

WE STILL MAKE STEEL IN CALIFORNIA

Utilizing California's renewable power supply and sourcing all raw materials for our recycled rebar locally makes our steel the **GREENEST AND CLEANEST** available.

DEMAND RESPONSE IN ACTION

DEMAND REDUCTION

Demand response can significantly reduce peak demand, particularly on hot summer days. This graph shows what happened several years ago, when peak demand decreased by 1,200 MW on one specific summer day – more than enough to power the cities of Hamilton and St. Catharines.
