

Michael Clayton & Associates

The **existing view** to the southwest down Cameron Valley toward The Narrows and the route of the South Buckman Springs Option. This view is from Key Viewpoint 59 on Cameron Truck Trail, just north of the South Buckman Springs Option's east-west crossing of Cameron Valley. This view captures the predominantly natural appearing landscape of the valley and surrounding ridges. Although there is an existing wood-pole utility line that passes north-south through the valley, its rough-hewn texture and color do not exhibit substantial contrasting industrial character.
