-controlled switches (RCSs) when available within a reasonable period to isolate and de-energize only the necessary portions of circuits. While avoiding de-energization entirely is not always possible, SCE takes these steps to reduce the impacts of de-energization on the community, considering the impacts of the de-energization on its stakeholders within the overall risk posed by the prevailing weather conditions, its de-energizations thresholds, and the unacceptable public safety risk of catastrophic wildfire ignition.

11. A copy of all notifications, the timing of notifications, the methods of notifications and who made the notifications (the utility or local public safety partners).

A copy of all notifications and the timing of notifications can be found in Attachment A - Public Safety Partner Notifications, Attachment B - Critical Infrastructure and Customer Notifications and Attachment C - PSPS Activation Customer Notification Messaging. All PSPS event notifications to key stakeholders, including Public Safety Partners and customers, are delivered via voice, email, and TTY (telecommunication device for the hearing impaired) formats as per the preference of the recipient. Notifications are offered in multiple languages. All notifications were made by SCE.

12. Number of affected customers broken down by all classifications including residential, medical baseline, commercial/industrial, etc.

A detailed description of the number of affected customers broken down by all classifications including residential, medical baseline, commercial/industrial, etc. is provided in Attachment B-Customer and Critical Infrastructure Notifications.

13. An explanation of the circumstances that resulted in failure to communicate a potential pro-active de-energization event, if any.

On December 2, SCE de-energized one circuit not originally forecast to be in scope for this event in Riverside county at 11:06 pm due to rapidly escalating wind speeds. This circuit did not receive any prior notification of potential de-energization. On December 2 and 3, SCE attempted to provide imminent notification of de-energization to all impacted circuits being de-energized; however, due to communication errors between grid operations and customer service, some notifications did not begin until after de-energization occurred.¹³ Customers on these circuits did receive earlier notices of potential de-energization in accordance with the PSPS Guidelines.

¹³ Notification details for all de-energized circuits can be found in Attachment B-Critical Infrastructure and Customer Notifications.

14. Each electric investor-owned utility shall enumerate and explain the cause of any false communications in its post event reports by citing the sources of changing data.

SCE notes that its PSPS notices before potential de-energization only provide a warning to customers of a possible de-energization event. SCE notices are designed to give customers notice that a de-energization could take place and a time frame within which the event is most likely to occur so that customers can act and prepare. Given the unpredictability of weather on the ground, however, SCE's advance notices do not affirmatively confirm that a circuit *will be* de-energized. In fact, for clarity, SCE does not provide any affirmative confirmation of de-energization in its notifications until an actual de-energization has taken place.

SCE believes this event could be viewed as an example of a false-negative communication for certain circuits and customers since we were unable to provide all of the required advance notices of de-energization to Public Safety Partners, critical infrastructure providers, or customers given the rapid onset of hazardous weather conditions. Additionally, as discussed below, any advance notifications to customers who were not de-energized, although not viewed by SCE as false positives, are being reported here for transparency purposes. SCE provided notice to 272,955 customers of potential de-energization but not all of these customers were de-energized.

15. A description and evaluation of engagement with local and state public safety partners in providing advanced education and outreach during the de-energization event.

Advanced education and outreach of this Public Safety Power Shutoff event was communicated to all impacted counties projected to be in scope, emergency management officials, CalOES, and the Commission before any forecasted weather was scheduled to impact the SCE service territory. Updates were provided throughout the event using the CalOES PSPS Notification Form, daily situational awareness and coordination calls and individual contact with Public Safety Partners in the affected counties.

16. For those customers where positive or affirmative notification was attempted, an accounting of the customers (which tariff and/or access and functional needs population designation), the number of notification attempts made, the timing of attempts, who made the notification attempt (utility or public safety partner) and the number of customers for whom positive notification was achieved.

SCE only tracks critical care customers for positive or affirmative receipt of notification attempts. Notifications are made daily as these customers remain on potentially impacted circuits. There was a total of 1,350 critical care customers impacted, and SCE made positive contact with all of them during this event. A summary of all customer notifications, including medical baseline and critical care customers, can be found in Attachment B- Customer and Critical Infrastructure Notifications.

17. A description of how sectionalizing, i.e., separating loads within a circuit, was considered and implemented and the extent to which it impacted the size and scope of the de-energization event.

There were approximately 272,955 customers predicted to be in scope for de-energization during the entire period of concern for this event across all known circuits. There were an additional 253 customers on the Flake circuit not originally forecast to be in the period of concern that SCE had to ultimately de-energize due to rapidly escalating wind speeds. SCE reduced the total number of customers de-energized to 51,407 customers using weather stations and switching playbooks that identified appropriate sectionalizing devices to limit the scope of the event. These sectionalizing devices include the use of RARs and RCSs on circuits to separate and isolate the de-energization areas, limiting the de-energization impacts as detailed in the table on page 5 of this report. During the process of sectionalizing, 11,600 customers temporarily lost power (for approximately 15 minutes) but SCE does not consider these customers as de-energized due to the fact that this was a short loss of power during switching operations and the customers at issue were only minimally impacted by the PSPS event.

18. Lessons learned from the de-energization events.

This event brought additional complexity and the need to work with neighboring utilities across shared circuits. Though the coordination was successful in safely de-energizing the required infrastructure, focused time and effort on this scenario was required to come up with a defined and coordinated plan, focused on timing of de-energization and re-energization and the identification of specific isolation points to minimize impacts to customers. SCE and PG&E have identified this as an area for improvement at broader level and will work to develop and agree on a documented process for coordination specific to the PSPS program.

19. Any recommended updates to the guidelines adopted in Resolution ESRB-8 and this decision.

SCE notes that its PSPS notices before potential de-energization only provide a warning to customers of a possible de-energization event. SCE notices are designed to give customers notice that a de-energization could take place and a time frame within which the event is most likely to occur so that customers can take action and prepare. Given the unpredictability of weather on the ground, however, SCE's advance notices do not affirmatively confirm that a circuit *will be* de-energized. In fact, for clarity, SCE does not provide any affirmative notifications until an actual de-energization has taken place.

SCE believes that its notices are correct and factual. The definition of false positive is subject to interpretation about which notifications should be included. Impending de-energizations could reasonably be interpreted as notifications of imminent de-energization 1-4 hours before outages. SCE believes, however, that the Commission may be interested in all advance notices of a possible de-energization to such customers. Consequently, to assure transparency and full compliance, SCE will treat all notices where customers are not ultimately de-energized as potential "false positives," see above, within the meaning of the

PSPS guidance. SCE would appreciate any additional Commission clarification or guidance on this issue to assure it is fully compliant.

SCE notes that “false positives” typically refer to decisions made, or actions taken, based on erroneous information. Differences between notifications and actual de-energizations, however, do not stem from incorrect data, but rather from actual ground conditions varying from forecast conditions. This variance is inherent because of the constantly changing nature of emergent weather. SCE hopes that the Commission will take this into consideration when clarifying the definition of false positives going forward.

SCE PSPS Post Event Report
November 29 to December 4, 2020

Officer Verification

I am an officer of the applicant corporation herein and am authorized to make this verification on its behalf. I am informed and believe that the matters stated in the foregoing document are true.

I declare under penalty of perjury that the foregoing is true and correct. Executed this 21st day of December 2020 in Cerritos, California

SCE LNO Notification Template Text: 2020-11-24 PSPS Activation

Liaison Officer (LNO) notifications are sent by circuit and/or county and based on circuits listed on SCE's Monitored Circuit List (MCL). LNO notifications begin 72 hours before the period of concern, when possible. LNO notifications differ from SCE customer notifications in terms of timing, message content, frequency, and audience.

There are seven unique LNO notification templates:

- An **Initial** notification is sent at the start of the incident for each impacted county and includes the activation's first LNO spreadsheet.
- **Update** notifications are sent twice daily with an attached LNO spreadsheet after each weather report/POC generated by Operations.
- **Imminent De-Energization. De-Energization, Imminent Re-Energization, and Re-Energization** notifications are sent, as needed, during PSPS events. No attachments.
- An **Event Concluded** notification is sent at the end of the incident for each county that had a circuit on the MCL letting officials know SCE's IMT is over. Attachment optional.

LNO notifications are sent to the following stakeholder groups. Contacts are either mapped to specific circuits or are included based on their County-level affiliation.

- Local City/County/Tribal Officials
- Public Safety Partners including CalFire and CalOES
- CCA Administrators
- State and Federal Legislative District Offices
- 211 Operators
- Independent Living Centers
- Other stakeholders with longer range emergency planning responsibilities

Initial Notification

Description:

Sent one time per county, starting 72 hours in advance of a possible PSPS event, alerting contacts that our weather specialists forecast potential extreme weather ahead. Includes the LNO POC spreadsheet with information about circuits and locations that could be impacted. Sent to all impacted jurisdictions and other LNO contacts, grouped by County.

Notification Subject Line and Message

Important: SCE Initial Notice for PSPS Event in [COUNTY NAME] on [start POC DATE].

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

Due to projected weather conditions, SCE may need to shut off power (a Public Safety Power Shutoff or PSPS) to electrical circuits in High Fire Risk Areas (HFRA) serving portions of some

cities and/or unincorporated areas in [COUNTY NAME]. SCE is also notifying customers on the affected circuits about the potential shutoff, giving them time to prepare.

SCE has opened its Emergency Operations Center and activated an Incident Management Team to monitor the weather and other conditions in real time. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

Please refer to the attached file for status and periods of concern for specific circuits in your county.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential Public Safety Power Shutoffs. Additional targeted notifications will also be sent, as needed, to provide time-sensitive de-energize or re-energize information. Erratic or sudden onset of hazardous conditions that jeopardize public safety may impact SCE's ability to provide advanced notice to customers. A shutoff could occur sooner than anticipated, additional circuits could be impacted, or conditions could change, resulting in shutoffs no longer being considered for one or more circuits. We will notify you as conditions change.

There also might be weather-related or other unplanned repair outages in the areas designated for potential Public Safety Power Shutoffs. Information on these unplanned outages can be found at [sce.com/outage](https://www.sce.com/outage).

Recommended Language to Share with the Public: SCE may shut off power on one or more circuits in your area. For more information, visit [sce.com/PSPS](https://www.sce.com/PSPS).

Web and Maps

- PDFs of High Fire Risk Area (HFRA) circuit maps and GIS layers may be found, by county, at [sce.com/maps](https://www.sce.com/maps).

- Access information on weather conditions at [sce.com/fireweather](https://www.sce.com/fireweather).
- SCE's post-PSPS reports are available at [sce.com/pmps](https://www.sce.com/pmps).

How to Contact Us

- **First Responders and Emergency Managers: Please DO NOT share this information with the public.**
 - SCE Business Resiliency Team
 - Business Resiliency Duty Manager hotline is **(800) 674-4478**. This is a 24/7 phone line that can be used outside of PSPS events as well as during activations.
 - BusinessResiliencyDutyManager@sce.com. The Business Resiliency Duty Manager mailbox is only monitored during activations.
- **Public Officials: Please DO NOT share this information with the public.**
 - SCE Liaison Officer (LNO)
 - LNO hotline is 800-737-9811. This 24/7 phone line is for use by local government and tribal officials only and it's monitored only during emergency activations.
 - SCELiaisonOfficer@sce.com. The LNO mailbox is for use by local government officials and only monitored during emergencies or PSPS activations.

- **Members of the Public: Please DO share this information with your residents on your website or social media.**
 - 800-611-1911 is for outage-specific Customer Service issues.
 - 800-684-8123 is for all other billing and service inquiries.
 - sce.com/PSPS is the site where customers may learn more about PSPS events in their area.
 - Update customer contact information at sce.com/pspsalerts.

Updated Conditions Notification

Description:

Sent once or twice daily after the Initial Notification to provide updates as the period of concern approaches. Includes the LNO POC spreadsheet with information about circuits and locations that could be/are impacted. Sent to all impacted jurisdictions, grouped by County.

Notification Subject Line and Message:

Important: SCE Update Notice for PSPS Event in [County Name].

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

Please refer to the attached file for UPDATED status and periods of concern for specific circuits in your county.

Due to weather conditions, SCE may need to shut off power (a Public Safety Power Shutoff or PSPS) to electrical circuits in High Fire Risk Areas (HFRA) serving portions of some cities and/or unincorporated areas in [COUNTY NAME]. SCE is also notifying customers on the affected circuits about the potential for shutoff, giving them time to prepare.

SCE's Incident Management Team continues to monitor the weather in real time. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential Public Safety Power Shutoffs. Additional targeted notifications will also be sent, as needed, to provide time-sensitive de-energize or re-energize information. Erratic or sudden onset of hazardous conditions that jeopardize public safety may impact SCE's ability to provide advanced notice to customers. A shutoff could occur sooner than anticipated, additional circuits could be impacted, or conditions could change, resulting in shutoffs no longer being considered for one or more circuits. We will notify you as conditions change.

There also might be weather-related or other unplanned repair outages in the areas designated for potential Public Safety Power Shutoffs. Information on these unplanned outages can be found at sce.com/outage.

Recommended Language to Share with the Public: Weather conditions have changed and we are providing an updated status for all circuits with potential for power shutoff in your area. Check your email for details and visit sce.com/PSPS.

Imminent De-Energize Notification

Description:

Sent 1-4 hours in advance of expected power shut off, when possible, for specific circuit(s). No spreadsheet attachment, all content is on the body of the notification. Sent to all impacted jurisdictions, grouped by County.

Notification Subject Line and Message:

Important: SCE Imminent De-Energize Notice for PSPS Event in [County Name].

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

Due to current weather conditions, SCE may need to shut off power (a Public Safety Power Shutoff or PSPS) in the next 1 to 4 hours to reduce the risk of wildfire ignition through the PSPS

may occur earlier or later depending on actual weather conditions. Areas that may be impacted include:

- **Circuit:** [CIRCUIT name]
- **County:**
- **Segment:**
- **Incorporated City of:**
- **Unincorporated County Area:** [cut and paste from LNO spreadsheet]

Circuit segments may be viewed at [sce.com/psps](https://www.sce.com/psps) and maps downloaded at [sce.com/maps](https://www.sce.com/maps).

This Imminent De-Energization warning expires after four hours. If one or more circuits listed here are de-energized by SCE due to PSPS, a De-Energized notification confirming date and time of the PSPS event will be sent. However, **if this imminent notice expires without de-energization, the listed circuit(s) remain on SCE's monitor list and subject to PSPS.**

SCE's Incident Management Team (IMT) is in place to monitor conditions, coordinate with government agencies, and oversee re-energization once conditions are safe. SCE will provide an update to your agency as conditions change. Erratic or sudden onset of hazardous conditions that jeopardize public safety may impact SCE's ability to provide advanced notice to customers. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential PSPS events for this county. Additional targeted notifications provide alerts with all time-sensitive de-energize or re-energize information.

Recommended Language to Share with the Public: Due to current weather conditions, SCE may shut off the power on specific circuits within the next 1-4 hours. Check your email for details and visit www.sce.com/PSPS.

Web and Maps

De-Energize Notification

Description:

Sent after a PSPS power shut off has occurred for specific circuit(s). No spreadsheet attachment, all content is on the body of the notification. Includes official date/time of de-energization for circuit(s). Sent to all impacted jurisdictions, grouped by County.

Notification Subject Line and Message:

Important: SCE De-Energize Notice for PSPS Event in [COUNTY NAME] at [TIME].

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

Due to weather conditions, SCE conducted a Public Safety Power Shutoff (PSPS) to circuits in your county. Impacted circuits and locations are:

- **Circuit: [CIRCUIT name]**
- **County:**
- **Segment:**
- **Incorporated City of:**
- **Unincorporated County Area: [cut and paste from LNO spreadsheet]**
- **De-Energized Date:**
- **De-Energized Time:**

Circuit segments may be viewed at sce.com/psps and maps downloaded at sce.com/maps.

SCE is also notifying customers on the affected circuits to inform them about the shutoff. SCE understands the inconvenience of shutting off electric service. Safety is SCE's first priority. This Public Safety Power Shutoff (PSPS) action was taken with the safety of our customers and the public in mind, and to maintain the integrity of the electric system for all of our customers.

SCE has an Incident Management Team (IMT) in place to monitor conditions, coordinate with government agencies, and oversee re-energization once conditions are safe.

Power will be restored as weather conditions improve, crews conduct inspections, any necessary repairs have been made, and we determine it is safe to re-energize lines. In most cases, power will be restored within 24 hours from the end of the period of concern for the electrical circuit.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to PSPS, know that SCE crews are working as safely and quickly as possible to restore service. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

Recommended Language to Share with the Public: Due to current weather conditions, SCE has shut off power in your area. Check your email for details and visit www.sce.com/PSPS.

Web and Maps

Imminent Re-Energize Notification

Description:

Sent once inspections are underway and with 1-hour advance notice of expected power restoration, when possible, for specific circuit(s). No spreadsheet attachment, all content is on the body of the notification. Sent to all impacted jurisdictions, grouped by County.

Notification Subject Line and Message:

Important: SCE Imminent Re-Energize Notice for PSPS Event in [COUNTY NAME].

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

SCE crews have completed inspections, made any necessary repairs, and determined it is safe to begin **RE-ENERGIZING** the following circuit(s) or segments of circuit(s):

- **Circuit:** [CIRCUIT name]
- **Segment(s):**
- **County:**
- **Incorporated City of:**
- **Unincorporated County Area:** [cut and paste from LNO spreadsheet or circuit tool]

Circuit segments may be viewed at [sce.com/pmps](https://www.sce.com/pmps) and maps downloaded at [sce.com/maps](https://www.sce.com/maps).

SCE will also begin notifying customers that power will be turned back on. **In most cases, power will be restored within 24 hours from the end of the period of concern for the electrical circuit.** SCE's Incident Management Team will continue to monitor conditions and coordinate with government agencies.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to PSPS, know that SCE crews are working safely and as quickly as possible to restore service. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

Recommended Language to Share with the Public: SCE will begin turning power back on in your area. SCE has inspected its electrical lines and equipment, made any necessary repairs, and determined it is safe to turn on the power. Check your email for details and visit [sce.com/PSPS](https://www.sce.com/PSPS).

Re-Energize Notification

Description:

Sent after a PSPS re-energization has occurred for specific circuit(s). No spreadsheet attachment, all content is on the body of the notification. Includes official date/time of power restoration for circuit(s). Sent to all impacted jurisdictions, grouped by County.

Notification Subject Line and Message:

Important: SCE Re-Energize Notice for PSPS Event in [COUNTY NAME].

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

SCE crews have inspected the lines, made any necessary repairs, and determined it was safe to **RE-ENERGIZE** the following circuit(s):

- **Circuit:**
- **County:**
- **Incorporated City of:**
- **Unincorporated County Area: (cut and paste from LNO Spreadsheet]**
- **Re-Energized Date:**
- **Re-Energized Time:**

SCE is also notifying customers that power has been turned back on. SCE's Incident Management Team will continue to monitor conditions and coordinate with government agencies.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to a PSPS, know that SCE crews are working as safely and quickly as possible to restore service. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential PSPS events for this county. Additional targeted notifications provide alerts with all time-sensitive de-energize or re-energize information.

Recommended Language to Share with the Public: SCE is turning the power back on in your area. We have inspected our electrical lines and equipment, made any necessary repairs, and determined it is safe to turn on the power. Check your email for details and visit [sce.com/PSPS](https://www.sce.com/PSPS).

Event Concluded Notification

Notification Subject Line and Message:

Sent, by county, once all circuits are re-energized* and the event is over for that county. Depending on circumstances, this may be sent with or without an LNO POC attachment. Eventually each county will receive an Event Concluded “all clear” so they know the weather event has passed and all power is up.

*Sometimes (rarely), a circuit may take longer to re-energize such as when we are working in a fire area and crews don't have access. In those cases that circuit may be transitioned to Operations and closed out from a PSPS standpoint. That information is included in the Event Concluded notification, indicating power is not fully restored for that circuit(s).

Notification Subject Line and Message:

Important: SCE Event Concluded Notice for PSPS Event in [COUNTY NAME].

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

SCE's Incident Management Team is standing down and both SCE systems and staff have returned to normal status.

For customers in areas experiencing a weather-related or other unplanned repair outage not related to PSPS, know that SCE crews are working as safely and quickly as possible to restore service. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

Recommended Language to Share with the Public: The power shutoff in your area has concluded. Customers in this area, however, may experience other weather-related or unplanned repair outages not related to the Public Safety Power Shutoff (PSPS). Check your email for details and visit sce.com/PSPS.

How to Contact Us

- **First Responders and Emergency Managers: Please DO NOT share this information with the public.**
 - SCE Business Resiliency Team
 - Business Resiliency Duty Manager hotline is **(800) 674-4478**. This is a 24/7 phone line that can be used outside of PSPS events as well as during activations.
 - BusinessResiliencyDutyManager@sce.com. The Business Resiliency Duty Manager mailbox is only monitored during activations.
- **Public Officials: Please DO NOT share this information with the public.**
 - SCE Liaison Officer (LNO)
 - LNO hotline is 800-737-9811. This 24/7 phone line is for use by local government and tribal officials only and it's monitored only during emergency activations.
 - SCELiaisonOfficer@sce.com. The LNO mailbox is for use by local government officials and only monitored during emergencies or PSPS activations.
- **Members of the Public: Please DO share this information with your residents on your website or social media.**
 - 800-611-1911 is for outage-specific Customer Service issues.
 - 800-684-8123 is for all other billing and service inquiries.
 - [sce.com/PSPS](https://www.sce.com/PSPS) is the site where customers may learn more about PSPS events in their area.
 - Update customer contact information at [sce.com/pspsalerts](https://www.sce.com/pspsalerts).

Notes

PG&E Notification Categories

- Severe Weather Forecasted (up to a week before event)
- PSPS Outage Watch Notifications (two days before, outages likely)
- PSPS Outage Warning Notification (several hours before, outages required)
- Power Shut Off (during severe weather)
- Updates and Inspections (weather has improved, inspections and restorations have begun)
- PSPS Power Restored (within 12 daylight hours after severe weather has passed, power restored to all affected communities)

Avoided/All Clear Notification - Messaging

Voice/ Voice Mail/TTY:

This is an important safety message from Southern California Edison. Due to forecast fire weather conditions, Southern California Edison continues to explore a potential Public Safety Power Shutoff of electrical lines in the ^city_variable^ area. These conditions may result in SCE turning off your power. SCE anticipates that this may occur on ^Day of week^ ^morning/afternoon/evening^ though it may occur earlier or later depending on actual weather conditions. We encourage you to prepare by having an outage plan and emergency kit. SCE will send daily updates until conditions improve. For more information, please visit sce.com/psps. Downed power line? Stay away, call 911, and SCE at 1-800-611-1911.
