The existing view to the south toward Vallecito Mountain, from the West Butte of Borrego Mountain in Anza-Borrego Desert State Park (ABDSP). This view also encompasses a portion of Lower Borrego Valley and SR78 (faint horizontal line in the center of the photograph, approximately 2.25 miles distant). The Proposed Project (the blue line shows the approximate route) would be noticeable though somewhat indistinct at a viewing distance ranging from approximately four to six miles (right to left) for the landscape encompassed in the above image.
