TABLE OF CONTENTS

CalAm Monterey Peninsula Water Supply Project Draft Environmental Impact Report

	List of Acronyms	xiii
	Executive Summary ES.1 Introduction ES.2 Project Background and Objectives ES.3 Description of Proposed Project ES.4 Proposed Project Impact Summary ES.5 Description of MPWSP Variant ES.6 MPWSP Variant Impact Summary ES.7 CEQA Alternatives ES.8 Issues to be Resolved and Areas of Controversy	ES-1 ES-1 ES-5 ES-14 ES-31 ES-32 ES-79 ES-80
1.	Introduction 1.1 Introduction 1.2 Project Setting and Background 1.3 Use of this Document 1.4 CEQA Process	1-1 1-1 1-2 1-5 1-7
2.	 Water Demand, Supplies, and Water Rights 2.1 Introduction 2.2 Background 2.3 CalAm Service Area Demand 2.4 Available Supplies 2.5 Plant Capacity 2.6 Other Supply and Demand Considerations 2.7 Water Rights 	2-1 2-1 2-2 2-7 2-12 2-15 2-22 2-34
3.	 Project Description 3.1 Introduction 3.2 Overview of Existing Water System 3.3 Project Need and Objectives 3.4 Proposed Project Components 3.5 Project Construction 3.6 Project Operations and Maintenance 3.7 Permits, Approvals, and Regulatory Requirements 	3-1 3-1 3-4 3-11 3-12 3-42 3-51 3-57
4.	 Environmental Setting, Impacts, and Mitigation Measures 4.1 Overview 4.2 Geology, Soils, and Seismicity 4.3 Surface Water Hydrology and Water Quality 4.4 Groundwater Resources 4.5 Marine Resources 	4-1 4.1-1 4.1-1 4.2-1 4.3-1 4.4-1

Appendices

- A NOP and NOP Scoping Report
- B1. MPWSP Plant Sizing Data: Various Five- and Ten-Year Normal, Dry, and Maximum Month Demand Scenarios
- B2. State Water Board Final Analysis of the Monterey Peninsula Water Supply Project
- C1. Analysis of Historic and Future Coastal Erosion with Sea Level Rise
- C2. Coastal Water Elevations and Sea Level Rise Scenarios
- C3. Exploratory Borehole Results
- D1. Far-Field Analysis of Brine Discharge
- D2. Brine Discharge Diffuser Analysis
- D3. Water Quality Analysis of the Discharges
- D4. Ocean Plan Compliance Assessment
- E1. Test Slant Well Groundwater Modeling and Analysis CEMEX Active Mining Area
- E2. Monterey Peninsula Water Supply Project Groundwater Modeling and Analysis
- F. Special-status Plant and Wildlife Species Considered
- G. Air Quality and Greenhouse Gas Emissions Calculations
- H. Pure Water Monterey Groundwater Replenishment Project, Project Description
- I. Component Screening Results
- J1. Coastal Water Project EIR Analysis: MPWMD 2006 Estimate of Long-Term Water Needs Compared with Growth Anticipated in Jurisdictions General Plans
- J2. Secondary Effects of Growth

List of Figures

3-1	CalAm Monterey Service Area	3-2
3-2	Project Overview and Index Map	3-5
3-3	Subsurface Slant Wells at CEMEX Active Mining Area	3-18
3-4	Proposed MPWSP Desalination Plant Site	3-21
3-5	MPWSP Desalination Plant Conceptual Site Plan	3-23
3-6	Proposed Conveyance Pipelines in Marina and Sand City	3-29
3-7	Existing and Proposed ASR Facilities	3-33
3-8	Proposed Conveyance Pipelines in Seaside	3-34
3-9	Monterey Pipeline (Western Terminus)	3-35
3-10	Interconnection Improvements for Highway 68 Satellite Water Systems	3-39
3-11	Cross-Sectional View of Subsurface Slant Well	3-45
4.2-1	Geologic Map of the Project Area	4.2-5
4.2-2	Generalized Geologic Cross-Section	4.2-7
4.2-3	Active and Potentially Active Regional Faults	4.2-15
4.2-4	Liquefaction Potential	4.2-24
4.2-5	Landslide Hazard Map	4.2-26
4.2-6	Representative Profile #4a at CEMEX	4.2-61
4.2-7	Representative Profile #4b at CEMEX	4.2-62
4.2-8	Representative Profile #6 at Del Monte Boulevard	4.2-65
4.3-1	Surface Water Resources in the Project Area	4.3-3
4.3-2	Flood Hazards in the Project Area	4.3-9
4.3-3	Areas Subject to Sea Level Rise in the Project Area	4.3-15
4.3-4	Illustrations of Trajectory and Behavior of a Plume Discharge	4.3-24

List of Figures (cont.)

4.3-5	Extent of the Brine-only Plume Based on Average (Chronic) Salinity Levels	
	Above Ambient	4.3-89
4.3-6	Extent of the Brine-only Plume Based on Peak (Acute) Salinity Levels Above Ambient	4.3-90
4.4-1	Groundwater Basins and Areas in the Western Salinas Valley Groundwater	
	Basin	4.4-4
4.4-2	Conceptual Model of Coastal Aquifers	4.4-7
4.4-3	CEMEX Area Geologic Cross Section	4.4-9
4.4-4	Thickness of Salinas Valley Aquitard	4.4-10
4.4-5	Salinas Valley Groundwater Basin - Groundwater Elevations in 180-Foot-	
	Aquifer	4.4-14
4.4-6	Salinas Valley Groundwater Basin - Groundwater Elevations in 400-Foot-	
	Aquifer	4.4-15
4.4-7	Groundwater Flow – Seaside Basin Shallow Zone, July/August 2013	4.4-17
4.4-8	Groundwater Flow – Seaside Basin Deep Zone, July/August 2013	4.4-18
4.4-9	Historic Seawater Intrusion in the Salinas Valley Groundwater Basin - 180-	
	Foot Aquifer	4.4-28
4.4-10	Historic Seawater Intrusion in the Salinas Valley Groundwater Basin - 400-	
	Foot Aquifer	4.4-29
4.4-11	Monitoring Well Locations	4.4-41
4.4-12	Groundwater Model Boundaries	4.4-47
4.4-13	Change in Groundwater Elevations for Dune Sand Aquifer between Project and No Project	4.4-61
4.4-14	Change in Groundwater Elevations for 180-Foot Equivalent Aquifer between	
	Project and No Project	4.4-62
4.4-15	Known Active Wells in the Dune Sand Aquifer, 180-Foot Equivalent Aquifer,	
	or 400-Foot Aquifer within Two Miles of the Proposed Project	4.4-63
4.4-16	Particle Flow Map for the 180-Foot Equivalent Aquifer No Project vs. Project	
	Scenarios	4.4-67
4.4-17	Particle Tracking Near Prunedale	4.4-73
4.4-18	Simulated Groundwater Elevation Changes at Former Fort Ord Plumes	4.4-83
4.5-1	Identified Seafloor Habitats in Study Area	4.5-3
4.6-1a	Vegetation Communities and Potential Wetlands and Waters Within and	
	Immediately Adjacent to the Project Area: Marina Area	4.6-6
4.6-1b	Vegetation Communities and Potential Wetlands and Waters Within and	
	Immediately Adjacent to the Project Area: Sand City North	4.6-7
4.6-1c	Vegetation Communities and Potential Wetlands and Waters Within and	400
4044	Immediately Adjacent to the Project Area: Sand City Area	4.6-8
4.6-1d	Vegetation Communities and Potential Wetlands and Waters Within and	400
101-	Immediately Adjacent to the Project Area: East Seaside Area	4.6-9
4.6-1e	Vegetation Communities and Potential Wetlands and Waters Within and	4 6 40
1 6 14	Immediately Adjacent to the Project Area: Seaside Area	4.6-10
4.6-1f	Vegetation Communities and Potential Wetlands and Waters Within and	1611
1610	Immediately Adjacent to the Project Area: Monterey East Area Vegetation Communities and Potential Wetlands and Waters Within and	4.6-11
4.6-1g	Immediately Adjacent to the Project Area: Monterey Area	4.6-12
4.6-1h	Vegetation Communities and Potential Wetlands and Waters Within and	4.0-12
4.0-111	Immediately Adjacent to the Project Area: Monterey and Unincorporated	
	Monterey County Area	4.6-13
4.6-2a	CNDDB Occurrence Records	4.6-24
