

Michael Clayton & Associates

A The **existing view** to the south-southwest along SR 78 from westbound SR 78, approximately 0.4 mile west of Kane Springs Road. The simple wood-pole line adjacent to SR 78 indicates the existing ROW within ABDSP.

B This image presents a **visual simulation** of the Overhead 500 kV ABDSP Within Existing 100-foot ROW Alternative in ABDSP. The prominent industrial character of the structures would contrast with the natural forms in the landscape.

Overhead 500 kV ABDSP Existing ROW
