Mr. Lee Palmer
Director, Safety and Enforcement Division
California Public Utilities Commission
505 Van Ness Avenue
San Francisco, CA 94102

SUBJECT: Southern California Edison's May 1, 2020 Response to Directive to Provide Ongoing Information on Planned Service Interruptions

Dear Mr. Palmer:

Southern California Edison (SCE) submits this letter and supporting documentation in response to your April 13 request for SCE to provide, on a two-week rolling basis until further notice, a list of all planned work requiring a temporary power outage scheduled for the next 14 days within its service territory. For this response, the 14-day period is from April 29 to May 12. This information provides a snapshot in time and is accurate as of April 29, the date the data were pulled. However, planned work can be added, cancelled, or modified due to the processing time between submittal and outage switching procedures, outage work requests submitted within the 14-day period, and cancellations or reschedules.

Attached here is a redacted version of SCE's 14-Day Planned Outage Report for April 29 to May 12, 2020. Separately, SCE will submit the full confidential version of this document.

The list of SCE's planned power outages scheduled for the next 14 days will be provided on May 15.

Sincerely,

/s/

Laura Genao
Managing Director, State Regulatory Affairs
Southern California Edison
