San Francisco, CA 94102

**SUBJECT: SCE PSPS Post Event Report – November 14 to November 18, 2020**

Dear Director Palmer:

Southern California Edison (SCE) respectfully submits the attached report in compliance with the Public Safety Power Shutoff (PSPS) Post Event Reporting requirements regarding its PSPS event that began November 14 and ended November 18, 2020.

This report has been verified by an Officer of SCE in accordance with Rule 1.11 of the Commission's Rules of Practice and Procedure.

Sincerely,

DocuSigned by:  
A blue ink signature of Diana S. Gallegos.

**Southern California Edison  
Public Safety Power Shutoff Protocol (PSPS)  
Post-Event Reporting in Compliance with Resolution  
ESRB-8 and PSPS OIR Phase 1 & 2 Requirements  
November 14 to November 18, 2020**

**Submitted to:  
California Public Utilities Commission  
Director of the Safety and Enforcement Division  
December 4, 2020**

## **Executive Summary**

This report provides information related to the Public Safety Power Shutoff (PSPS) event that occurred in SCE's service territory from November 14, 2020 through November 18, 2020. On November 14, 2020, Southern California Edison (SCE) activated an Incident Management Team (IMT)<sup>1</sup> to manage a Santa Ana weather event where SCE meteorologists and the National Weather Service forecasted high winds, low relative humidity levels and increased fire danger conditions anticipated to potentially require the use of SCE's Public Safety Power Shutoff (PSPS) Protocol which could impact as many as 11,964 customers. SCE Customers in Inyo, Mono, San Bernardino, Kern, Los Angeles, Tuolumne, and Ventura counties were originally in scope with a period of concern initially identified as November 17 at 12:00 am to November 18 at 12:00 pm. During this event, SCE also de-energized two circuits in Kern County and one circuit in Los Angeles County not originally identified to be in scope, when unexpected high wind conditions indicating increased fire danger were observed by meteorologists and weather stations on additional circuits in both Kern and Los Angeles County. Ultimately, SCE pro-actively de-energized 517 customers in areas of Inyo, Mono, Kern, and Los Angeles counties. Power was restored to all customers on November 18 by 9:55 pm.

SCE submits this report to demonstrate its compliance with the directives of Resolution ESRB-8 and the California Public Utilities Commission (CPUC or Commission) PSPS Order to Institute Rulemaking (OIR) Phase 1 (Decision (D.) 19-05-042) and Phase 2 (D.20-05-051) requirements associated with PSPS events. This report explains SCE's decision to call, sustain, and conclude a de-energization event and provides both a summary of the event and the responses to the post-event questions as required by the Commission. SCE submits this report to the Director of Safety and Enforcement Division (SED) and the service lists for Rulemaking R. 18-12-005.

SCE appreciates that PSPS de-energizations pose significant challenges and hardships for its customers and the Public Safety Partners that provide vital services to our communities. SCE recognizes that this is particularly true when the unexpected onset of dangerous weather and fuel conditions requires that SCE take actions quickly and without all the advance notifications contemplated by the CPUC. SCE's decision to activate its PSPS protocol is based on careful consideration of multiple factors, including forecasted weather, fuel conditions, and impacts to Public Safety Partners and the communities we serve. Because SCE takes seriously its responsibilities and understands the impacts of de-energization events, SCE only uses PSPS de-energization when it believes that there are no other reasonable alternatives to mitigate identified risks to public safety that would result from catastrophic wildfire.

SCE remains committed to continuously improving its processes and welcomes input from its customers, Public Safety Partners, community representatives, and local governments on ways we can work together to enhance the existing processes, improve communication and coordination amongst impacted entities, and minimize the impact of PSPS events on all stakeholders.

---

<sup>1</sup> SCE utilized remote IMT activation due to the impacts of COVID-19.

SCE took the following actions to manage its response during the PSPS event:

1. Activated a Dedicated PSPS IMT to coordinate response operations associated with the potential use of PSPS to maintain public safety. The IMT was activated and operated remotely due to the COVID-19 pandemic.
2. Reached out to the Geographical Coordination Center (GACC)<sup>2</sup> to coordinate regarding its expectation for fire potential over the course of the PSPS event.
3. Provided notifications to Public Safety Partners, critical infrastructure providers, the CPUC, the California Department of Forestry and Fire Protection (CAL FIRE), the California Governor's Office of Emergency Services (Cal OES), and affected SCE customers. Additionally, SCE provided notices to Community-Based Organizations (CBOs), such as Independent Living Centers (ILCs), the American Red Cross, 2-1-1, and Fire Safety Councils.
4. Initiated operating restrictions on impacted circuits, as applicable.
5. Performed field patrols of impacted circuits where possible in preparation for the potential use of the PSPS protocol for de-energization.
6. Deployed Community Crew Vehicles (CCVs) to impacted communities.
7. Performed live field observations of monitored circuits as required during the period of concern to validate actual weather conditions and the need for the use of PSPS for de-energization.
8. Utilized the Public Safety Power Shutoff protocol to de-energize circuits within High Fire Risk Areas (HFRA) as determined necessary by the Incident Commander based on observed conditions utilizing weather stations and/or live field observations
9. Performed post patrols to verify no damage to de-energized circuits in support of restoration activities.

### **Event Summary November 14 to November 18, 2020<sup>3</sup>**

November 14<sup>th</sup> -- SCE meteorologists notified SCE's Business Resiliency Duty Manager (BRDM) of a weather system that was forecast to bring elevated fire weather for portions of the SCE territory beginning November 17 at 12:00 pm and continuing through November 18 at 12:00 pm. That day, SCE contacted the Southern California Geographical Coordination Center (GACC) and sent the CPUC an email at 12:47 pm to communicate the activation of the dedicated Public Safety Power Shut Off Incident Management Team (PSPS IMT). SCE held a State Executive call at 3:00 pm, and an OEM County Coordination call at 3:30 pm to communicate the weather forecast, potential customers in scope and answer any questions regarding the event.

SCE sent notifications to public safety partners and critical infrastructure providers at 1:40 pm with respect to the circuits projected to be in scope for a potential de-energization. SCE also dispatched pre-patrol resources to begin inspecting identified circuits in scope for the PSPS event. At that point, updated weather forecasts identified circuits in Inyo, Mono, San Bernardino, Kern, and Ventura counties as having circuits that may require the use of PSPS. Approximately 6,388 customers were identified as in scope for this potential event forecast to begin on November 16.

---

<sup>2</sup> The GACC is the physical location of an interagency, regional operation center for the effective coordination, mobilization, and demobilization of emergency management resources. A coordination center serves federal, state and local wildland fire agencies through logistical coordination of resources throughout the geographic area, and with other geographic areas, as well.

<sup>3</sup> The following event summary serves to provide an overview of the event. Additional details regarding specific PSPS requirements are addressed in further detail after this narrative.

November 15<sup>th</sup> -- SCE held its daily State Executive call at 3:00 pm, an OEM County Coordination call at 3:30 pm and a Critical Infrastructure call at 4:00 pm to communicate the weather forecast, customers in scope and answer any questions regarding the event. SCE emailed participants after the daily calls to provide the briefing materials shared. SCE sent notifications to public safety partners, customers, and critical infrastructure providers at 1:05 pm and 8:23 pm with respect to circuits projected to be in scope. At that point, updated weather forecasts indicated circuits in Inyo, Kern, Mono, San Bernardino, Los Angeles, Tuolumne, and Ventura counties, and approximately 7,283 customers potentially in scope for de-energization during the period of concern now from November 16 at 9:00 pm to November 18 at 12:00 pm

November 16<sup>th</sup> -- At approximately 8:45 am, weather services advised of the sudden onset of unexpected fire weather conditions in Kern County. This localized weather system impacted additional circuits in Kern county and resulted in two of these circuits rapidly exceeding wind and FPI thresholds. In response, SCE provided notice of imminent de-energization at 9:07 am and at approximately 9:30 am de-energized the Mettler and Cuddeback circuits in Kern county. SCE provided imminent re-energization notices for the Cuddeback circuit at 4:37 pm and the Mettler circuit at 4:36 pm. The Cuddeback circuit was re-energized at 7:51 pm and the Mettler circuit was re-energized at 7:16 pm. SCE held its daily State Executive call at 3:00 pm, an OEM County Coordination call at 3:30 pm and a Critical Infrastructure call at 4:00 pm to communicate the weather forecast, customers in scope and answer any questions regarding the event. SCE emailed participants after the daily calls to provide the briefing materials shared. SCE sent notifications to public safety partners, customers, and critical infrastructure providers at 12:10 pm. At that point, updated weather forecasts indicated Inyo, Mono, San Bernardino, Kern, Los Angeles, Tuolumne, and Ventura counties and approximately 10,345 customers were potentially in scope for de-energization during the relevant period.

November 17<sup>th</sup> -- At approximately 4:00 am the PSPS IMT observed dangerous fire weather conditions exceeding wind and FPI thresholds on circuits in Mono, Inyo, and Los Angeles county. SCE provided imminent notification of de-energization to all of the impacted circuits beginning at 5:09 am and at approximately 7:46 am began de-energizing a total of 397 customers in Mono, Inyo, and Los Angeles Counties as detailed in the table on the following page. The IMT continued to actively monitor weather developments, patrol de-energized circuits for possible restoration, and restore circuits as conditions in the field improved. SCE held its daily State Executive call at 2:00 pm, an OEM County Coordination call at 3:00 pm and a Critical Infrastructure call at 3:30 pm to communicate the weather forecast, customers in scope for de-energization, and to answer any questions. SCE emailed participants after the daily calls to provide the briefing materials shared. At approximately 5:00pm on November 17, SCE also de-energized a portion of the Sand Canyon circuit in Los Angeles County without any imminent notification due to the sudden onset of unexpected fire weather conditions. The Sand Canyon circuit was then added to the November 17 forecasted period of concern for the duration of the PSPS event and a day of notification of potential de-energization was sent to the remaining customers on the circuit. No other portions of the Sand Canyon circuit were de-energized in this event.

November 18<sup>th</sup> -- As hazardous weather conditions subsided, SCE began sending imminent re-energization notifications to public safety partners, critical infrastructure providers, and customers. SCE performed patrols for circuit restoration on de-energized circuits, ultimately restoring power to all circuits by 9:55 pm as detailed in the table below.

The following responses address how SCE complied with all applicable PSPS regulatory requirements, including ESRB-8 and the Phase 1 (D. 19-05-042) and Phase 2 (D. 20-05-051) decisions, during this event.

## 1. The time, place and duration of the power shutoff event

This event started at 09:31 am on Monday, 11/16/20, and continued through Wednesday, 11/18/20 at 09:55 pm. The event impacted portions of Kern, Mono, Los Angeles, and Inyo counties. The table below provides the timeline for de-energization and restoration for all impacted circuits.

### De-Energization/Re-Energization Circuit Timeline

Circuit	Isolation Device <sup>4</sup>	De-Energized Date/Military Time	Customers Affected	Re-Energized <sup>5</sup> (1st load) Date/Military Time	Re-Energized (All load) Date/Military Time
Grapevine Peak	CB	11/16/2020 20:27	4	N/A	11/17/2020 16:20
Frozen	PS0269	11/16/2020 21:54	1	N/A	11/17/2020 16:21
Tufa	RAR0289	11/17/2020 7:45	1	N/A	11/18/2020 21:55
Cain Ranch	CB	11/17/2020 8:41	22	N/A	11/18/2020 8:43
Shovel	RAR0102	11/17/2020 12:06	165	11/17/2020 14:46	11/18/2020 13:44
Birchim	RAR0323	11/17/2020 13:18	3	N/A	11/18/2020 21:15
Birchim	RCS0181	11/17/2020 13:18	173	N/A	11/18/2020 8:13
Reverse Peak	RAR0112	11/17/2020 20:51	24	N/A	11/18/2020 9:42
<b>Additional De-Energizations Not Originally in the Period of Concern<sup>6</sup></b>					
Mettler	RCS1132	11/16/2020 9:31	8	N/A	11/16/2020 17:16
Cuddeback	PS0875	11/16/2020 9:38	103	11/16/2020 17:48	11/16/2020 17:50
Sand Canyon	RAR0191	11/17/2020 12:55	9	N/A	11/18/2020 14:26

## 2. The local communities' representatives contacted prior to de-energization, the date on which they were contacted, and whether the areas affected by the de-energization are classified as Zone 1, Tier 2, or Tier 3 as per the definition in General Order 95, Rule 21.2<sup>7</sup>

County	Public Safety Partner	Date	Tier
Inyo	County and State public safety and first responder agencies and local governments	11/14	Tier 2, Tier 3

<sup>4</sup> Remote Automatic Recloser (RAR) and Circuit Breaker (CB) denote different types of sectionalizing devices used by SCE

<sup>5</sup> 1<sup>st</sup> load identifies if the circuit was re-energized in sections based on pre-patrols and weather conditions impacting the ability to re-energize the entire line simultaneously. All Load identifies when the entire circuit was re-energized.

<sup>6</sup> See Attachment A Public Safety Partner Notifications. SCE also contacted other County and State public safety and first responder agencies and local governments for areas that were not de-energized but were within the scope of concern.

County	Public Safety Partner	Date	Tier
Kern	County and State public safety and first responder agencies and local governments	11/14	Tier 2 Tier 3
Los Angeles	County and State public safety and first responder agencies and local governments	11/14	Tier 2, Tier 3
Mono	County and State public safety and first responder agencies and local governments	11/14	Tier 2, Tier 3
San Bernardino	County and State public safety and first responder agencies and local governments	11/14	Tier 2, Tier 3
Tuolumne	County and State public safety and first responder agencies and local governments	11/14	Tier 2, Tier 3
Ventura	County and State public safety and first responder agencies and local governments	11/14	Tier 2, Tier 3

**3. If unable to provide customers with notice at least 2 hours prior to the de-energization event, provide an explanation in its report.**

On November 16, SCE de-energized the Cuddeback and Mettler circuits in Kern county due to sudden onset of dangerous weather conditions related to rapidly escalating wind speeds. Although these two circuits received imminent notification of de-energization, SCE was not able to provide these notices at least two hours prior to the de-energization given the urgent need to initiate de-energization to avoid the risk of a potential ignition. SCE provided notices approximately 23 minutes prior to pro-active de-energization. At approximately 5:00pm on November 17, SCE also de-energized a portion of the Sand Canyon circuit in Los Angeles County without any imminent notification, also due to rapidly escalating wind speeds. The Sand Canyon circuit was then added to the November 17 forecasted period of concern for the duration of the PSPS event and a day of notification of potential de-energization was sent to the remaining customers on the circuit. No other portions of the Sand Canyon circuit, however, were ultimately de-energized in this event.

**4. Summarize the number and nature of complaints received as the result of the de-energization event and include claims that are filed due to de-energization.**

As of the submission of this report, SCE is not aware of any formal complaints that were submitted to the Commission. SCE Consumer Affairs did receive two complaints through the CPUC's Consumer Affairs Branch related to this PSPS event as detailed below. SCE also submits these additional processed complaints through the CPUC's Consumer Affairs Branch for previous 2020 PSPS events:

PSPS Event Date	Number of Complaints	Nature of Complaints
October 23, 2020	10	<ul style="list-style-type: none"> <li>• Lack of Information during PSPS Event</li> <li>• Disagrees with use of PSPS</li> </ul>
November 3, 2020	2	<ul style="list-style-type: none"> <li>• Disagrees with use of PSPS</li> </ul>
November 14, 2020	2	<ul style="list-style-type: none"> <li>• Lack of Information during PSPS Event</li> </ul>

SCE received feedback from Kern County and the City of Tehachapi related to the de-energization of the Mettler and Cuddeback circuits which had not originally been in scope for this event. Both expressed concerns related to SCE's failure to forecast these circuits as in scope for the PSPS event and the short timeframe for imminent notifications. SCE has met with both Kern county and the City of Tehachapi officials to discuss these concerns and further identify areas of concern for future events. SCE also received numerous questions related to the Shovel circuit from the Acton Town Council. SCE communicated with the Acton Town Council during this event to address these questions.

**5. The timeline for power restoration (re-energization), in addition to the steps taken to restore power as required in Resolution ESRB-8.**

A PSPS event will continue while dangerous fire weather conditions exist, and the threat of a catastrophic wildfire event remains due to these conditions. If circuits are de-energized, those circuits and impacted lines will be inspected to ensure there is no damage before power can be safely restored. Any visual inspection of the power lines typically take place during daylight hours for safety and accuracy. Therefore, patrol and restoration operations may be limited or prolonged during overnight hours. SCE strives to restore all power within 24 hours of de-energization when possible. The timeline for power restoration is detailed in the table below.

Circuit	Isolation Device	IC Authorized Imminent Notification	Post Patrol Initiated	Circuit Fully Re-energized
Grapevine Peak	CB	11/16/2020 16:26	11/16/2020 16:26	11/17/2020 16:20
Frozen	PS0269	11/17/2020 14:28	11/17/2020 14:28	11/17/2020 16:21
Tufa	RAR0289	11/18/2020 10:41	11/18/2020 10:41	11/18/2020 21:55
Cain Ranch	CB	11/18/2020 5:46	11/18/2020 5:46	11/18/2020 8:43
Shovel	RAR0102	11/17/2020 14:14	11/17/2020 14:14	11/18/2020 13:44
Birchim	RAR0323	11/18/2020 19:08	11/18/2020 19:08	11/18/2020 21:15

Circuit	Isolation Device	IC Authorized Imminent Notification	Post Patrol Initiated	Circuit Fully Re-energized
Birchim	RCS0181	11/18/2020 6:31	11/18/2020 6:31	11/18/2020 8:13
Reverse Peak	RAR0112	11/18/2020 5:46	11/18/2020 5:46	11/18/2020 9:42
Mettler	RCS1132	11/16/2020 16:26	11/16/2020 16:26	11/16/2020 17:16
Cuddeback	PS0875	11/16/2020 16:26	11/16/2020 16:26	11/16/2020 17:50
Sand Canyon	RAR0191	11/18/2020 2:40	11/18/2020 2:40	11/18/2020 14:26

**6. For any circuits that require more than 24 hours to restore, the utility shall explain why it was unable to restore each circuit within this timeframe in its post event report.**

SCE was able to restore power within a 24-hour timeframe to all de-energized circuits.

**7. Identify the address of each community assistance location during the de-energization event, describe the location (in a building, a trailer, etc.), and describe the assistance available at each location, and give the days and hours that it was open.**

Each of the CCV locations were equipped with ice vouchers or ice, water, firewood, blankets, and customer resiliency kits (containing PSPS program information, mask, gloves, hand sanitizer, solar power battery charger or an LED light with built-in battery). CCV's were used in this event given the scope and size of the event and SCE's ability to adhere to COVID 19 protocols through their use.

**CRC/CCV Locations and Details**

Type	County	City/Community	Day and Time	Address
CCV	Mono	Bridgeport	8am-10pm (Tuesday)	242 Main Street (between Court House and Market).
CCV	Inyo	Bishop	8am-10pm (Tuesday) 8am-10pm (Wednesday)	1361 Rocking W Dr. (Sears Hometown Store)
CCV	Kern	Frazier Park	8am-10pm (Tuesday)	3801 Park Dr. (Frazier Mountain Park)

**8. Any wind-related damage(s) to SCE's overhead equipment in the areas where power is shutoff.**

Crews performed post-patrols on de-energized circuits before re-energization to ensure safe operating conditions. No wind-related damage was found on SCE's overhead equipment during patrol in the areas where power was shutoff.

## 9. All factors considered by SCE in its decision to shut off power, including wind speed, temperature, humidity, and vegetation moisture in the vicinity of the de-energized circuits

SCE's decision to shut off power is dynamic and was made by considering the following factors during this PSPS event:

- Ongoing assessments from our in-house meteorologists using high-resolution weather models, data from SCE weather stations and publicly available weather stations.
- The SCE Fire Potential Index (FPI), a tool that utilizes weather data, fuel conditions, and vegetation moisture content to rate the daily fire potential across our region. SCE uses the following metrics to rate ignition potential -- Low - 11.99, Elevated - 12-14.99 and Extreme - 15 and above
- Wind trends<sup>8</sup> and speeds, particularly when they exceed or are expected to exceed National Weather Service Wind Advisory levels (defined as 31 mph sustained wind speed and 46 mph gust wind speed) or exceed the top 1% of historical wind speeds in the area. Wind speeds are particularly important when we consider them in combination with other local conditions, such as dry vegetation that could present a true hazard for the community. Wind speed thresholds may also be adjusted based on other factors or circuit design.

SCE considered the following specific factors to inform de-energization decisions:

Circuit Name	Isolation Device	Weather Station	Wind Sustained	Gust Sustained	Threshold Sustained	FPI Value	Reasons for De-Energization
METTLER	RCS1132	SCE CUMMINGS VALLEY	27	40	23/37	12	<ul style="list-style-type: none"> <li>• Exceeded Threshold</li> <li>• Exceeded FPI</li> </ul>
CUDDEBACK	PS0875	SCE CUMMINGS VALLEY	27	40	23/37	12	<ul style="list-style-type: none"> <li>• Exceeded Threshold</li> <li>• Exceeded FPI</li> </ul>
GRAPEVINE PEAK	CB	GRAPEVINE PEAK (RAWS)	32	40	31/46	12.07	<ul style="list-style-type: none"> <li>• Exceeded Threshold</li> <li>• Exceeded FPI</li> </ul>
FROZEN	PS0269	GRAPEVINE PEAK (RAWS)	32	40	31/46	13.08	<ul style="list-style-type: none"> <li>• Exceeded Threshold</li> <li>• Exceeded FPI</li> </ul>
TUFA	RAR0289	SCE BODIE STATE PARK	26	38	31/46	13.06	<ul style="list-style-type: none"> <li>• High Wind Trend</li> <li>• Exceeded FPI</li> </ul>
CAIN RANCH	CB	SCE RUSH CREEK	28.8	56.2	31/46	13.18	<ul style="list-style-type: none"> <li>• Exceeded Threshold</li> <li>• Exceeded FPI</li> </ul>
SHOVEL	RAR0102	SCE SIERRA PALOMA	22.8	31.9	25/40	12.18	<ul style="list-style-type: none"> <li>• High Wind Trend</li> <li>• Exceeded FPI</li> </ul>

<sup>8</sup> SCE defines wind trends as increasing wind speeds that are projected to exceed threshold

Circuit Name	Isolation Device	Weather Station	Wind Sustained	Gust Sustained	Threshold Sustained	FPI Value	Reasons for De-Energization
SAND CANYON	RAR0191	SCE MAGIC MOUNTAIN TRUCK TRAIL	36	49	31/46	13.34	<ul style="list-style-type: none"> <li>Exceeded Threshold</li> <li>Exceeded FPI</li> </ul>
BIRCHIM	RAR0323	SCE ROUND VALLEY	32.5	49.8	31/46	14.08	<ul style="list-style-type: none"> <li>Exceeded Threshold</li> <li>Exceeded FPI</li> </ul>
BIRCHIM	RCS0181	SCE PINE CREEK	27.6	50.1	31/46	14.08	<ul style="list-style-type: none"> <li>Exceeded Threshold</li> <li>Exceeded FPI</li> </ul>
REVERSE PEAK	RAR0112	SCE CRESTVIEW RADIO	16.1	48.2	31/46	12.47	<ul style="list-style-type: none"> <li>Exceeded Threshold</li> <li>Exceeded FPI</li> </ul>

**10. Evaluation of alternatives to de-energization that were considered, and mitigation measures used to decrease the risk of utility-caused wildfire in the de-energized area and an explanation of how the utility determined that the benefit of de-energization outweighed the potential public safety risks:**

SCE sets thresholds based on SCE's risk-informed assessment of the potential for a catastrophic wildfire should an ignition occur under the conditions presented. Under such conditions, the harm to life and property resulting from a catastrophic wildfire vastly outweighs the impacts of the de-energization necessary to eliminate the potential of ignition. Additionally, SCE only uses de-energization when no other alternatives will mitigate this fire risk and to the extent possible, minimizes the impact by limiting the de-energization to the smallest number of customers possible through segmentation of impacted circuits, where possible.

In all PSPS events, SCE uses sectionalizing through RAR devices or switches when available within a reasonable period to isolate and de-energize only the necessary portions of circuits. While avoiding de-energization entirely is not always possible, SCE takes these steps to reduce the impacts of de-energization on the community, considering the impacts of the de-energization on its stakeholders within the overall risk posed by the prevailing weather conditions, its de-energizations thresholds, and the unacceptable public safety risk of catastrophic wildfire ignition.

**11. A copy of all notifications, the timing of notifications, the methods of notifications and who made the notifications (the utility or local public safety partners).**

A copy of all notifications and the timing of notifications can be found in Attachment A - Public Safety Partner Notifications, Attachment B - Critical Infrastructure and Customer

Notifications, and Attachment C - PSPS Activation Customer Notification Messaging. All PSPS event notifications to key stakeholders, including Public Safety Partners and customers, are delivered via voice, email, and TTY (telecommunication device for the hearing impaired) formats as per the preference of the recipient. Notifications are offered in multiple languages. All notifications were made by SCE.

**12. Number of affected customers broken down by all classifications including residential, medical baseline, commercial/industrial, etc.**

A detailed description of the number of affected customers broken down by all classifications including residential, medical baseline, commercial/industrial, etc. is provided in Attachment B- Customer and Critical Infrastructure Notifications.

**13. An explanation of the circumstances that resulted in failure to communicate a potential pro-active de-energization event, if any.**

On November 16, SCE de-energized the Cuddeback and Mettler circuits in Kern county due to sudden onset of dangerous weather conditions related to rapidly escalating wind speeds. Although these two circuits received imminent notification of de-energization, SCE was not able to provide these notices at least two hours prior to the de-energization given the urgent need to initiate de-energization to avoid the risk of a potential ignition. SCE provided notices approximately 23 minutes prior to pro-active de-energization. At approximately 5:00pm on November 17, SCE also de-energized a portion of the Sand Canyon circuit in Los Angeles County without any imminent notification, also due to rapidly escalating wind speeds. The Sand Canyon circuit was then added to the November 17 forecasted period of concern for the duration of the PSPS event and a day of notification of potential de-energization was sent to the remaining customers on the circuit. No other portions of the Sand Canyon circuit, however, were ultimately de-energized in this event.

**14. Each electric investor-owned utility shall enumerate and explain the cause of any false communications in its post event reports by citing the sources of changing data.**

SCE notes that its PSPS notices before potential de-energization only provide a warning to customers of a possible de-energization event. SCE notices are designed to give customers notice that a de-energization could take place and a time frame within which the event is most likely to occur so that customers can act and prepare. Given the unpredictability of weather on the ground, however, SCE's advance notices do not affirmatively confirm that a circuit *will be* de-energized. In fact, for clarity, SCE does not provide any affirmative confirmation of de-energization in its notifications until an actual de-energization has taken place.

SCE believes this event could be viewed as an example of a false-negative communication since we were unable to provide all of the required advance notice of de-energization to Public Safety Partners, critical infrastructure providers, or customers on three circuits during this event given the rapid onset of hazardous weather conditions. Additionally, as discussed below, any advance notifications to customers who were not de-energized, although not viewed by SCE as false positives, are being reported here for transparency purposes. SCE provided notice to 11,964 customers of potential de-energization but not all of these customers were de-energized.

**15. A description and evaluation of engagement with local and state public safety partners in providing advanced education and outreach during the de-energization event.**

Advanced education and outreach of this Public Safety Power Shutoff event was communicated to all impacted counties projected to be in scope, emergency management officials, CalOES, and the Commission before any forecasted weather was anticipated to impact the SCE service territory. Updates were provided throughout the event using the CalOES PSPS Notification Form, daily situational awareness and coordination calls and individual contact with Public Safety Partners in the affected counties.

**16. For those customers where positive or affirmative notification was attempted, an accounting of the customers (which tariff and/or access and functional needs population designation), the number of notification attempts made, the timing of attempts, who made the notification attempt (utility or public safety partner) and the number of customers for whom positive notification was achieved.**

SCE only tracks critical care customers for positive or affirmative receipt of notification attempts. Notifications are made daily as these customers remain on potentially impacted circuits. There were 8 critical care customers requiring secondary verification and SCE was able to make positive contact with all of them during this event. SCE regularly requests updated contact information from all critical care customers.

**17. A description of how sectionalizing, i.e., separating loads within a circuit, was considered and implemented and the extent to which it impacted the size and scope of the de-energization event.**

There were 11,964 total customers in scope for potential de-energization during the period of concern for this event across all known circuits. There were an additional 123 customers not in scope for the period of concern that SCE had to ultimately de-energize. SCE reduced the number of customers de-energization to 517 customers total using switching playbooks that identified sectionalizing devices to limit the scope of the event. SCE used RAR devices to separate and isolate the de-energization areas, limiting the de-energization impacts as detailed in the table on page 5 of this report. During the process of sectionalizing, 229 customers temporarily lost power (for approximately 2 minutes) but SCE is not including this in the count of de-energized customers due to the fact that this was an extremely short, momentary loss of power during switching operations.

**18. Lessons learned from the de-energization events.**

SCE continues to evaluate lessons learned from all 2020 PSPS events and is considering potential improvements within that context.

**19. Any recommended updates to the guidelines adopted in Resolution ESRB-8 and this decision.**

SCE notes that its PSPS notices before potential de-energization) only provide a warning to customers of a possible de-energization event. SCE notices are designed to give customers notice

that a de-energization could take place and a time frame within which the event is most likely to occur so that customers can take action and prepare. Given the unpredictability of weather on the ground, however, SCE's advance notices do not affirmatively confirm that a circuit *will be* de-energized. In fact, for clarity, SCE does not provide any affirmative notifications until an actual de-energization has taken place.

SCE believes that its notices are correct and factual. The definition of false positive is subject to interpretation about which notifications should be included. Impending de-energizations could reasonably be interpreted as notifications of imminent de-energization 1-4 hours before outages. SCE believes, however, that the Commission may be interested in all the advance notices of a possible de-energization to such customers. Consequently, in an effort to assure transparency and full compliance, SCE will treat them here as potential "false positives", see above, within the meaning of the PSPS guidance. SCE would appreciate any additional Commission clarification or guidance on this issue to assure it is fully compliant.

SCE notes that "false positives" typically refer to decisions made, or actions taken based on erroneous information. Differences between notifications and actual de-energizations, however, do not stem from incorrect data, but rather from actual ground conditions varying from forecast conditions. This variance is inherent because of the constantly changing nature of emergent weather. SCE hopes that the Commission will take this into consideration when clarifying the definition of false positives going forward.

SCE PSPS Post Event Report  
November 14 to November 18, 2020

### Officer Verification

I am an officer of the applicant corporation herein and am authorized to make this verification on its behalf. I am informed and believe that the matters stated in the foregoing document are true.

I declare under penalty of perjury that the foregoing is true and correct. Executed this 4<sup>th</sup> day of December 2020 in Cerritos, California

## Public Safety Partner Notifications

Everbridge PSPS Notification Audit Report 2020-11-14-1705 ALL COUNTIES Report 1

Notification ID	Message Title	Sent On	Notes
635796893731308	Important: SCE Initial Notice for PSPS Event in KERN County on 11/17/2020	Nov 14, 2020 14:25:20 PST	This was sent prematurely to an SCE internal list and to limited external public safety partners in Kern County, but not the circuit distribution list. The correct notification was sent to the county at 1658.
635796893731388	Important: SCE Initial Notice for PSPS Event in VENTURA County on 11/17/2020.	Nov 14, 2020 16:45:22 PST	
635796893731393	Important: SCE Initial Notice for PSPS Event in SAN BERNARDINO County on 11/17/2020	Nov 14, 2020 16:55:21 PST	
635796893731396	Important: SCE Initial Notice for PSPS Event in KERN County on 11/17/2020	Nov 14, 2020 16:58:36 PST	
635796893731397	Important: SCE Initial Notice for PSPS Event in INYO County on 11/17/2020	Nov 14, 2020 17:00:46 PST	
635796893731402	Important: SCE Initial Notice for PSPS Event in MONO County on 11/17/2020	Nov 14, 2020 17:05:39 PST

**Subject:** Important: SCE Initial Notice for PSPS Event in KERN County on 11/17/2020.

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

Due to projected weather conditions, SCE may need to shut off power (a Public Safety Power Shutoff or PSPS) to electrical circuits in High Fire Risk Areas (HFRA) serving portions of some cities and/or unincorporated areas in **KERN County**. SCE is also notifying customers on the affected circuits about the potential shutoff, giving them time to prepare.

SCE has opened its Emergency Operations Center and activated an Incident Management Team to monitor the weather and other conditions in real time. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

***Please refer to the attached file for status and periods of concern for specific circuits in your county.***

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential Public Safety Power Shutoffs. Additional targeted notifications will also be sent, as needed, to provide time-sensitive de-energize or re-energize information. Erratic or sudden onset of hazardous conditions that jeopardize public safety may impact SCE's ability to provide advanced notice to customers. A shutoff could occur sooner than anticipated, additional circuits could be impacted, or conditions could change, resulting in shutoffs no longer being considered for one or more circuits. We will notify you as conditions change.

There also might be weather-related or other unplanned repair outages in the areas designated for potential Public Safety Power Shutoffs. Information on these unplanned outages can be found at [sce.com/outage](https://www.sce.com/outage).

**Recommended Language to Share with the Public:** SCE may shut off power on one or more circuits in your area. For more information, visit [sce.com/PSPS](https://www.sce.com/PSPS).

### Web and Maps

- PDFs of High Fire Risk Area (HFRA) circuit maps and GIS layers may be found, by county, at [sce.com/maps](https://www.sce.com/maps).

Southern California Edison LNO Circuit List with Periods of Concern  
As of 11/14/2020 Circuit List All Counties Report #1

Note 1: Restoration activities begin as soon as conditions improve and it is safe for crews to begin inspections.  
Note 2: Estimated Restoration Times may be delayed if damage is found or if weather conditions change.  
Note 3: 72-hour notification information is for local government and agency planning use only. Customer notifications begin at 48 hours.  
Note 4: Approximate customer counts are calculated by circuit, regardless of jurisdiction. If a circuit crosses jurisdictional boundaries, the total customer counts for that circuit are included for each jurisdiction. See [sca.com/safety/wildfire/paps](http://sca.com/safety/wildfire/paps) for total customer counts by county.  
Note 5: Please refer to Definitions tab for additional information.  
Note 6: Any circuits on the list that do not display period of concern times means those circuits have periods of concern that start beyond the time periods shown. Watch for more on subsequent reports.

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

Due to projected weather conditions, SCE may need to shut off power (a Public Safety Power Shutoff or PSPS) to electrical circuits in High Fire Risk Areas (HFRA) serving portions of some cities and/or unincorporated areas in **MONO County**. SCE is also notifying customers on the affected circuits about the potential shutoff, giving them time to prepare.

SCE has opened its Emergency Operations Center and activated an Incident Management Team to monitor the weather and other conditions in real time. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

***Please refer to the attached file for status and periods of concern for specific circuits in your county.***

Southern California Edison LNO Circuit List with Periods of Concern  
As of 11/14/2020 Circuit List All Counties Report #2

Note 1: Restoration activities begin as soon as conditions improve and it is safe for crews to begin inspections.  
Note 2: Estimated Restoration Times may be delayed if damage is found or if weather conditions change.  
Note 3: 72-hour notification information is for local government and agency planning use only. Customer notifications begin at 48 hours.  
Note 4: Approximate customer counts are calculated by circuit, regardless of jurisdiction. If a circuit crosses jurisdictional boundaries, the total customer counts for that circuit are included for each jurisdiction. See [sca.com/safety/wildfire/paps](https://sca.com/safety/wildfire/paps) for total customer counts by county.  
Note 5: Please refer to Definitions tab for additional information.  
Note 6: Any circuits on the list that do not display period of concern times means those circuits have periods of concern that start beyond the time periods shown. Watch for more on subsequent reports.

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

***Please refer to the attached file for UPDATED status and periods of concern for specific circuits in your county.***

Due to weather conditions, SCE may need to shut off power (a Public Safety Power Shutoff or PSPS) to electrical circuits in High Fire Risk Areas (HFRA) serving portions of some cities and/or unincorporated areas in **KERN County**. SCE is also notifying customers on the affected circuits about the potential for shutoff, giving them time to prepare.

SCE's Incident Management Team continues to monitor the weather in real time. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential Public Safety Power Shutoffs. Additional targeted notifications will also be sent, as needed, to provide time-sensitive de-energize or re-energize information. Erratic or sudden onset of hazardous conditions that jeopardize public safety may impact SCE's ability to provide advanced notice to customers. A shutoff could occur sooner than anticipated, additional circuits could be impacted, or conditions could change, resulting in shutoffs no longer being considered for one or more circuits. We will notify you as conditions change.

There also might be weather-related or other unplanned repair outages in the areas designated for potential Public Safety Power Shutoffs. Information on these unplanned outages can be found at [sce.com/outage](https://www.sce.com/outage).

**Recommended Language to Share with the Public:** Weather conditions have changed and we are providing an updated status for all circuits with potential for power shutoff in your area. Check your email for details and visit [sce.com/PSPS](https://www.sce.com/PSPS).

Southern California Edison LNO Circuit List with Periods of Concern  
As of 11/15/2020 Circuit List All Counties Report #1

Note 1: Restoration activities begin as soon as conditions improve and it is safe for crews to begin inspections.  
Note 2: Estimated Restoration Times may be delayed if damage is found or if weather conditions change.  
Note 3: 72-hour notification information is for local government and agency planning use only. Customer notifications begin at 48 hours.  
Note 4: Approximate customer counts are calculated by circuit, regardless of jurisdiction. If a circuit crosses jurisdictional boundaries, the total customer counts for that circuit are included for each jurisdiction. See [sca.com/safety/wildfire/paps](http://sca.com/safety/wildfire/paps) for total customer counts by county.  
Note 5: Please refer to Definitions tab for additional information.  
Note 6: Any circuits on the list that do not display period of concern times means those circuits have periods of concern that start beyond the time periods shown. Watch for more on subsequent reports.

***Please refer to the attached file for UPDATED status and periods of concern for specific circuits in your county.***

Due to weather conditions, SCE may need to shut off power (a Public Safety Power Shutoff or PSPS) to electrical circuits in High Fire Risk Areas (HFRA) serving portions of some cities and/or unincorporated areas in **VENTURA County**. SCE is also notifying customers on the affected circuits about the potential for shutoff, giving them time to prepare.

SCE's Incident Management Team continues to monitor the weather in real time. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential Public Safety Power Shutoffs. Additional targeted notifications will also be sent, as needed, to provide time-sensitive de-energize or re-energize information. Erratic or sudden onset of hazardous conditions that jeopardize public safety may impact SCE's ability to provide advanced notice to customers. A shutoff could occur sooner than anticipated, additional circuits could be impacted, or conditions could change, resulting in shutoffs no longer being considered for one or more circuits. We will notify you as conditions change.

There also might be weather-related or other unplanned repair outages in the areas designated for potential Public Safety Power Shutoffs. Information on these unplanned outages can be found at [sce.com/outage](https://www.sce.com/outage).

**Recommended Language to Share with the Public:** Weather conditions have changed and we are providing an updated status for all circuits with potential for power shutoff in your area. Check your email for details and visit [sce.com/PSPS](https://www.sce.com/PSPS).

**To:** SCE Liaison Officer  
**Subject:** Important: SCE Update Notice for PSPS Event in INYO County.  
**Attachments:** SCE+LNO+POC+INYO+County+2020-11-15+Rpt+1.xlsx

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

***Please refer to the attached file for UPDATED status and periods of concern for specific circuits in your county.***

Due to weather conditions, SCE may need to shut off power (a Public Safety Power Shutoff or PSPS) to electrical circuits in High Fire Risk Areas (HFRA) serving portions of some cities and/or unincorporated areas in **INYO County**. SCE is also notifying customers on the affected circuits about the potential for shutoff, giving them time to prepare.

SCE's Incident Management Team continues to monitor the weather in real time. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential Public Safety Power Shutoffs. Additional targeted notifications will also be sent, as needed, to provide time-sensitive de-energize or re-energize information. Erratic or sudden onset of hazardous conditions that jeopardize public safety may impact SCE's ability to provide advanced notice to customers. A shutoff could occur sooner than anticipated, additional circuits could be impacted, or conditions could change, resulting in shutoffs no longer being considered for one or more circuits. We will notify you as conditions change.

There also might be weather-related or other unplanned repair outages in the areas designated for potential Public Safety Power Shutoffs. Information on these unplanned outages can be found at [sce.com/outage](https://www.sce.com/outage).

**Recommended Language to Share with the Public:** Weather conditions have changed and we are providing an updated status for all circuits with potential for power shutoff in your area. Check your email for details and visit [sce.com/PSPS](https://www.sce.com/PSPS).

### Web and Maps

Southern California Edison LNO Circuit List with Periods of Concern  
As of 11/15/2020 Circuit List All Counties Report #1

Note 1: Restoration activities begin as soon as conditions improve and it is safe for crews to begin inspections.  
Note 2: Estimated Restoration Times may be delayed if damage is found or if weather conditions change.  
Note 3: 72-hour notification information is for local government and agency planning use only. Customer notifications begin at 48 hours.  
Note 4: Approximate customer counts are calculated by circuit, regardless of jurisdiction. If a circuit crosses jurisdictional boundaries, the total customer counts for that circuit are included for each jurisdiction. See [sca.com/safety/wildfire/paps](http://sca.com/safety/wildfire/paps) for total customer counts by county.  
Note 5: Please refer to Definitions tab for additional information.  
Note 6: Any circuits on the list that do not display period of concern times means those circuits have periods of concern that start beyond the time periods shown. Watch for more on subsequent reports.

**Attachments:** SCE+LNO+POC+VENTURA+County+2020-11-15+Rpt+2.xlsx

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

***Please refer to the attached file for UPDATED status and periods of concern for specific circuits in your county.***

Due to weather conditions, SCE may need to shut off power (a Public Safety Power Shutoff or PSPS) to electrical circuits in High Fire Risk Areas (HFRA) serving portions of some cities and/or unincorporated areas in **VENTURA County**. SCE is also notifying customers on the affected circuits about the potential for shutoff, giving them time to prepare.

SCE's Incident Management Team continues to monitor the weather in real time. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential Public Safety Power Shutoffs. Additional targeted notifications will also be sent, as needed, to provide time-sensitive de-energize or re-energize information. Erratic or sudden onset of hazardous conditions that jeopardize public safety may impact SCE's ability to provide advanced notice to customers. A shutoff could occur sooner than anticipated, additional circuits could be impacted, or conditions could change, resulting in shutoffs no longer being considered for one or more circuits. We will notify you as conditions change.

There also might be weather-related or other unplanned repair outages in the areas designated for potential Public Safety Power Shutoffs. Information on these unplanned outages can be found at [sce.com/outage](https://www.sce.com/outage).

**Recommended Language to Share with the Public:** Weather conditions have changed and we are providing an updated status for all circuits with potential for power shutoff in your area. Check your email for details and visit [sce.com/PSPS](https://www.sce.com/PSPS).

### Web and Maps

- PDFs of High Fire Risk Area (HFRA) circuit maps and GIS layers may be found, by county, at [sce.com/maps](https://www.sce.com/maps).

Southern California Edison LNO Circuit List with Periods of Concern  
As of 11/15/2020 Circuit List All Counties Report #2

Note 1: Restoration activities begin as soon as conditions improve and it is safe for crews to begin inspections.  
Note 2: Estimated Restoration Times may be delayed if damage is found or if weather conditions change.  
Note 3: 72-hour notification information is for local government and agency planning use only. Customer notifications begin at 48 hours.  
Note 4: Approximate customer counts are calculated by circuit, regardless of jurisdiction. If a circuit crosses jurisdictional boundaries, the total customer counts for that circuit are included for each jurisdiction. See [sca.com/safety/wildfire/paps](http://sca.com/safety/wildfire/paps) for total customer counts by county.  
Note 5: Please refer to Definitions tab for additional information.  
Note 6: Any circuits on the list that do not display period of concern times means those circuits have periods of concern that start beyond the time periods shown. Watch for more on subsequent reports.

**Subject:** Important: SCE Update Notice for PSPS Event in INYO County.  
**Attachments:** SCE+LNO+POC+INYO+County+2020-11-15+Rpt+2.xlsx

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

***Please refer to the attached file for UPDATED status and periods of concern for specific circuits in your county.***

Due to weather conditions, SCE may need to shut off power (a Public Safety Power Shutoff or PSPS) to electrical circuits in High Fire Risk Areas (HFRA) serving portions of some cities and/or unincorporated areas in **INYO County**. SCE is also notifying customers on the affected circuits about the potential for shutoff, giving them time to prepare.

SCE's Incident Management Team continues to monitor the weather in real time. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential Public Safety Power Shutoffs. Additional targeted notifications will also be sent, as needed, to provide time-sensitive de-energize or re-energize information. Erratic or sudden onset of hazardous conditions that jeopardize public safety may impact SCE's ability to provide advanced notice to customers. A shutoff could occur sooner than anticipated, additional circuits could be impacted, or conditions could change, resulting in shutoffs no longer being considered for one or more circuits. We will notify you as conditions change.

There also might be weather-related or other unplanned repair outages in the areas designated for potential Public Safety Power Shutoffs. Information on these unplanned outages can be found at [sce.com/outage](https://www.sce.com/outage).

**Recommended Language to Share with the Public:** Weather conditions have changed and we are providing an updated status for all circuits with potential for power shutoff in your area. Check your email for details and visit [sce.com/PSPS](https://www.sce.com/PSPS).

### Web and Maps

Southern California Edison LNO Circuit List with Periods of Concern  
As of 11/15/2020 Circuit List All Counties Report #2

Note 1: Restoration activities begin as soon as conditions improve and it is safe for crews to begin inspections.  
Note 2: Estimated Restoration Times may be delayed if damage is found or if weather conditions change.  
Note 3: 72-hour notification information is for local government and agency planning use only. Customer notifications begin at 48 hours.  
Note 4: Approximate customer counts are calculated by circuit, regardless of jurisdiction. If a circuit crosses jurisdictional boundaries, the total customer counts for that circuit are included for each jurisdiction. See [sca.com/safety/wildfire/paps](http://sca.com/safety/wildfire/paps) for total customer counts by county.  
Note 5: Please refer to Definitions tab for additional information.  
Note 6: Any circuits on the list that do not display period of concern times means those circuits have periods of concern that start beyond the time periods shown. Watch for more on subsequent reports.

**Subject:** Important: SCE Re-Energize Notice for PSPS Event in KERN County.

**Importance:** High

**Follow Up Flag:** Follow up

**Flag Status:** Flagged

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

SCE crews have inspected the lines, made any necessary repairs, and determined it was safe to **RE-ENERGIZE** the following circuit(s):

- **Circuit: CUDDEBACK**
- **Segment: 1**
- **County: KERN**
- **Unincorporated County Area: Golden Hills; Along SR 202 in Kern Co.**
- **Re-Energized Date: 11/16/2020**
- **Re-Energized Time: 1751**
  
- **Circuit: METTLER**
- **Segment: 3**
- **County: KERN**
- **Unincorporated County Area: Bear Valley Springs; Cummings Valley; Highline Rd.**
- **Re-Energized Date: 11/16/2020**
- **Re-Energized Time: 1716**

SCE is also notifying customers that power has been turned back on. SCE's Incident Management Team will continue to monitor conditions and coordinate with government agencies.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to a PSPS, know that SCE crews are working as safely and quickly as possible to restore service. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential PSPS events for this county. Additional targeted notifications provide alerts with all time-sensitive de-energize or re-energize information.

**Recommended Language to Share with the Public:** SCE is turning the power back on in your area. We have inspected our electrical lines and equipment, made any necessary repairs, and determined it is safe to turn on the power. Check your email for details and visit [sce.com/PSPS](https://www.sce.com/PSPS).

**Follow Up Flag:** Follow up

**Flag Status:** Flagged

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

Due to current weather conditions, SCE may need to shut off power (a Public Safety Power Shutoff or PSPS) in the next 1 to 4 hours to reduce the risk of wildfire ignition though the PSPS may occur earlier or later depending on actual weather conditions. Areas that may be impacted include:

- **Circuit: FROZEN**
- **County: KERN**
- **Segment: 1**
- **Unincorporated County Area: Wheeler Ridge; Grapevine; Tejon Ranch; Lebec**

**Circuit segments may be viewed at [sce.com/pmps](https://www.sce.com/pmps) and maps downloaded at [sce.com/maps](https://www.sce.com/maps).**

**This Imminent De-Energization warning expires after four hours.** If one or more circuits listed here are de-energized by SCE due to PSPS, a De-Energized notification confirming date and time of the PSPS event will be sent. However, **if this imminent notice expires without de-energization, the listed circuit(s) remain on SCE's monitor list and subject to PSPS.**

SCE's Incident Management Team (IMT) is in place to monitor conditions, coordinate with government agencies, and oversee re-energization once conditions are safe. SCE will provide an update to your agency as conditions change. Erratic or sudden onset of hazardous conditions that jeopardize public safety may impact SCE's ability to provide advanced notice to customers. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential PSPS events for this county. Additional targeted notifications provide alerts with all time-sensitive de-energize or re-energize information.

**Recommended Language to Share with the Public:** Due to current weather conditions, SCE may shut off the power on specific circuits within the next 1-4 hours. Check your email for details and visit [www.sce.com/PSPS](https://www.sce.com/PSPS).

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

***Please refer to the attached file for UPDATED status and periods of concern for specific circuits in your county.***

Due to weather conditions, SCE may need to shut off power (a Public Safety Power Shutoff or PSPS) to electrical circuits in High Fire Risk Areas (HFRA) serving portions of some cities and/or unincorporated areas in **LOS ANGELES County**. SCE is also notifying customers on the affected circuits about the potential for shutoff, giving them time to prepare.

SCE's Incident Management Team continues to monitor the weather in real time. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential Public Safety Power Shutoffs. Additional targeted notifications will also be sent, as needed, to provide time-sensitive de-energize or re-energize information. Erratic or sudden onset of hazardous conditions that jeopardize public safety may impact SCE's ability to provide advanced notice to customers. A shutoff could occur sooner than anticipated, additional circuits could be impacted, or conditions could change, resulting in shutoffs no longer being considered for one or more circuits. We will notify you as conditions change.

There also might be weather-related or other unplanned repair outages in the areas designated for potential Public Safety Power Shutoffs. Information on these unplanned outages can be found at [sce.com/outage](https://www.sce.com/outage).

**Recommended Language to Share with the Public:** Weather conditions have changed and we are providing an updated status for all circuits with potential for power shutoff in your area. Check your email for details and visit [sce.com/PSPS](https://www.sce.com/PSPS).

### Web and Maps

Southern California Edison LNO Circuit List with Periods of Concern  
As of 11/16/2020 Circuit List All Counties Report #2

Note 1: Restoration activities begin as soon as conditions improve and it is safe for crews to begin inspections.  
Note 2: Estimated Restoration Times may be delayed if damage is found or if weather conditions change.  
Note 3: 72-hour notification information is for local government and agency planning use only. Customer notifications begin at 48 hours.  
Note 4: Approximate customer counts are calculated by circuit, regardless of jurisdiction. If a circuit crosses jurisdictional boundaries, the total customer counts for that circuit are included for each jurisdiction. See [sca.com/safety/wildfire/paps](http://sca.com/safety/wildfire/paps) for total customer counts by county.  
Note 5: Please refer to Definitions tab for additional information.  
Note 6: Any circuits on the list that do not display period of concern times means those circuits have periods of concern that start beyond the time periods shown. Watch for more on subsequent reports.

**Flag Status:** Flagged

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

**Please refer to the attached file for UPDATED status and periods of concern for specific circuits in your county.**

Due to weather conditions, SCE may need to shut off power (a Public Safety Power Shutoff or PSPS) to electrical circuits in High Fire Risk Areas (HFRA) serving portions of some cities and/or unincorporated areas in **INYO County**. SCE is also notifying customers on the affected circuits about the potential for shutoff, giving them time to prepare.

SCE's Incident Management Team continues to monitor the weather in real time. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential Public Safety Power Shutoffs. Additional targeted notifications will also be sent, as needed, to provide time-sensitive de-energize or re-energize information. Erratic or sudden onset of hazardous conditions that jeopardize public safety may impact SCE's ability to provide advanced notice to customers. A shutoff could occur sooner than anticipated, additional circuits could be impacted, or conditions could change, resulting in shutoffs no longer being considered for one or more circuits. We will notify you as conditions change.

There also might be weather-related or other unplanned repair outages in the areas designated for potential Public Safety Power Shutoffs. Information on these unplanned outages can be found at [sce.com/outage](https://www.sce.com/outage).

**Recommended Language to Share with the Public:** Weather conditions have changed and we are providing an updated status for all circuits with potential for power shutoff in your area. Check your email for details and visit [sce.com/PSPS](https://www.sce.com/PSPS).

### Web and Maps

Southern California Edison LNO Circuit List with Periods of Concern  
As of 11/16/2020 Circuit List All Counties Report #2

Note 1: Restoration activities begin as soon as conditions improve and it is safe for crews to begin inspections.  
Note 2: Estimated Restoration Times may be delayed if damage is found or if weather conditions change.  
Note 3: 72-hour notification information is for local government and agency planning use only. Customer notifications begin at 48 hours.  
Note 4: Approximate customer counts are calculated by circuit, regardless of jurisdiction. If a circuit crosses jurisdictional boundaries, the total customer counts for that circuit are included for each jurisdiction. See [sca.com/safety/wildfire/paps](http://sca.com/safety/wildfire/paps) for total customer counts by county.  
Note 5: Please refer to Definitions tab for additional information.  
Note 6: Any circuits on the list that do not display period of concern times means those circuits have periods of concern that start beyond the time periods shown. Watch for more on subsequent reports.

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

Due to weather conditions, SCE conducted a Public Safety Power Shutoff (PSPS) to circuits in your county. Impacted circuits and locations are:

- **Circuit: GRAPEVINE PEAK**
- **County: KERN**
- **Segment: ALL SEGMENTS**
- **Unincorporated County Area: Along Grapevine Creek South of Grapevine City**
- **De-Energized Date: 11/16/2020**
- **De-Energized Time: 2027**

•  
**Circuit segments may be viewed at [sce.com/psps](https://www.sce.com/psps) and maps downloaded at [sce.com/maps](https://www.sce.com/maps).**

SCE is also notifying customers on the affected circuits to inform them about the shutoff. SCE understands the inconvenience of shutting off electric service. Safety is SCE's first priority. This Public Safety Power Shutoff (PSPS) action was taken with the safety of our customers and the public in mind, and to maintain the integrity of the electric system for all of our customers.

SCE has an Incident Management Team (IMT) is in place to monitor conditions, coordinate with government agencies, and oversee re-energization once conditions are safe.

**Power will be restored as weather conditions improve, crews conduct inspections, any necessary repairs have been made, and we determine it is safe to re-energize lines. In most cases, power will be restored within 24 hours from the end of the period of concern for the electrical circuit.**

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to PSPS, know that SCE crews are working as safely and quickly as possible to restore service. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

**Recommended Language to Share with the Public:** Due to current weather conditions, SCE has shut off power in your area. Check your email for details and visit [www.sce.com/PSPS](https://www.sce.com/PSPS).

**Importance:** High

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

Due to current weather conditions, SCE may need to shut off power (a Public Safety Power Shutoff or PSPS) in the next 1 to 4 hours to reduce the risk of wildfire ignition though the PSPS may occur earlier or later depending on actual weather conditions. Areas that may be impacted include:

- **Circuit: METTLER**
- **County: KERN**
- **Segment: 3**
- **Unincorporated County Area: Bear Valley Springs; Cummings Valley; Highline Rd**

Circuit segments may be viewed at [sce.com/pmps](https://www.sce.com/pmps) and maps downloaded at [sce.com/maps](https://www.sce.com/maps).

**This Imminent De-Energization warning expires after four hours.** If one or more circuits listed here are de-energized by SCE due to PSPS, a De-Energized notification confirming date and time of the PSPS event will be sent. However, **if this imminent notice expires without de-energization, the listed circuit(s) remain on SCE's monitor list and subject to PSPS.**

SCE's Incident Management Team (IMT) is in place to monitor conditions, coordinate with government agencies, and oversee re-energization once conditions are safe. SCE will provide an update to your agency as conditions change. Erratic or sudden onset of hazardous conditions that jeopardize public safety may impact SCE's ability to provide advanced notice to customers. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential PSPS events for this county. Additional targeted notifications provide alerts with all time-sensitive de-energize or re-energize information.

**Recommended Language to Share with the Public:** Due to current weather conditions, SCE may shut off the power on specific circuits within the next 1-4 hours. Check your email for details and visit [www.sce.com/PSPS](https://www.sce.com/PSPS).

**To:** SCE Liaison Officer  
**Subject:** Important: SCE De-Energize Notice for PSPS Event in KERN County at 0939.  
**Importance:** High

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

Due to weather conditions, SCE conducted a Public Safety Power Shutoff (PSPS) to circuits in your county. Impacted circuits and locations are:

- **Circuit: CUDDEBACK**
- **County: KERN**
- **Segment: 1**
- **Unincorporated County Area: Golden Hills; Along SR 202 in Kern Co.**
- **De-Energized Date: 11/16/2020**
- **De-Energized Time: 0939**

**Circuit segments may be viewed at [sce.com/psps](https://www.sce.com/psps) and maps downloaded at [sce.com/maps](https://www.sce.com/maps).**

SCE is also notifying customers on the affected circuits to inform them about the shutoff. SCE understands the inconvenience of shutting off electric service. Safety is SCE's first priority. This Public Safety Power Shutoff (PSPS) action was taken with the safety of our customers and the public in mind, and to maintain the integrity of the electric system for all of our customers.

SCE has an Incident Management Team (IMT) in place to monitor conditions, coordinate with government agencies, and oversee re-energization once conditions are safe.

**Power will be restored as weather conditions improve, crews conduct inspections, any necessary repairs have been made, and we determine it is safe to re-energize lines. In most cases, power will be restored within 24 hours from the end of the period of concern for the electrical circuit.**

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to PSPS, know that SCE crews are working as safely and quickly as possible to restore service. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

**Recommended Language to Share with the Public:** Due to current weather conditions, SCE has shut off power in your area. Check your email for details and visit [www.sce.com/PSPS](https://www.sce.com/PSPS).

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

***Please refer to the attached file for UPDATED status and periods of concern for specific circuits in your county.***

Due to weather conditions, SCE may need to shut off power (a Public Safety Power Shutoff or PSPS) to electrical circuits in High Fire Risk Areas (HFRA) serving portions of some cities and/or unincorporated areas in **TUOLUMNE County**. SCE is also notifying customers on the affected circuits about the potential for shutoff, giving them time to prepare.

SCE's Incident Management Team continues to monitor the weather in real time. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential Public Safety Power Shutoffs. Additional targeted notifications will also be sent, as needed, to provide time-sensitive de-energize or re-energize information. Erratic or sudden onset of hazardous conditions that jeopardize public safety may impact SCE's ability to provide advanced notice to customers. A shutoff could occur sooner than anticipated, additional circuits could be impacted, or conditions could change, resulting in shutoffs no longer being considered for one or more circuits. We will notify you as conditions change.

There also might be weather-related or other unplanned repair outages in the areas designated for potential Public Safety Power Shutoffs. Information on these unplanned outages can be found at [sce.com/outage](https://www.sce.com/outage).

**Recommended Language to Share with the Public:** Weather conditions have changed and we are providing an updated status for all circuits with potential for power shutoff in your area. Check your email for details and visit [sce.com/PSPS](https://www.sce.com/PSPS).

Southern California Edison LNO Circuit List with Periods of Concern  
As of 11/16/2020 Circuit List All Counties Report #1

Note 1: Restoration activities begin as soon as conditions improve and it is safe for crews to begin inspections.  
Note 2: Estimated Restoration Times may be delayed if damage is found or if weather conditions change.  
Note 3: 72-hour notification information is for local government and agency planning use only. Customer notifications begin at 48 hours.  
Note 4: Approximate customer counts are calculated by circuit, regardless of jurisdiction. If a circuit crosses jurisdictional boundaries, the total customer counts for that circuit are included for each jurisdiction. See sce.com/safety/wildfire/pssp for total customer counts by county.  
Note 5: Please refer to Definitions tab for additional information.  
Note 6: Any circuits on the list that do not display period of concern times means those circuits have periods of concern that start beyond the time periods shown. Watch for more on subsequent reports.

Southern California Edison LNO Circuit List with Periods of Concern  
As of 11/16/2020 Circuit List All Counties Report #1

Note 1: Restoration activities begin as soon as conditions improve and it is safe for crews to begin inspections.  
Note 2: Estimated Restoration Times may be delayed if damage is found or if weather conditions change.  
Note 3: 72-hour notification information is for local government and agency planning use only. Customer notifications begin at 48 hours.  
Note 4: Approximate customer counts are calculated by circuit, regardless of jurisdiction. If a circuit crosses jurisdictional boundaries, the total customer counts for that circuit are included for each jurisdiction. See [sca.com/safety/wildfire/paps](http://sca.com/safety/wildfire/paps) for total customer counts by county.  
Note 5: Please refer to Definitions tab for additional information.  
Note 6: Any circuits on the list that do not display period of concern times means those circuits have periods of concern that start beyond the time periods shown. Watch for more on subsequent reports.

**To:** SCE Liaison Officer  
**Subject:** Important: SCE Update Notice for PSPS Event in MONO County.  
**Attachments:** SCE+LNO+POC+MONO+County+2020-11-16+Rpt+1.xlsx

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

***Please refer to the attached file for UPDATED status and periods of concern for specific circuits in your county.***

Due to weather conditions, SCE may need to shut off power (a Public Safety Power Shutoff or PSPS) to electrical circuits in High Fire Risk Areas (HFRA) serving portions of some cities and/or unincorporated areas in **MONO County**. SCE is also notifying customers on the affected circuits about the potential for shutoff, giving them time to prepare.

SCE's Incident Management Team continues to monitor the weather in real time. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential Public Safety Power Shutoffs. Additional targeted notifications will also be sent, as needed, to provide time-sensitive de-energize or re-energize information. Erratic or sudden onset of hazardous conditions that jeopardize public safety may impact SCE's ability to provide advanced notice to customers. A shutoff could occur sooner than anticipated, additional circuits could be impacted, or conditions could change, resulting in shutoffs no longer being considered for one or more circuits. We will notify you as conditions change.

There also might be weather-related or other unplanned repair outages in the areas designated for potential Public Safety Power Shutoffs. Information on these unplanned outages can be found at [sce.com/outage](https://www.sce.com/outage).

**Recommended Language to Share with the Public:** Weather conditions have changed and we are providing an updated status for all circuits with potential for power shutoff in your area. Check your email for details and visit [sce.com/PSPS](https://www.sce.com/PSPS).

### Web and Maps

- PDFs of High Fire Risk Area (HFRA) circuit maps and GIS layers may be found, by county, at [sce.com/maps](https://www.sce.com/maps).

**Subject:** Important: SCE Imminent De-Energize Notice for PSPS Event in KERN County at 0313.  
**Importance:** High

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

Due to current weather conditions, SCE may need to shut off power (a Public Safety Power Shutoff or PSPS) in the next 1 to 4 hours to reduce the risk of wildfire ignition though the PSPS may occur earlier or later depending on actual weather conditions. Areas that may be impacted include:

- **Circuit: TENNECO**
- **County: KERN**
- **Segment: 5,6,7,8 9**
- **Unincorporated County Area: Pine Mountain Club ; Pinon Pines Estate; Lake of the Woods; Frazier Park**

Circuit segments may be viewed at [sce.com/psps](https://www.sce.com/psps) and maps downloaded at [sce.com/maps](https://www.sce.com/maps).

**This Imminent De-Energization warning expires after four hours.** If one or more circuits listed here are de-energized by SCE due to PSPS, a De-Energized notification confirming date and time of the PSPS event will be sent. However, **if this imminent notice expires without de-energization, the listed circuit(s) remain on SCE's monitor list and subject to PSPS.**

SCE's Incident Management Team (IMT) is in place to monitor conditions, coordinate with government agencies, and oversee re-energization once conditions are safe. SCE will provide an update to your agency as conditions change. Erratic or sudden onset of hazardous conditions that jeopardize public safety may impact SCE's ability to provide advanced notice to customers. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential PSPS events for this county. Additional targeted notifications provide alerts with all time-sensitive de-energize or re-energize information.

**Recommended Language to Share with the Public:** Due to current weather conditions, SCE may shut off the power on specific circuits within the next 1-4 hours. Check your email for details and visit [www.sce.com/PSPS](https://www.sce.com/PSPS).

**To:** SCE Liaison Officer  
**Subject:** Important: SCE Imminent De-Energize Notice for PSPS Event in LOS ANGELES County.  
**Importance:** High

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

Due to current weather conditions, SCE may need to shut off power (a Public Safety Power Shutoff or PSPS) in the next 1 to 4 hours to reduce the risk of wildfire ignition though the PSPS may occur earlier or later depending on actual weather conditions. Areas that may be impacted include:

- **Circuit: SHOVEL**
- **County: LOS ANGELES**
- **Segment: 3**

• **Circuit segments may be viewed at [sce.com/pmps](https://www.sce.com/pmps) and maps downloaded at [sce.com/maps](https://www.sce.com/maps).**

**This Imminent De-Energization warning expires after four hours.** If one or more circuits listed here are de-energized by SCE due to PSPS, a De-Energized notification confirming date and time of the PSPS event will be sent. However, **if this imminent notice expires without de-energization, the listed circuit(s) remain on SCE's monitor list and subject to PSPS.**

SCE's Incident Management Team (IMT) is in place to monitor conditions, coordinate with government agencies, and oversee re-energization once conditions are safe. SCE will provide an update to your agency as conditions change. Erratic or sudden onset of hazardous conditions that jeopardize public safety may impact SCE's ability to provide advanced notice to customers. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential PSPS events for this county. Additional targeted notifications provide alerts with all time-sensitive de-energize or re-energize information.

**Recommended Language to Share with the Public:** Due to current weather conditions, SCE may shut off the power on specific circuits within the next 1-4 hours. Check your email for details and visit [www.sce.com/PSPS](https://www.sce.com/PSPS).

### Web and Maps

**Subject:** Important: SCE De-Energize Notice for PSPS Event in Mono County at 0746  
**Importance:** High

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

Due to weather conditions, SCE conducted a Public Safety Power Shutoff (PSPS) to circuits in your county. Impacted circuits and locations are:

- **Circuit: TUFA**
- **County: MONO**
- **Segment: 2**
- **Unincorporated County Area: Chinatown; Mono City; and Mono Lake**
- **De-Energized Date: 11/17/2020**
- **De-Energized Time: 07:46**

**Circuit segments may be viewed at [sce.com/psps](https://www.sce.com/psps) and maps downloaded at [sce.com/maps](https://www.sce.com/maps).**

SCE is also notifying customers on the affected circuits to inform them about the shutoff. SCE understands the inconvenience of shutting off electric service. Safety is SCE's first priority. This Public Safety Power Shutoff (PSPS) action was taken with the safety of our customers and the public in mind, and to maintain the integrity of the electric system for all of our customers.

SCE has an Incident Management Team (IMT) in place to monitor conditions, coordinate with government agencies, and oversee re-energization once conditions are safe.

**Power will be restored as weather conditions improve, crews conduct inspections, any necessary repairs have been made, and we determine it is safe to re-energize lines. In most cases, power will be restored within 24 hours from the end of the period of concern for the electrical circuit.**

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to PSPS, know that SCE crews are working as safely and quickly as possible to restore service. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

**Recommended Language to Share with the Public:** Due to current weather conditions, SCE has shut off power in your area. Check your email for details and visit [www.sce.com/PSPS](https://www.sce.com/PSPS).

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

***Please refer to the attached file for UPDATED status and periods of concern for specific circuits in your county.***

Due to weather conditions, SCE may need to shut off power (a Public Safety Power Shutoff or PSPS) to electrical circuits in High Fire Risk Areas (HFRA) serving portions of some cities and/or unincorporated areas in INYO COUNTY. SCE is also notifying customers on the affected circuits about the potential for shutoff, giving them time to prepare.

SCE's Incident Management Team continues to monitor the weather in real time. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential Public Safety Power Shutoffs. Additional targeted notifications will also be sent, as needed, to provide time-sensitive de-energize or re-energize information. Erratic or sudden onset of hazardous conditions that jeopardize public safety may impact SCE's ability to provide advanced notice to customers. A shutoff could occur sooner than anticipated, additional circuits could be impacted, or conditions could change, resulting in shutoffs no longer being considered for one or more circuits. We will notify you as conditions change.

There also might be weather-related or other unplanned repair outages in the areas designated for potential Public Safety Power Shutoffs. Information on these unplanned outages can be found at [sce.com/outage](https://www.sce.com/outage).

**Recommended Language to Share with the Public:** Weather conditions have changed and we are providing an updated status for all circuits with potential for power shutoff in your area. Check your email for details and visit [sce.com/PSPS](https://www.sce.com/PSPS).

### Web and Maps

- PDFs of High Fire Risk Area (HFRA) circuit maps and GIS layers may be found, by county, at [sce.com/maps](https://www.sce.com/maps).

Southern California Edison LNO Circuit List with Periods of Concern  
As of 11/17/2020 Circuit List All Counties Report #1

Note 1: Restoration activities begin as soon as conditions improve and it is safe for crews to begin inspections.  
Note 2: Estimated Restoration Times may be delayed if damage is found or if weather conditions change.  
Note 3: 72-hour notification information is for local government and agency planning use only. Customer notifications begin at 48 hours.  
Note 4: Approximate customer counts are calculated by circuit, regardless of jurisdiction. If a circuit crosses jurisdictional boundaries, the total customer counts for that circuit are included for each jurisdiction. See [sca.com/safety/wildfire/paps](http://sca.com/safety/wildfire/paps) for total customer counts by county.  
Note 5: Please refer to Definitions tab for additional information.  
Note 6: Any circuits on the list that do not display period of concern times means those circuits have periods of concern that start beyond the time periods shown. Watch for more on subsequent reports.

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

***Please refer to the attached file for UPDATED status and periods of concern for specific circuits in your county.***

Due to weather conditions, SCE may need to shut off power (a Public Safety Power Shutoff or PSPS) to electrical circuits in High Fire Risk Areas (HFRA) serving portions of some cities and/or unincorporated areas in LOS ANGELES COUNTY. SCE is also notifying customers on the affected circuits about the potential for shutoff, giving them time to prepare.

SCE's Incident Management Team continues to monitor the weather in real time. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential Public Safety Power Shutoffs. Additional targeted notifications will also be sent, as needed, to provide time-sensitive de-energize or re-energize information. Erratic or sudden onset of hazardous conditions that jeopardize public safety may impact SCE's ability to provide advanced notice to customers. A shutoff could occur sooner than anticipated, additional circuits could be impacted, or conditions could change, resulting in shutoffs no longer being considered for one or more circuits. We will notify you as conditions change.

There also might be weather-related or other unplanned repair outages in the areas designated for potential Public Safety Power Shutoffs. Information on these unplanned outages can be found at [sce.com/outage](https://www.sce.com/outage).

**Recommended Language to Share with the Public:** Weather conditions have changed and we are providing an updated status for all circuits with potential for power shutoff in your area. Check your email for details and visit [sce.com/PSPS](https://www.sce.com/PSPS).

### Web and Maps

Southern California Edison LNO Circuit List with Periods of Concern  
As of 11/17/2020 Circuit List All Counties Report #1

Note 1: Restoration activities begin as soon as conditions improve and it is safe for crews to begin inspections.  
Note 2: Estimated Restoration Times may be delayed if damage is found or if weather conditions change.  
Note 3: 72-hour notification information is for local government and agency planning use only. Customer notifications begin at 48 hours.  
Note 4: Approximate customer counts are calculated by circuit, regardless of jurisdiction. If a circuit crosses jurisdictional boundaries, the total customer counts for that circuit are included for each jurisdiction. See sce.com/safety/wildfire/paps for total customer counts by county.  
Note 5: Please refer to Definitions tab for additional information.  
Note 6: Any circuits on the list that do not display period of concern times means those circuits have periods of concern that start beyond the time periods shown. Watch for more on subsequent reports.

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

***Please refer to the attached file for UPDATED status and periods of concern for specific circuits in your county.***

Due to weather conditions, SCE may need to shut off power (a Public Safety Power Shutoff or PSPS) to electrical circuits in High Fire Risk Areas (HFRA) serving portions of some cities and/or unincorporated areas in TUOLUMNE COUNTY. SCE is also notifying customers on the affected circuits about the potential for shutoff, giving them time to prepare.

SCE's Incident Management Team continues to monitor the weather in real time. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential Public Safety Power Shutoffs. Additional targeted notifications will also be sent, as needed, to provide time-sensitive de-energize or re-energize information. Erratic or sudden onset of hazardous conditions that jeopardize public safety may impact SCE's ability to provide advanced notice to customers. A shutoff could occur sooner than anticipated, additional circuits could be impacted, or conditions could change, resulting in shutoffs no longer being considered for one or more circuits. We will notify you as conditions change.

There also might be weather-related or other unplanned repair outages in the areas designated for potential Public Safety Power Shutoffs. Information on these unplanned outages can be found at [sce.com/outage](https://www.sce.com/outage).

**Recommended Language to Share with the Public:** Weather conditions have changed and we are providing an updated status for all circuits with potential for power shutoff in your area. Check your email for details and visit [sce.com/PSPS](https://www.sce.com/PSPS).

### Web and Maps

**Importance:** High

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

Due to current weather conditions, SCE may need to shut off power (a Public Safety Power Shutoff or PSPS) in the next 1 to 4 hours to reduce the risk of wildfire ignition though the PSPS may occur earlier or later depending on actual weather conditions. Areas that may be impacted include:

- **Circuit: SHOVEL**
- **County: LOS ANGELES**
- **Segment: 3**
- **Incorporated City: Palmdale**
- **Unincorporated County Area: Escondido Canyon Rd between Aqua Dulce Canyon and Acton ; Kashmere Canyon ; Boiling Point**

Circuit segments may be viewed at [sce.com/psps](https://www.sce.com/psps) and maps downloaded at [sce.com/maps](https://www.sce.com/maps).

**This Imminent De-Energization warning expires after four hours.** If one or more circuits listed here are de-energized by SCE due to PSPS, a De-Energized notification confirming date and time of the PSPS event will be sent. However, **if this imminent notice expires without de-energization, the listed circuit(s) remain on SCE's monitor list and subject to PSPS.**

SCE's Incident Management Team (IMT) is in place to monitor conditions, coordinate with government agencies, and oversee re-energization once conditions are safe. SCE will provide an update to your agency as conditions change. Erratic or sudden onset of hazardous conditions that jeopardize public safety may impact SCE's ability to provide advanced notice to customers. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential PSPS events for this county. Additional targeted notifications provide alerts with all time-sensitive de-energize or re-energize information.

**Recommended Language to Share with the Public:** Due to current weather conditions, SCE may shut off the power on specific circuits within the next 1-4 hours. Check your email for details and visit [www.sce.com/PSPS](https://www.sce.com/PSPS).

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

Due to current weather conditions, SCE may need to shut off power (a Public Safety Power Shutoff or PSPS) in the next 1 to 4 hours to reduce the risk of wildfire ignition though the PSPS may occur earlier or later depending on actual weather conditions. Areas that may be impacted include:

- **Circuit: BIRCHIM**
- **County: Inyo & Mono**
- **Segments: 3, 4, 5**
- **Unincorporated County Areas (INYO): Round Valley ; Scheelite ; Mesa ; West Bishop ; east of Grouse Mountain**
- **Unincorporated County Areas (MONO): Paradise ; Portion of Swall Meadows**

Circuit segments may be viewed at [sce.com/psps](https://www.sce.com/psps) and maps downloaded at [sce.com/maps](https://www.sce.com/maps).

**This Imminent De-Energization warning expires after four hours.** If one or more circuits listed here are de-energized by SCE due to PSPS, a De-Energized notification confirming date and time of the PSPS event will be sent. However, **if this imminent notice expires without de-energization, the listed circuit(s) remain on SCE's monitor list and subject to PSPS.**

SCE's Incident Management Team (IMT) is in place to monitor conditions, coordinate with government agencies, and oversee re-energization once conditions are safe. SCE will provide an update to your agency as conditions change. Erratic or sudden onset of hazardous conditions that jeopardize public safety may impact SCE's ability to provide advanced notice to customers. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential PSPS events for this county. Additional targeted notifications provide alerts with all time-sensitive de-energize or re-energize information.

**Recommended Language to Share with the Public:** Due to current weather conditions, SCE may shut off the power on specific circuits within the next 1-4 hours. Check your email for details and visit [www.sce.com/PSPS](http://www.sce.com/PSPS).

**Importance:** High

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

Due to weather conditions, SCE conducted a Public Safety Power Shutoff (PSPS) to circuits in your county. Impacted circuits and locations are:

- **Circuit: SHOVEL**
- **County: LOS ANGELES**
- **Segment: 3**
- **Incorporated City: Palmdale**
- **Unincorporated County Area: Escondido Canyon Rd between Aqua Dulce Canyon and Acton ; Kashmere Canyon ; Boiling Point**
- **De-Energized Date: 11/17/2020**
- **De-Energized Time: 12:06**

**Circuit segments may be viewed at [sce.com/psps](https://www.sce.com/psps) and maps downloaded at [sce.com/maps](https://www.sce.com/maps).**

SCE is also notifying customers on the affected circuits to inform them about the shutoff. SCE understands the inconvenience of shutting off electric service. Safety is SCE's first priority. This Public Safety Power Shutoff (PSPS) action was taken with the safety of our customers and the public in mind, and to maintain the integrity of the electric system for all of our customers.

SCE has an Incident Management Team (IMT) is in place to monitor conditions, coordinate with government agencies, and oversee re-energization once conditions are safe.

**Power will be restored as weather conditions improve, crews conduct inspections, any necessary repairs have been made, and we determine it is safe to re-energize lines. In most cases, power will be restored within 24 hours from the end of the period of concern for the electrical circuit.**

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to PSPS, know that SCE crews are working as safely and quickly as possible to restore service. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

**Recommended Language to Share with the Public:** Due to current weather conditions, SCE has shut off power in your area. Check your email for details and visit [www.sce.com/PSPS](https://www.sce.com/PSPS).

**Subject:** Important: SCE De-Energize Notice for PSPS Event in Los Angeles County at 12:56.

**Importance:** High

**Follow Up Flag:** Follow up  
**Flag Status:** Completed

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

Due to weather conditions, SCE conducted a Public Safety Power Shutoff (PSPS) to circuits in your county. Impacted circuits and locations are:

- **Circuit: SAND CANYON**
- **County: Los Angeles**
- **Segment: 3**
- **Incorporated City of: Santa Clarita**
- **Unincorporated County Area: Agua Dulce Canyon ; Mint Canyon south of Mint Canyon Elementary school going south on Sand Canyon Rd ; Sand Canyon ; Soledad Canyon ; Long Canyon ; Russ ; Lang ; Magic Mountain ; North Fork Ranger Station Water Pump**
- **De-Energized Date: 11/17/2020**
- **De-Energized Time: 12:56**

**Circuit segments may be viewed at [sce.com/psps](https://www.sce.com/psps) and maps downloaded at [sce.com/maps](https://www.sce.com/maps).**

SCE is also notifying customers on the affected circuits to inform them about the shutoff. SCE understands the inconvenience of shutting off electric service. Safety is SCE's first priority. This Public Safety Power Shutoff (PSPS) action was taken with the safety of our customers and the public in mind, and to maintain the integrity of the electric system for all of our customers.

SCE has an Incident Management Team (IMT) in place to monitor conditions, coordinate with government agencies, and oversee re-energization once conditions are safe.

**Power will be restored as weather conditions improve, crews conduct inspections, any necessary repairs have been made, and we determine it is safe to re-energize lines. In most cases, power will be restored within 24 hours from the end of the period of concern for the electrical circuit.**

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to PSPS, know that SCE crews are working as safely and quickly as possible to restore service. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

**Recommended Language to Share with the Public:** Due to current weather conditions, SCE has shut off power in your area. Check your email for details and visit [www.sce.com/PSPS](http://www.sce.com/PSPS).

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

SCE crews have inspected the lines, made any necessary repairs, and determined it was safe to **PARTIALLY RE-ENERGIZE** the following circuit(s):

- **Circuit: SHOVEL**
- **Segment: 3 (partial, 110 customers)**
- **County: Los Angeles**
- **Incorporated City of: Palmdale**
- **Unincorporated County Area: Escondido Canyon Rd between Aqua Dulce Canyon and Acton ; Kashmere Canyon ; Boiling Point**
- **Re-Energized Date: 11/17/2020**
- **Re-Energized Time: 14:46**

SCE is also notifying customers that power has been turned back on. SCE's Incident Management Team will continue to monitor conditions and coordinate with government agencies.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to a PSPS, know that SCE crews are working as safely and quickly as possible to restore service. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential PSPS events for this county. Additional targeted notifications provide alerts with all time-sensitive de-energize or re-energize information.

**Recommended Language to Share with the Public:** SCE is turning the power back on in your area. We have inspected our electrical lines and equipment, made any necessary repairs, and determined it is safe to turn on the power. This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

***Please refer to the attached file for UPDATED status and periods of concern for specific circuits in your county.***

Due to weather conditions, SCE may need to shut off power (a Public Safety Power Shutoff or PSPS) to electrical circuits in High Fire Risk Areas (HFRA) serving portions of some cities and/or unincorporated areas in **TUOLUMNE County**. SCE is also notifying customers on the affected circuits about the potential for shutoff, giving them time to prepare.

SCE's Incident Management Team continues to monitor the weather in real time. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential Public Safety Power Shutoffs. Additional targeted notifications will also be sent, as needed, to provide time-sensitive de-energize or re-energize information. Erratic or sudden onset of hazardous conditions that jeopardize public safety may impact SCE's ability to provide advanced notice to customers. A shutoff could occur sooner than anticipated, additional circuits could be impacted, or conditions could change, resulting in shutoffs no longer being considered for one or more circuits. We will notify you as conditions change.

There also might be weather-related or other unplanned repair outages in the areas designated for potential Public Safety Power Shutoffs. Information on these unplanned outages can be found at [sce.com/outage](https://www.sce.com/outage).

**Recommended Language to Share with the Public:** Weather conditions have changed and we are providing an updated status for all circuits with potential for power shutoff in your area. Check your email for details and visit [sce.com/PSPS](https://www.sce.com/PSPS).

### Web and Maps

Southern California Edison LNO Circuit List with Periods of Concern  
As of 11/17/2020 Circuit List All Counties Report #2

Note 1: Restoration activities begin as soon as conditions improve and it is safe for crews to begin inspections.  
Note 2: Estimated Restoration Times may be delayed if damage is found or if weather conditions change.  
Note 3: 72-hour notification information is for local government and agency planning use only. Customer notifications begin at 48 hours.  
Note 4: Approximate customer counts are calculated by circuit, regardless of jurisdiction. If a circuit crosses jurisdictional boundaries, the total customer counts for that circuit are included for each jurisdiction. See sce.com/safety/wildfire/paps for total customer counts by county.  
Note 5: Please refer to Definitions tab for additional information.  
Note 6: Any circuits on the list that do not display period of concern times means those circuits have periods of concern that start beyond the time periods shown. Watch for more on subsequent reports.

Due to weather conditions, SCE may need to shut off power (a Public Safety Power Shutoff or PSPS) to electrical circuits in High Fire Risk Areas (HFRA) serving portions of some cities and/or unincorporated areas in **INYO County**. SCE is also notifying customers on the affected circuits about the potential for shutoff, giving them time to prepare.

SCE's Incident Management Team continues to monitor the weather in real time. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential Public Safety Power Shutoffs. Additional targeted notifications will also be sent, as needed, to provide time-sensitive de-energize or re-energize information. Erratic or sudden onset of hazardous conditions that jeopardize public safety may impact SCE's ability to provide advanced notice to customers. A shutoff could occur sooner than anticipated, additional circuits could be impacted, or conditions could change, resulting in shutoffs no longer being considered for one or more circuits. We will notify you as conditions change.

There also might be weather-related or other unplanned repair outages in the areas designated for potential Public Safety Power Shutoffs. Information on these unplanned outages can be found at [sce.com/outage](https://www.sce.com/outage).

**Recommended Language to Share with the Public:** Weather conditions have changed and we are providing an updated status for all circuits with potential for power shutoff in your area. Check your email for details and visit [sce.com/PSPS](https://www.sce.com/PSPS).

Southern California Edison LNO Circuit List with Periods of Concern  
As of 11/17/2020 Circuit List All Counties Report #2

Note 1: Restoration activities begin as soon as conditions improve and it is safe for crews to begin inspections.  
Note 2: Estimated Restoration Times may be delayed if damage is found or if weather conditions change.  
Note 3: 72-hour notification information is for local government and agency planning use only. Customer notifications begin at 48 hours.  
Note 4: Approximate customer counts are calculated by circuit, regardless of jurisdiction. If a circuit crosses jurisdictional boundaries, the total customer counts for that circuit are included for each jurisdiction. See [sca.com/safety/wildfire/paps](http://sca.com/safety/wildfire/paps) for total customer counts by county.  
Note 5: Please refer to Definitions tab for additional information.  
Note 6: Any circuits on the list that do not display period of concern times means those circuits have periods of concern that start beyond the time periods shown. Watch for more on subsequent reports.

Circuit Name	County	Incorporated City/Cities	Unincorporated Communities	Circuit Notification Status	Comments	De-Energ / Re-Energ Date	De-Energ / Re-Energ Time	Est. Reston. **Importance:** High

**Follow Up Flag:** Follow up  
**Flag Status:** Completed

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

Due to weather conditions, SCE conducted a Public Safety Power Shutoff (PSPS) to circuits in your county. Impacted circuits and locations are:

- **Circuit: REVERSE PEAK**
- **County: MONO**
- **Segment: 3**
- **Unincorporated County Area: June Lake Village and Loop ; Crestview**
- **De-Energized Date: 11/17/2020**
- **De-Energized Time: 2046**
- **Circuit segments may be viewed at [sce.com/psps](https://www.sce.com/psps) and maps downloaded at [sce.com/maps](https://www.sce.com/maps).**

SCE is also notifying customers on the affected circuits to inform them about the shutoff. SCE understands the inconvenience of shutting off electric service. Safety is SCE's first priority. This Public Safety Power Shutoff (PSPS) action was taken with the safety of our customers and the public in mind, and to maintain the integrity of the electric system for all of our customers.

SCE has an Incident Management Team (IMT) is in place to monitor conditions, coordinate with government agencies, and oversee re-energization once conditions are safe.

**Power will be restored as weather conditions improve, crews conduct inspections, any necessary repairs have been made, and we determine it is safe to re-energize lines. In most cases, power will be restored within 24 hours from the end of the period of concern for the electrical circuit.**

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to PSPS, know that SCE crews are working as safely and quickly as possible to restore service. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

**Recommended Language to Share with the Public:** Due to current weather conditions, SCE has shut off power in your area. Check your email for details and visit [www.sce.com/PSPS](https://www.sce.com/PSPS).

***Please refer to the attached file for UPDATED status and periods of concern for specific circuits in your county.***

Due to weather conditions, SCE may need to shut off power (a Public Safety Power Shutoff or PSPS) to electrical circuits in High Fire Risk Areas (HFRA) serving portions of some cities and/or unincorporated areas in MONO COUNTY. SCE is also notifying customers on the affected circuits about the potential for shutoff, giving them time to prepare.

SCE's Incident Management Team continues to monitor the weather in real time. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential Public Safety Power Shutoffs. Additional targeted notifications will also be sent, as needed, to provide time-sensitive de-energize or re-energize information. Erratic or sudden onset of hazardous conditions that jeopardize public safety may impact SCE's ability to provide advanced notice to customers. A shutoff could occur sooner than anticipated, additional circuits could be impacted, or conditions could change, resulting in shutoffs no longer being considered for one or more circuits. We will notify you as conditions change.

There also might be weather-related or other unplanned repair outages in the areas designated for potential Public Safety Power Shutoffs. Information on these unplanned outages can be found at [sce.com/outage](https://www.sce.com/outage).

**Recommended Language to Share with the Public:** Weather conditions have changed and we are providing an updated status for all circuits with potential for power shutoff in your area. Check your email for details and visit [sce.com/PSPS](https://www.sce.com/PSPS).

Southern California Edison LNO Circuit List with Periods of Concern  
As of 11/18/2020 Circuit List All Counties Report #1

Note 1: Restoration activities begin as soon as conditions improve and it is safe for crews to begin inspections.  
Note 2: Estimated Restoration Times may be delayed if damage is found or if weather conditions change.  
Note 3: 72-hour notification information is for local government and agency planning use only. Customer notifications begin at 48 hours.  
Note 4: Approximate customer counts are calculated by circuit, regardless of jurisdiction. If a circuit crosses jurisdictional boundaries, the total customer counts for that circuit are included for each jurisdiction. See [sca.com/safety/wildfire/paps](http://sca.com/safety/wildfire/paps) for total customer counts by county.  
Note 5: Please refer to Definitions tab for additional information.  
Note 6: Any circuits on the list that do not display period of concern times means those circuits have periods of concern that start beyond the time periods shown. Watch for more on subsequent reports.

**Subject:** Important: SCE Re-Energize Notice for PSPS Event in Mono County (REVERSE PEAK circuit).  
**Importance:** High

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

SCE crews have inspected the lines, made any necessary repairs, and determined it was safe to **RE-ENERGIZE** the following circuit(s):

- **Circuit: REVERSE PEAK**
- **Segment(s): 3**
- **County: MONO**
- **Unincorporated County Area: June Lake Village and Loop ; Crestview**
- **Re-Energized Date: 11/18/2020**
- **Re-Energized Time: 09:43**

SCE is also notifying customers that power has been turned back on. SCE's Incident Management Team will continue to monitor conditions and coordinate with government agencies.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to a PSPS, know that SCE crews are working as safely and quickly as possible to restore service. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential PSPS events for this county. Additional targeted notifications provide alerts with all time-sensitive de-energize or re-energize information.

**Recommended Language to Share with the Public:** SCE is turning the power back on in your area. We have inspected our electrical lines and equipment, made any necessary repairs, and determined it is safe to turn on the power. Check your email for details and visit [sce.com/PSPS](https://www.sce.com/PSPS).

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

SCE crews have completed inspections, made any necessary repairs, and determined it is safe to begin **RE-ENERGIZING** the following circuit(s) or segments of circuit(s):

- **Circuit: TUFA**
- **Segment(s): 2**
- **County: Mono**
- **Unincorporated County Area: Chinatown ; Mono City ; and Mono Lake**

**Circuit segments may be viewed at [sce.com/psps](https://www.sce.com/psps) and maps downloaded at [sce.com/maps](https://www.sce.com/maps).**

SCE will also begin notifying customers that power will be turned back on. **In most cases, power will be restored within 24 hours from the end of the period of concern for the electrical circuit.** SCE's Incident Management Team will continue to monitor conditions and coordinate with government agencies.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to PSPS, know that SCE crews are working safely and as quickly as possible to restore service. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

**Attachments:** SCE+LNO+Inyo+County+2020-11-18+Rpt+2.xlsx

**Follow Up Flag:** Follow up  
**Flag Status:** Flagged

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

**Please refer to the attached file for UPDATED status and periods of concern for specific circuits in your county.**

Due to weather conditions, SCE may need to shut off power (a Public Safety Power Shutoff or PSPS) to electrical circuits in High Fire Risk Areas (HFRA) serving portions of some cities and/or unincorporated areas in **INYO County**. SCE is also notifying customers on the affected circuits about the potential for shutoff, giving them time to prepare.

SCE's Incident Management Team continues to monitor the weather in real time. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential Public Safety Power Shutoffs. Additional targeted notifications will also be sent, as needed, to provide time-sensitive de-energize or re-energize information. Erratic or sudden onset of hazardous conditions that jeopardize public safety may impact SCE's ability to provide advanced notice to customers. A shutoff could occur sooner than anticipated, additional circuits could be impacted, or conditions could change, resulting in shutoffs no longer being considered for one or more circuits. We will notify you as conditions change.

There also might be weather-related or other unplanned repair outages in the areas designated for potential Public Safety Power Shutoffs. Information on these unplanned outages can be found at [sce.com/outage](https://www.sce.com/outage).

**Recommended Language to Share with the Public:** Weather conditions have changed and we are providing an updated status for all circuits with potential for power shutoff in your area. Check your email for details and visit [sce.com/PSPS](https://www.sce.com/PSPS).

Southern California Edison LNO Circuit List with Periods of Concern

As of 11/18/2020 Circuit List All Counties Report #2

Note 1: Restoration activities begin as soon as conditions improve and it is safe for crews to begin inspections.

Note 2: Estimated Restoration Times may be delayed if damage is found or if weather conditions change.

Note 3: 72-hour notification information is for local government and agency planning use only. Customer notifications begin at 48 hours.

Note 4: Approximate customer counts are calculated by circuit, regardless of jurisdiction. If a circuit crosses jurisdictional boundaries, the total customer counts for that circuit are included for each jurisdiction. See sce.com/safety/wildfire/pops for total customer counts by county.

Note 5: Please refer to Definitions tab for additional information.

Note 6: Any circuits on the list that do not display period of concern times means those circuits have periods of concern that start beyond the time periods shown. Watch for more on subsequent reports.

Circuit Name	County	Incorporated City/Cities	Unincorporated Communities	Circuit Notification Status	Comments	De-Energ / Re-Energ Date	De-Energ / Re-Energ Time	Est. Restor. The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential Public Safety Power Shutoffs. Additional targeted notifications will also be sent, as needed, to provide time-sensitive de-energize or re-energize information. Erratic or sudden onset of hazardous conditions that jeopardize public safety may impact SCE's ability to provide advanced notice to customers. A shutoff could occur sooner than anticipated, additional circuits could be impacted, or conditions could change, resulting in shutoffs no longer being considered for one or more circuits. We will notify you as conditions change.

There also might be weather-related or other unplanned repair outages in the areas designated for potential Public Safety Power Shutoffs. Information on these unplanned outages can be found at [sce.com/outage](https://www.sce.com/outage).

**Recommended Language to Share with the Public:** Weather conditions have changed and we are providing an updated status for all circuits with potential for power shutoff in your area. Check your email for details and visit [sce.com/PSPS](https://www.sce.com/PSPS).

### Web and Maps

Southern California Edison LNO Circuit List with Periods of Concern

As of 11/18/2020 Circuit List All Counties Report #2

Note 1: Restoration activities begin as soon as conditions improve and it is safe for crews to begin inspections.

Note 2: Estimated Restoration Times may be delayed if damage is found or if weather conditions change.

Note 3: 72-hour notification information is for local government and agency planning use only. Customer notifications begin at 48 hours.

Note 4: Approximate customer counts are calculated by circuit, regardless of jurisdiction. If a circuit crosses jurisdictional boundaries, the total customer counts for that circuit are included for each jurisdiction. See sce.com/safety/wildfire/paps for total customer counts by county.

Note 5: Please refer to Definitions tab for additional information.

Note 6: Any circuits on the list that do not display period of concern times means those circuits have periods of concern that start beyond the time periods shown. Watch for more on subsequent reports.

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

**Please refer to the attached file for UPDATED status and periods of concern for specific circuits in your county.**

Due to weather conditions, SCE may need to shut off power (a Public Safety Power Shutoff or PSPS) to electrical circuits in High Fire Risk Areas (HFRA) serving portions of some cities and/or unincorporated areas in **MONO County**. SCE is also notifying customers on the affected circuits about the potential for shutoff, giving them time to prepare.

SCE's Incident Management Team continues to monitor the weather in real time. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential Public Safety Power Shutoffs. Additional targeted notifications will also be sent, as needed, to provide time-sensitive de-energize or re-energize information. Erratic or sudden onset of hazardous conditions that jeopardize public safety may impact SCE's ability to provide advanced notice to customers. This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

SCE crews have completed inspections, made any necessary repairs, and determined it is safe to begin **RE-ENERGIZING** the following circuit(s) or segments of circuit(s):

- **Circuit: Birchim**
- **Segment(s):**
- **County: Inyo**
- **Incorporated City of:**
- **Unincorporated County Area:**

Round Valley ; Scheelite ; Mesa ;  
West Bishop ; east of Grouse  
Mountain

•

**Circuit segments may be viewed at [sce.com/psps](https://www.sce.com/psps) and maps downloaded at [sce.com/maps](https://www.sce.com/maps).**

SCE will also begin notifying customers that power will be turned back on. **In most cases, power will be restored within 24 hours from the end of the period of concern for the electrical circuit.** SCE's Incident Management Team will continue to monitor conditions and coordinate with government agencies.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to PSPS, know that SCE crews are working safely and as quickly as possible to restore service. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

**Recommended Language to Share with the Public:** SCE will begin turning power back on in your area. SCE has inspected its electrical lines and equipment, made any necessary repairs, and determined it is safe to turn on the power. Check your email for details and visit [sce.com/PSPS](https://www.sce.com/PSPS).

**Subject:** Important: SCE Re-Energize Notice for PSPS Event in Mono County.

**Importance:** High

**Follow Up Flag:** Follow up

**Flag Status:** Flagged

[Please click here to acknowledge receipt of this message](#)

This message is from the Southern California Edison Liaison Officer for official use by local / tribal governments and public safety partners.

SCE crews have inspected the lines, made any necessary repairs, and determined it was safe to **RE-ENERGIZE** the following circuit(s):

- **Circuit: Tufa**
- **Segment:**
- **County: Mono**
- **Unincorporated County Area:**

Chinatown ; Mono City ; and Mono Lake

- **Re-Energized Date: 11/18/2020**
- **Re-Energized Time: 21:56**
- SCE is also notifying customers that power has been turned back on. SCE's Incident Management Team will continue to monitor conditions and coordinate with government agencies.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to a PSPS, know that SCE crews are working as safely and quickly as possible to restore service. SCE relies on forecast data provided by in-house meteorologists, fire scientists, and other technical staff. Note that weather forecasts on radio and television may provide different information.

The SCE Liaison Officer typically sends update notifications twice a day, providing a rolling 72-hour advance warning of potential PSPS events for this county. Additional targeted notifications provide alerts with all time-sensitive de-energize or re-energize information.

**Recommended Language to Share with the Public:** SCE is turning the power back on in your area. We have inspected our electrical lines and equipment, made any necessary repairs, and determined it is safe to turn on the power. Check your email for details and visit [sce.com/PSPS](https://www.sce.com/PSPS).

### **Voice/ Voice Mail/TTY:**

This is an important safety message from Southern California Edison. Due to forecast fire weather conditions, SCE is exploring a potential Public Safety Power Shutoff of electrical lines in the ^city\_variable^ area. These conditions may result in SCE turning off your power. SCE anticipates that this may occur on ^Day of week^^Month Day^ though it may occur earlier or later depending on actual weather conditions. We encourage you to prepare by having your resiliency plan ready to execute. SCE will send daily updates until conditions improve. For additional information available, please contact your assigned SCE account representative, go to [SCE.com/psps](http://SCE.com/psps), or call SCE at 1-800-611-1911.
