May 15, 2020

Mr. Lee Palmer  
Director, Safety and Enforcement Division  
California Public Utilities Commission  
505 Van Ness Avenue  
San Francisco, CA 94102

**SUBJECT: Southern California Edison's May 15, 2020 Response to Directive to Provide Ongoing Information on Planned Service Interruptions**

Dear Mr. Palmer:

Southern California Edison (SCE) submits this letter and supporting documentation in response to your April 13 request for SCE to provide, on a two-week rolling basis until further notice, a list of all planned work requiring a temporary power outage scheduled for the next 14 days within its service territory. For this response, the 14-day period is from May 13 to May 26. This information provides a snapshot in time and is accurate as of May 13, the date the data were pulled. However, planned work can be added, cancelled, or modified due to the processing time between submittal and outage switching procedures, outage work requests submitted within the 14-day period, and cancellations or reschedules.

Attached here is a redacted version of SCE's 14-Day Planned Outage Report for May 13 to May 26, 2020. Separately, SCE will submit the full confidential version of this document.

The list of SCE's planned power outages scheduled for the next 14 days will be provided on May 29.

Sincerely,

/s/

Laura Genao  
Managing Director, State Regulatory Affairs  
Southern California Edison
