

The **existing view** to the south from Key Viewpoint 70 on Star Valley Road. This view captures the landscape visible to several residences along Star Valley Road and side roads. The Star Valley Option would place a pair of transition structures just south of the bend in Star Valley Road. The view to the south is predominantly natural in appearance with minimal evidence of built features or industrial character. The above-ground portion of this Option would terminate at the transition structures and then pass underground beneath Star Valley Road.
