

Help Shape the Future of Internet:

Broadband Feedback Survey Available Now

Why Your Voice Counts

The California Public Utilities Commission (CPUC) is asking California residents to share their experiences with internet access. Your feedback will help pinpoint areas where service is falling short and guide future broadband improvements. Every response strengthens the accuracy of California's broadband data and mapping, ensuring the tools and resources reflect the real needs of our communities.

How to Participate

- Go to <https://rebrand.ly/broadband-survey>
Feedback can be submitted online, and printed versions are available upon request for households with limited connectivity.
- Go to [How to Submit to the Broadband Public Feedback Survey Webinar](#) for additional information on filling out the survey.
