A visual simulation of the SWPL Interstate 8 Alternative from Key Viewpoint 53 on westbound Alpine Road, just north of Peutz Valley Road. This view to the northwest captures the Interstate 8 western transition structures at the point where the route spans I-8 and continues aboveground to the north. The structures and conductors would be prominently visible to adjacent residents and travelers on Alpine Road and I-8. Skylining would exacerbate structure prominence and the facilities would introduce additional structural complexity and industrial character into the landscape.
