

Doug Staker is an energy professional that has worked globally for 27 years. He has been a pioneer in the world of smart grid technologies with a focus on smart metering and intelligent energy storage. He is currently Vice President of Global Sales at Demand Energy Networks Inc., a distributed energy management and storage company and is a subsidiary of Enel, a leader in the global utility market.

Demand Energy is a thought leader in the development of both delivery and supply rate structures that align the goals of utility load management with commercial power and energy savings. Demand Energy has led the growth of Behind-The-Meter energy storage in New York City and has been collaborative with the local approval agencies in developing the permitting process for in building installations.
