Self-Generation Incentive Program (SGIP)

Installers of Battery Backup Systems

The following listings of installers reflect those companies that responded to a survey issued by the California Public Utilities Commission (CPUC). An SGIP applicant is not limited to the installers on this publication. The CPUC makes no endorsement of any of the installers listed in this publication and encourages applicants to receive multiple bids and check references prior to signing any contract.

Contact your program administrator for more information on the SGIP and to inquire about your particular needs and situation.

Pacific Gas & Electric (PG&E)

3fficient

**Company Website:**  www.3fficient.com

**Company Email:**  sales@3fficient.com

**Company Phone:**  (888) 533-3487

**Counties Served:**  Butte, El Dorado, Los Angeles, Riverside, Sacramento, San Diego, San Luis Obispo, Santa Barbara

**Languages Spoken:**  English, Armenian, Spanish

**Active License:**  Yes

**License Number:**  825849

**Building Type:**  Residential Customers

**Housing Type:**  Single-Family Homes

**Resident Type:**  Homeowners

**Familiar with SGIP Equity Resiliency Requirements:**  Yes

**Firm has Experience with Access and Functional Needs Customers:**  No

**Able to serve low-income, medically vulnerable, access and functional needs, tribal, and disadvantaged community customers:**  Yes

**Upfront Financial Assistance Available for Low-Income Customers:**  Yes

**Description of Upfront Financial Assistance:**  Quotes and initial cost saving assessments are available at no cost to the building owner. In some cases, a down payment may be required for preparation of schematic engineering design. Grants, rebates and other incentives are utilized first to bring costs down. PACE loans (and potentially other funding options) are available for project financing. All costs and projected savings are clearly presented and explained prior to signatures.

**Additional Customer Education and Assistance Available:**  Yes

**Description of Additional Customer Education and Assistance:**  Well informed customers provide the best referrals. Before any upgrades are contracted or installed, our customers are trained on their baseline energy use, energy rates and how various building systems impact their usage. We look for low and no cost resources and ways to reduce usage in order to minimize renewable energy systems and costs. We will also review financial impacts and provide tips on further cost savings such as potential tax credits or other resources to benefit them. Before installation, our project managers will review the process with them and ensure all questions are answered before, during and after upgrades. Before completion, our project managers will make sure they understand operations and review how their usage will impact their bills and their comfort as well as any maintenance requirements. Whether we are maintaining our customers installations or not, we like to follow up at regular intervals to see how their lives have improved and provide any additional resources that may help them. Multi-language videos, customer feedback and other resources will be integrated over time.
Additional Detail About Services Offered by the Company: 3fficient is an international award winning clean-tech utility cost savings company. We work with building owners and their tenants to redirect incentives, energy, water and other cost savings back into their business, people and brand. So far, we’ve saved our customers over $1 Billion (and counting). We have been in business over 25 years and are now providing commercial-grade professional energy cost savings to schools, government, tribes, commercial, industrial, multi-family and assisted living clients. We are looking forward to expanding on our initiative to bring a new level of care and service to individual homeowners and tenants in underserved and tribal communities, especially those subject to power safety shutoffs and unreliable utility power.

A1 Sun Inc.

Company Website: http://www.a1suninc.com/

Company Email: info@a1suninc.com

Company Phone: (510) 526-5715

Counties Served: Alameda, Contra Costa, Marin

Languages Spoken: English Only

Active License: Yes

License Number: 891743

Building Type: Residential Customers

Housing Type: Multi-Family Home Properties

Resident Type: Homeowners

Familiar with SGIP Equity Resiliency Requirements: Yes

Firm has Experience with Access and Functional Needs Customers: Yes

Able to serve low-income, medically vulnerable, access and functional needs, tribal, and disadvantaged community customers: Yes

Upfront Financial Assistance Available for Low-Income Customers: No

Description of Upfront Financial Assistance: No Reply

Additional Customer Education and Assistance Available: Yes

Description of Additional Customer Education and Assistance: A1 Sun is developing a supplemental user guide for all its Home Energy Storage customers. The guide covers energy conservation, consumption of various electrical loads, solar recharging, and system details (such as how to switch from time-of-use to fully charge batteries if an outage is expected). We also prepare a detailed 'backup longevity' analysis for each customer (beyond SGIP requirements), detailing how long their batteries are likely to provide power in different utility outage scenarios depending on weather, time of year, and consumption. These are in addition to industry standard proposal and financial analysis materials.

Additional Detail About Services Offered by the Company: A1 Sun is family owned and managed. Our team of knowledgeable installers and design professionals come from within our local community. Our community is our customer base. Our customer base is our best advocate. We are committed to providing the best value for our clients, while benefiting the planet by doing business sustainably. A1 Sun's strives for the highest quality throughout your Home Energy Storage project, all the way from survey and analysis through to designed installation. We want you, as customer, to understand exactly what Home Energy Storage will do for you, how it can meet your goals, and how you should prepare for utility outages. Home Energy Storage can be complicated; A1 Sun will guide you through making the choices that are right for you, without oversimplifying or over-promising. The result is that you will be an informed, prepared owner of a reliable backup power source.

Resident Type: Homeowners

Familiar with SGIP Equity Resiliency Requirements: Yes

Firm has Experience with Access and Functional Needs Customers: Yes

Able to serve low-income, medically vulnerable, access and functional needs, tribal, and disadvantaged community customers: Yes

Upfront Financial Assistance Available for Low-Income Customers: Yes

Description of Upfront Financial Assistance: We can offer several 100% financing options with no prepayment penalties. Customers would only be responsible for interest accrued before paying off the loan, and minimal loan fees (3% or less). This cost can be covered by incentives.

Additional Customer Education and Assistance Available: Yes

Description of Additional Customer Education and Assistance: We have a long history in educating our customers regarding various programs such as SGIP and other available incentive programs. We seek out customers eligible for such incentives through our vast network of referral-only businesses, and constantly train our employees to respond to different needs and situations through active learning management system that is able to be quickly tailored to respond to changing needs and unique circumstances.

Additional Detail About Services Offered by the Company: ALIVE specializes in making solar and storage accessible to everyone. We provide ALL customers with the highest quality product and installation possible. We've been working with SGIP since 2014, and we were pioneers in residential, grid-connected energy storage and all varieties of solar installation.

Upfront Financial Assistance Available for Low-Income Customers: Yes

Description of Upfront Financial Assistance: PACE Financing - based on the property value, not owner credit/cash-flow. This is a common source of financing for renewables projects, including solar, storage, lighting, HVAC, and roofing upgrades. For clients in the SGIP Equity Budget regions, we are able to offer increased up-front rebates for energy storage projects.

Additional Customer Education and Assistance Available: Yes

Description of Additional Customer Education and Assistance: We provide a free evaluation for solar and storage and offer facility audits to develop energy efficiency plans and projects that save money, improve facility operations, and increased employee and tenant satisfaction/retention. Projects in underdeveloped/undeserved zones may be eligible for additional incentives. For clients needing or wanting financing, we offer vetted financing partners that have capital available NOW. This financing has been here for years but is still available today for your renewable projects -- with terms out to 30 years. That means you'll be saving money in the first year the system is operational!

Additional Detail About Services Offered by the Company: The Baker Electric Renewables Division has helped many customers lower their operating costs - including many non-profits such as private schools, houses of worship, and even the local San Diego Food Bank. Property/Building Owners - Owner/Occupied Options are available to help you: -lower operating costs -retain tenants -increase cash flow potential This can be done with no out-of-pocket cost through PACE financing, with likely no impact to your borrowing ability. net cash flow positive in year 1. Typical Requirements: -Must have minimum 20% equity in building/property -
Table of Contents

Must be current on property taxes - may be credit check, but approval is not based solely on credit check - Minimum project value of $150,000 (for solar/solar+storage/EVSE projects) - Baker requirement

Able to serve low-income, medically vulnerable, access and functional needs, tribal, and disadvantaged community customers: Yes

Upfront Financial Assistance Available for Low-Income Customers: Yes

Description of Upfront Financial Assistance: We offer financing through several partners, however this financing is for property owners not renters. It is standard home improvement financing with or without down payment.

Additional Customer Education and Assistance Available: Yes

Description of Additional Customer Education and Assistance: Our standard sales practices include educating homeowners on the benefits, financials and operations of Solar and Storage systems. In addition, the products we install are monitored and can be easily accessed by cell phone or desktop applications. These tools give customers peace of mind that their system is ready and able to meet their energy needs in the event of an outage.

Additional Detail About Services Offered by the Company: Belmont Energy provides solar and storage solutions for the residential and commercial market. Battery backup solutions can be a valuable addition to any home's electrical system. There are a variety of use cases for solar and storage systems. Customers who may have medical requirements that would be burdened by a loss of utility power can benefit greatly from knowing that they can meet their needs in that unfortunate situation. Belmont Energy has provided solar and storage systems for customers from all walks of life and values the personal and individual needs of all our clients.

Upfront Financial Assistance Available for Low-Income Customers: No

Description of Upfront Financial Assistance Available for Low-Income Customers: No Reply

Additional Customer Education and Assistance Available: Yes

Description of Additional Customer Education and Assistance: We have a program that educates customers in how energy systems work. When we discuss a customer's energy system, we first ask a series of question that help us determine what they have, then we explain the following. Their utility bill including peak and off peak rates. The equipment in their system now. The equipment in the system after storage is installed. How storage works. Software we use to give them a deeper understanding of their energy usage as a consumer and how they can reduce both their bill and their usage. The overall technology that is used to perform these functions. What their new system will look like and how it will benefit them. How to use their new system.

Additional Detail About Services Offered by the Company: We provide the following services from the beginning of the process to the end to ensure that our customers get the most value from an energy system. We fist perform an energy usage analysis and explain how usage effects their system and their costs. We then perform a cost benefit analysis with new system options to help customers understand the financial implications of their options. We then perform a system design and create a package that shows the customer what they will
get and how much it will cost. We provide complete installation and orientation. All this can be performed in Spanish and English.

**Description of Additional Customer Education and Assistance:** EEE, Inc. will soon be offering a solar PV and energy storage training program to help the community learn how solar PV and energy storage can help fight climate change, provide distributed energy and provide power solutions in the event of emergencies and/or natural disasters.

**Additional Detail About Services Offered by the Company:** Elements of Earth and Energy (EEE, Inc.) is a California based corporation offering solar Photovoltaic (PV), Advanced Energy Storage, Sustainable Housing and Urban Farming solutions to residential and commercial clients throughout our disadvantaged communities. We are your one-stop-shop for design, engineering, permitting, installation, inspection, and maintenance for sustainable solutions in our communities. We specialize in new or existing improvement projects that reduce your electric bill or eliminate it completely. We offer energy storage systems for: emergency battery back up, back up for medical equipment, self consumption, load shedding and peak demand solutions to hedge against future rate increases by the utilities, city black and brown outs. EEE is a licensed General Building, Electrical and Solar contractor (B, C-10, and C-46) registered with the California State License Board # 969938, since 2012. EEE was contracted by SCE, SoCal Gas Co, ICFI and the Energy Upgrade CA program from 2012-2016, as the program’s mentor and trainer for Energy Efficiency and Advanced Building Performance. As a result, EEE has been paving the path for energy efficiency and renewable energy, here in Southern California, ever since. We will assist you to get the maximum allowable
rebates and incentives available for your project. If you've had enough of high-energy bills, call us and we will give you peace of mind once again. We design and build: - zero net energy projects - green construction - new & remodels - solar electrical PV systems - advanced energy storage systems (on or off grid) - electric vehicle (EV) charging stations - smart phone PV and ESS monitoring - panel level monitoring of solar PV panels - solar PV air conditioner systems - solar PV water heater systems - heat pump integrated solar PV systems - solar PV pool pump solutions - energy management systems

Upfront Financial Assistance Available for Low-Income Customers: Yes

Description of Upfront Financial Assistance: We offer financing to anyone with a credit score of around 650 regardless of income status. We have finance partners that include: EnerBank USA Wheelhouse Credit Union Sunnova Energy Corporation HERO Program Dividend Solar Ygrene Energy Fund Suge Financial Energy Loan Network Sunlight Financial Service Finance Company, LLC Local Vivint Solar PPA & Loans California Clean Energy

Additional Customer Education and Assistance Available: Yes

Description of Additional Customer Education and Assistance: Solar and battery power are for everyone. With this belief comes the responsibility to be ready to serve all those that would like to take advantage of this cleaner more renewable energy source. Golden State Power has had 20 years of experience in the industry and we have already served many low-income, medically vulnerable, access and functional needs, tribal, and disadvantaged communities up and down the great state of California. We are blind to any facts other than the fact that you desire to learn about and potentially adopt a better recourse for your energy needs. Power,
ill its forms will eventually been seen for the human right that it is. We aim to be a part of this revolution. Come one come all! Specifically, we intend to produce marketing and educational material in English, French, Portuguese, and Spanish. We already work with several finance partners that are making solar accessible on levels and scale that have been historically for only those that could "afford" it. Time are changing and we are seeing a big push to get solar and battery in the hands of anyone that wants it. There is still much work to be done on this front, but we will continue to champion for this. We are currently working with the Department of Energy to design and install micro grid systems that include solar, battery, and generator technology to keep tribal lands detached from the utility service and help them retain the status of sovereign and independent from the United State of America. We support the tribal communities and respect and value the contribution to our world that they provide. We would love nothing more than to be a bigger part of this process.

Additional Detail About Services Offered by the Company: WELCOME TO THE GOLDEN STATE POWER FAMILY We are one of the original pioneering solar contractors of California, and most of the USA. Our roots grow deep in the renewable energy space dating back as early as the 70’s. Our current corporation was established by father and son team Joseph and Gabriel Bork way back in 1999. Yep, that is long before solar was taking the world by storm. We have developed many of the industry’s leading techniques and continue to refine the installation process to this very day. We absolutely LOVE what we do. Here is some additional information about Golden State Power: • Custom Solutions can include: ground mounts, patio covers, electric vehicle chargers and battery/generator back up power • We offer HVAC, Roofing & LED Lighting packages • Tesla Powerwall, LG Chem & Sonnen Battery packages available • NO TOUCH SALES PROCESS to keep you safe – everything will be done online. • We care how solar looks on your roof, therefore, we run the conduit through your attic to keep things beautiful • 25-Year Roof Warranty - (ZERO leaks in 25 years of business) • 25-Year Panel & Inverter Warranty • 25-Year Workmanship Warranty • 25-Year Performance Guarantee • 25-Year Monitoring (You can see every panel and how it's performing) We guarantee your satisfaction on all aspects of our work. We're never satisfied until you're satisfied. Whatever it takes! We really do look forward to earning your business.

Additional Customer Education and Assistance Available: Yes

Description of Additional Customer Education and Assistance: GSR Energy is focused on bringing energy storage to commercial and industrial customers. Our customer education and marketing efforts will focus on businesses and public agencies that wish to deploy energy storage swiftly, with a focus on steel in the ground, as soon as possible.

Additional Detail About Services Offered by the Company: GSR Energy is an independent, pure-play project developer focused on deploying energy storage utilizing Tesla Energy at commercial and industrial properties in California. GSR is comprised of project development executives from Advanced Microgrid Solutions (AMS), an early pioneer in successfully developing behind the meter energy storage projects for commercial and industrial customers. Led by Mark Tholke, former Chief Development Officer for AMS, members of GSR Energy’s development organization have designed/constructed/financed 95 distinct system comprising nearly 80 MW/370 MWh of battery storage systems. Some of these projects contribute to a 50 MW virtual power plant of BTM energy storage to provide 200 MWh of dispatchable capacity for grid support and reliability in the Southern California Edison (SCE) West Los Angeles Basin. Customers include Irvine Company (25 projects), Walmart (7 projects), CSU system (4 projects), Irvine Ranch Water District (7 projects) and other private and public facilities. Over the past 3 years, members of GSR Energy's development group have deployed more behind-the-meter Tesla Energy battery storage than anyone else in the industry.

Upfront Financial Assistance Available for Low-Income Customers: Yes

Description of Upfront Financial Assistance: GRID Alternatives is a mission-driven, non-profit organization specializing in providing energy technologies, energy savings and job training to low-income communities. GRID will continue to ensure that all of our services and technologies are provided at no cost to our low-income customers, with no upfront financial liability and no payments collected at any time throughout the lifetime of the system. GRID Alternatives is also able to provide financing solutions for non-profit commercial and affordable Multi-Family housing customers through our trusted partners and our own in-house program related investment funds with terms that vary based on project scope. GRID has been providing no-cost services for low-income communities in California for over 14 years, and has a proven track record of effectively combining state incentives with equipment donations, strategic partnerships, general philanthropy and innovative financing. GRID's funding model for low-income homeowners has proven highly successful through our administration of the Single-Family Affordable Solar Homes (SASH) program, which has resulted in over 9,000 installations in California for low-income communities, all at no-cost to the families being served.
GRID will guarantee that all of our residential SGIP clients will benefit from GRID's unique funding model by providing fully financed systems with no financial liability, upfront or otherwise, at any time. For more information on GRID's no-cost services and unique funding models, please visit: https://gridalternatives.org/what-we-do/energy-for-all

**Additional Customer Education and Assistance Available:** Yes

**Description of Additional Customer Education and Assistance:** Our experience has shown that continued support and assistance even after the installation must be part of a client’s journey to ensure a positive experience and achieve the deep community impact envisioned by the program. In addition to the tailored approach taken by each outreach staff, GRID provides a centralized, multi-language phone and email system to assist and streamline servicing needs or maintenance questions after the installation. Homeowner educational resources and materials are made available on GRID’s website and via automated email communication to reinforce education and support provided by outreach staff. All communication and educational materials are designed to be understood by a variety of education levels, available in multiple languages and offered in a variety of accessible print. GRID Alternatives offers a grant-funded technical assistance program for owners of affordable Multi-Family housing and non-profit commercial facilities to educate owners about the benefits of solar for the last five years, and is working to include energy storage solutions into the technical assistance offering. The current technical assistance program provides utility bill analysis, remote site assessments, cost estimating and financial analysis at no cost. GRID will remain committed to providing up to date, in-depth information on energy storage technologies, energy saving opportunities and education, SGIP program status and the availability and all other services available to the families being served.

**Additional Detail About Services Offered by the Company:** As a mission-driven, non-profit organization, GRID’s outreach staff have established a continued presence in the communities we serve through the marketing and outreach activities undertaken with our current energy services, including solar, clean mobility, workforce development and training. GRID uses on-call translation services to assist clients who speak other languages and are also able to pre.qualify interested homeowners during the initial phone call. Once a prospective client has been prequalified, our local outreach staff will serve as liaisons and advocates for each client through completion of the application process and provide support and education throughout the multi-step installation process. GRID’s experienced, multicultural staff offer a flexible, personalized outreach approach that ensures equitable access to our services regardless of race, abilities, age, language, culture, gender identity, educational attainment, or any other distinguishing characteristics. We endeavor to create communication materials that have accessibility for all needs in mind. GRID also provides reasonable accommodations to reduce or remove barriers to participation to individuals that are, for example, deaf/hard of hearing and blind/vision impaired, as well as clients with physical disabilities, limited mobility, cognitive or psychiatric impairments or have transportation challenges. Through GRIDs extensive experience working with disadvantaged and underserved communities, our services have already benefited thousands of families in the targeted high fire threat areas and in communities who have experienced public safety power shutoffs. GRID will work to ensure all of our services are leveraged and coordinated to the extent possible, and every eligible SGIP storage applicant will be provided information on and access to GRID’s full suite of energy programs and technologies, including residential solar, community solar, clean mobility, energy efficiency, and job training initiatives. All of GRIDs programs will continue to be offered at no-cost to eligible households, meaning GRID will only work to save you money, and will never charge a single customer for our services.
Company Website: www.gshomesca.com

Familiar with SGIP Equity Resiliency Requirements: Yes

Firm has Experience with Access and Functional Needs Customers: Yes

Able to serve low-income, medically vulnerable, access and functional needs, tribal, and disadvantaged community customers: Yes

Upfront Financial Assistance Available for Low-Income Customers: Yes

Description of Upfront Financial Assistance: We can loan them the money to cover the application costs. For those who qualify, we can assist them in applying for an equipment loan to purchase the equipment and then they can pay off that loan when the incentive is paid.

Additional Customer Education and Assistance Available: Yes

Description of Additional Customer Education and Assistance: We are extremely available to our customers to help with any questions or concerns they might have. We also like to post the instructions for what they need to do to manage their system during a power shut-off situation. It sounds so basic, but just posting a list of the steps to take to start running totally off batteries is something that can calm them down during a power crisis. (Also makes us get less phone calls to remind them how to do it :)

Additional Detail About Services Offered by the Company: We are a local family-owned company who has been in business serving Southern California for over 32 years. We have hundreds of happy customers and would love to visit with you and see how we might assist you in reaching your goals.

Additional Customer Education and Assistance Available: Yes

Description of Additional Customer Education and Assistance: We will educate customers about How: Solar panels work How inverters work How batteries work How Energy Storage works How SGIP works How interconnections to CPUC works

Additional Detail About Services Offered by the Company: Highlight Solar designs and installs energy storage and solar power systems for residential and commercial clients. The company provides a complete range of services that are designed to streamline the solar process for its customers (including monitoring, maintenance and ongoing support), and it works directly with several industry-leading solar panel, energy storage battery, and inverter manufacturers so it can offer the best possible solutions available in the market. We are the leading residential and commercial energy storage and solar panel installation company in Santa Clara and San Mateo Counties. Our customer focused business approach has been crucial element of its success. Our customers are our main partners and the backbone of our business, so supporting them is always our number one goal. When we install a solar electric system and the client actually sees their meter spinning backward, that’s a very special moment for everyone involved. Highlight Solar also installs SunStar solar pool heating systems that allow homeowners to swim comfortably all year-round. Ultimately, everything we do is geared toward optimizing the efficiency of our customers' energy consumption and reducing their overall carbon footprint, and our solar pool heating systems are just one more way we accomplish that.

COMPANY PHILOSOPHY Our goal is simple: Provide every client with clean, renewable energy at a fair market value.
taking the time to listen carefully to our customers' needs, we are able to tailor a system that perfectly fits their lifestyle and complements their home.

Able to serve low-income, medically vulnerable, access and functional needs, tribal, and disadvantaged community customers: Yes

Upfront Financial Assistance Available for Low-Income Customers: No

Description of Upfront Financial Assistance: No Reply

Additional Customer Education and Assistance Available: Yes

Description of Additional Customer Education and Assistance: We approach all systems from a system design standpoint, reviewing the customer’s needs to be reflected in the system provided. We start with an Energy Audit and comprehensive review of current and future usage to best determine the actual needs of the customer. We review the customers budget and can offer financing or guide them to grant funds if needed. We design the system using a matrix which includes: Current and future needs Customers budget constraints Solar, batteries and generator options The best equipment for the customers need. We offer ongoing service contracts to customers or work with them to teach them how to service their own system to the extent that it is possible and feasible. We have familiarity with numerous battery based solutions and so can explore various avenues with the client during the design phase rather than being restricted by equipment experience limitations. Our team has decades of grid independent system design and installation. We offer services ranging from critical loads backup to whole home or business backup. We empower our customers with continuing customer education from design to install and beyond.

Additional Detail About Services Offered by the Company: We have familiarity with numerous battery based solutions and so can explore various avenues with the client during the design phase rather than
being restricted by equipment experience limitations. Our team has decades of grid independent system design and installation. We offer services ranging from critical loads backup to whole home or business backup. We empower our customers with continuing customer education from design to install and beyond.

Able to serve low-income, medically vulnerable, access and functional needs, tribal, and disadvantaged community customers: Yes

Upfront Financial Assistance Available for Low-Income Customers: No

Description of Upfront Financial Assistance: No Reply

Additional Customer Education and Assistance Available: Yes

Description of Additional Customer Education and Assistance: Since our company has been installing battery systems since 1988, we have always taken the time to educate our customers as to what a battery based solar system can do for them. Most companies advertise that a battery can power the whole house, which isn't true. Unless a battery system is designed to take care of the electricity for the entire house, the customer will only be able to have certain circuits with power if the grid goes down. The customer will be able to choose the circuits, but if the grid goes down the battery will not be able to power items such as the a/c.

Additional Detail About Services Offered by the Company: Scott Carlson, our contractor and President has been installing battery based solar systems since 1988. When he began installing solar, there were no grid tied inverters, so every system he installed included batteries. Grid tied inverters came out in the late 90's and since that time, we have installed mostly grid tied systems, but have continued to install battery systems for customers that have requested them. Battery systems today are sleek, able to connect to the grid and give our customers peace of mind if the grid goes down.
NextGen Construction

Able to serve low-income, medically vulnerable, access and functional needs, tribal, and disadvantaged community customers: No

Upfront Financial Assistance Available for Low-Income Customers: No

Description of Upfront Financial Assistance: No Reply

Additional Customer Education and Assistance Available: Yes

Description of Additional Customer Education and Assistance: Each customer should be educated on the real cost of solar and battery storage. We take particular caution to make sure each customer takes the time to review the California Solar Consumer Protection Guide and explain the highlights (No production during grid outage, utility minimum fees, getting several quotes, etc.) independently. With regard to energy storage we make clear that for customers that can withstand brief grid outages on occasional basis, a battery mostly does not make economic sense. Most battery options only allow or a limited back upload that typically is exhausted by a fridge, some lights and TV. Air Conditioning loads are very expensive to back up. Furthermore, the customer needs to understand that a battery has a limited life expectancy and over time the capacity will be reduced. Customers that do not qualify for SGIP incentives should only choose a battery if the cost is justifying their increased comfort level. Customer Education is a critical part of what we do. Battery storage does not pay for itself only using peak load shifting and increased self-consumption given the current NEM opportunities. Commercial Customers however often see a much more apparent cost saving accounting for incentives, depreciation and tax credit. The ability to reduce demand charges on certain commercial load profiles contributes much to this trend.

Additional Detail About Services Offered by the Company: Sattler Solar Inc. and Electrical Contractors provides turnkey solar and electrical contracting services and comprehensive cost analysis for commercial, and residential renewable energy projects. Our goal is to install reliable solar and energy storage
systems that are intuitively monitored so that customers always understand that the system performs as proposed. We are authorized Panasonic and LG Solar Installer and also authorized on the following battery storage manufacturers: - LG Chem - Generac PWRcell - Sonnen Batterie, - Panasonic Evervolt Battery - Energiport Our partnerships with industry leading manufacturers such as Panasonic, LG Electronics and SolarEdge allow us to provide industry leading warranties to our customers. We offer whole house backup solutions and take a custom approach on each individual customer. One size does not fit all. In fact, from our experience, Energy Storage often does not make sense for the "standard" customer. Commercial Customers may see real cost saving potentials by adding energy storage to facilitate load shifting and reduce demand charges!

**Additional Detail About Services Offered by the Company:** Specialties: We make going solar easy! Finding a solar company you can trust to do a great job and minimize the effort on your part can be tough. At Save a Lot Solar, we provide you with a worry free solar electric system installation. We will not call you repeatedly or flood you with emails. If you respond to our proposal, we will respond with a total commitment to making you happy and saving you money on your electric bill. If you do not respond, we will not bother you. We will give you a fair price. We will leave you with a smile when we are done, saving you thousands of dollars on your electric bill and knowing you got a great system that was installed with ease and competence. The five star reviews we receive demonstrates our ability to deliver your solar system to your satisfaction. We make sure every single customer is treated with respect for their investment and their property. Our Photo Voltaic systems use top of the line 'State of the Art' Enphase Micro-Inverters and Canadian Solar 275 watt mono crystalline panels and come with a free monitoring web site. For locations with a limited amount of usable solar access, we offer LG 345-watt mono crystalline solar panels. Save A Lot Solar provides solar design and installation for northern California homes. Our workmanship, value and quality surpass most other northern California solar installation companies. History Established in 2008. Since 2008, Save a Lot Solar has installed many residential Solar PV systems. All of our customers are happy with their solar systems and are available as references. Our main goal is customer satisfaction. We have migrated to using Enphase micro inverters,
exclusively, since they have the best warranty and are much safer for the customer and their property. We will continue to provide great customer service as we design solar PV system customized to your location and requirements. With over 450 installed systems and only 5-star reviews on Yelp and Google, we can assure you that we will install your system in a professional manner and with great customer service. Meet the Business Owner Business owner information Photo of John O. John O. Business Owner A NABCEP certified Solar Photo Voltaic System Designer, Installer, C-10 Electrical Contractor, C-46 - Solar Contractor and B-General Contractor licensed by the California Contractors State License Board. The license number is 971422.

**Firm has Experience with Access and Functional Needs Customers:** Yes

**Able to serve low-income, medically vulnerable, access and functional needs, tribal, and disadvantaged community customers:** Yes

**Upfront Financial Assistance Available for Low-Income Customers:** Yes

**Description of Upfront Financial Assistance:** We offer an excellent financing package that has 0% Interest and No Payment until 2021 (including solar and energy storage installations). This creates the financial flexibility for any homeowner to be able and willing to go green, have a solar system, and include the now essential asset of energy storage system. Solar Optimum also undertakes and completes ALL SGIP Applications, on behalf of ALL of our qualified customers.

**Additional Customer Education and Assistance Available:** Yes

**Description of Additional Customer Education and Assistance:** Our valued customers are treated with a complete overview of the solar and/or energy storage system, its compatibility to their home, usability, upkeep, and monitoring. Solar Optimum undertakes the responsibility of obtaining the needed Discharge Data and supplying this to SGIP Administrators promptly so that ALL of our customers are able to receive the SGIP rebate. They sign-off on the precise location of their new solar and/or energy storage systems, so that there are no surprises during installation or after the fact. Our customers are treated with a complete overview of monitoring (either through Enphase or Tesla), so that they are able to successfully track their production and be up to date with their charging/discharging requirements. In that regard, we educate our customers and have them agree/sign-off on the SGIP discharge data requirements so that there is no surprise that these energy storage systems are designed to be charged during off-peak hours, discharged during peak-hours, and offset the necessary/required GHG emissions in order to qualify for the SGIP rebate.
Additional Detail About Services Offered by the Company: Solar Optimum is among the largest residential solar and energy storage installers ill of California. Having the experience and know-how in engineering and installing solar and energy storage systems, we excel in providing clear information, excellent customer service, and quality installations. Our customer experience and reputation speak for itself in proving that we are California's premier solar and energy storage installation company. We have the flexibility to undertake a variety of targeted populations, including medical baseline customers. Our experienced Energy Consultants are able to break down homeowner utility statements and provide the best solution, catered specifically for them. By using the highest grade panels (Panasonic), microinverters (Enphase), and energy storage system (Tesla PowerWall), Solar Optimum is proud to offer full warranties on all of our products (including matching parts and labor warranties!).

Description of Upfront Financial Assistance: We are able to offer PPA or PPA PACE financing at no upfront costs.

Additional Customer Education and Assistance Available: Yes

Description of Additional Customer Education and Assistance: We will offer a series of educational webinars on storage, resiliency, storage and how California businesses and homeowners can take advantage of the SGIP incentive. We will have a blog post series an informational video series. We will also have a FAQ on our website answering consumers most often asked questions. We have 24-hour customer support on our website with a live person to answer questions. We have a team of experts who are available for consultation and immediate follow up. We will reach out to our network of existing customers whom we have served for many years who are eager to learn more about the SGIP program.

Additional Detail About Services Offered by the Company: We have been in business since 1976, which means we have 43 years of experience learning what delights our customers. We have worked in the affordable housing industry to provide solar and storage for many years and have delivered more solar solutions than any other solar EPC firm in Northern California.

Firm has Experience with Access and Functional Needs Customers: Yes

Able to serve low-income, medically vulnerable, access and functional needs, tribal, and disadvantaged community customers: Yes

Upfront Financial Assistance Available for Low-Income Customers: Yes

Description of Upfront Financial Assistance: Our company have multi financing options such as 1 year the same as the cash with 0% and not payment also we can carry over a lot of our hard cost for customers with no $ down until receiving our incentive check.

Additional Customer Education and Assistance Available: Yes

Description of Additional Customer Education and Assistance: If incentives are provided and a profitable business model is available our company can offer the following services: 1. In-person and online customers consultations including product and program overview. 2. Marketing - our company can promote the program on our platforms and to our database. 3. Full sales and installation service with our in house teams. 4. Financing options and additional services as needed.

Additional Detail About Services Offered by the Company: Treeium Energy sets the standard when it comes to green energy solutions in California. We work with homeowners who feel they pay too much on their utility bills (Water, Gas, and Power) and want to find ways to save money while saving the environment. Our custom proposals present a comprehensive energy-saving package that utilizes the most advanced green energy upgrade products and rebates to deliver you the best value and service in our industry. These upgrades are designed to cut homeowners' utility bills, increase home comfort, boost property value, and ensure that we are helping to save the planet with every new project. Where many other companies are constrained to one or two installation methods and a very limited choice of industry products, Treeium Energy offers a variety of installation options and industry products. Combined with personalized project management, we have all the tools to deliver a system tailored to the customer's needs. There is no point going 100% Solar if your home isn't
100% efficient. At Treeium we will upgrade our client's home efficiency prior to the installation of solar to reach a 100% usage offset. By doing this, our customers will enjoy lower energy bills, an increase in home comfort, and value while redirecting only a portion of the utility savings to pay for their new improvement.
Trinity Power

Company Website: www.trinitypowerca.com
