The existing view to the north-northeast toward the location of the north transition structure for the Buckman Springs Underground Alternative, which would be located east of Interstate 8 in Cottonwood Valley. This view is from Key Viewpoint 57 at the northbound I-8 on-ramp from Buckman Springs Road. The transition structure location would be highly visible to travelers on I-8 (particularly northbound travelers) and travelers entering the freeway (northbound) from the Buckman Springs rest area.
