

Chris King is Chief Policy Officer of Siemens Digital Grid, leading regulatory and strategy initiatives in renewables integration, energy efficiency, demand response, and customer engagement, including extensive experience in rate design and advanced metering infrastructures. Earlier, he held executive leadership positions at Pacific Gas & Electric and three Silicon Valley energy start-ups, including one that delivered advanced metering systems for over 10 million customers. Chris is on the Board of the Smart Electric Power Alliance, the Brussels-based Smart Energy Demand Coalition, and the Advanced Energy Economy Business Council. He has testified on energy technologies, including smart meters and smart grids, before the U.S. Congress and international regulatory bodies and co-hosted the U.S. Congressional Delegation at the Copenhagen Climate Summit. Chris holds bachelors and masters degrees in Biological Sciences from Stanford University, a masters in business from Stanford, and a JD from Concord Law School. He holds three smart grid patents.
