

A **visual simulation** of the Proposed Project from Key Viewpoint 11 on SR 78, approximately 0.7 mile west of Yaqui Pass Road. This view is to the northwest toward proposed structures SP84 and SP85 (left to right) on Yaqui Flat. The proposed structures, conductors, and graded maintenance pads would be prominently visible to travelers on SR 78. The project would introduce industrial character and visual contrast into a landscape that is predominantly natural in appearance. The existing wood pole line would be relocated to an underbuild position.
