

Michael Clayton & Associates

The **existing view** to the east-southeast toward proposed structure location SP32, from Grapevine Canyon Road, just west of the State Park boundary. This view encompasses the existing wood-pole transmission line that the Proposed Project would parallel (would not be removed) along this portion of the route. A portion of an existing rural residential property is visible in the lower right corner of the image. There are several rural residences in proximity to the route in upper Grapevine Canyon.
