

Michael Clayton & Associates

The **existing view** to the south toward Penasquitos Canyon Preserve from the Gazebo Overlook Park at the intersection of Carmel Country and Carmel Mountain Roads, in Carmel Valley. This view encompasses SDG&E's proposed location of the Coastal Link route segment within an existing transmission line corridor. The Proposed Project would replace the existing wood-pole H-frame transmission line with a 230 kV, tubular steel pole transmission line. The landscape is suburban in character with residential subdivisions bordering the corridor and Preserve.
